SUMMARY KEYWORDS

heterosexual, aids, gay, houston, called, people, homosexuals, virus, voters, poll, gq, wilde, including, disease, man, magazine, heterosexuality, referendum, years, september

SPEAKERS

Mike Miesch, Jack Valinski

00:02

Alright you will sing Silent Night and I will give birth to the baby okay? Now no because I want you to understand how it happened Okay? All right now I made mother's I've never given birth and maybe a little wrong and my positioning but I'm going to just lay back here put my legs up and try all right I'm gonna say I want you all to sing okay I'll start your beautiful beautiful keep singing

00:37

keeps singing

00:46

birds in my house but keep singing and Mary and Mary pushed pushing the wife and we're watching in the horse was shitting on the car was eating but you know damage began to come very very nice baby came up

01:30

[It's Good to be Gay plays]

Jack Valinski 01:41

The name of the show is Wilde 'N' Stein named after Oscar Wilde and Gertrude Stein. Our aim is to bring a better understanding within the gay and lesbian community. This is Jack Valinski, along with Mike Miesch asking you to join us for the next 90 minutes. Good Thursday evening. It's a post marathon Thursday, and we have a lot of things going on. So yes. Including in Los

Angeles, there's a big gala age benefits. And next week, and the week after we may be broadcasting part of that show. Depends on whether we get a tape of it, but looks very positive. Tonight. So we have a few things in line for you. First of all, Mike has a calendar. Right then we're gonna talk about the endorsement night at GPC yesterday and also a little bit about the debate for the mayoral candidates. Then we have news. And Mike you have a feature called perspective.

M

Mike Miesch 02:38

Yes, a comic piece and we'll let that introduce itself.

J

Jack Valinski 02:43

Okay. And then I have a feature on GQ magazine. And after that we got some music.

M

Mike Miesch 02:49

Yes, one. Well, I've got two really wonderful tapes that I got in recently. One that we'll hear is Don John Buccino on the arrow. John is Ronnie Gilbert for companies that recently got a lovely letter and a review copy of 10% review of Tom Wilson, which all scheduled later and it's really wonderful, is probably the highlight of my week. And we're gonna be talking about what else

J

Jack Valinski 03:19

then we'll be talking a little bit about the gala in LA that's some of the big stars doing a benefit for the AIDS in Los Angeles. And coming up in November on public TV channel eight is the times of Harvey melt wonder Hall and we should have a review copy of that even though we've seen that every revokes plan on here but it will be nice to refresh our member memory exactly about that wonderful movie that won an Oscar for yes documentary last year. So we've got a lot of things going so let's start off with Calendar.

M

Mike Miesch 04:20

Announcements Wilde 'N' Stein?

O

04:45

My life has been filled with the most unusual things lately. I'm getting sick going to the doctor tests diagnosis you haven't lived so you've watched someone tell you you're going to die. Poor doctor, pobrecito. I think he was going to ask me out before that I really do. He was so nervous. He was sweating like, don't panic. He said, It's not positive. We're just going to have to send you to the hospital for a few days to make sure. And just don't panic. That's the main thing. Don't give up hope and don't panic. I couldn't panic. I knew one of us was supposed to stay calm, and he certainly wasn't. Actually not until after he forced me to have a glass of water and

gulped a few himself. And I was sure he wouldn't faint. I had my first thought, what am I going to tell my mother? I put it off till after the hospital said I was I went through so many scenarios. Hi, mom. I'm gay. What's that? You won't speak to me till my dying day. Good. I'm planning on Thursday. There's a sign outside the doctor's office that literally made me consider saying it with flowers. Can't you imagine a dozen roses and a note? Roses are red, violets are blue. Your son is gay. He's dying soon, too. The thing was, I just didn't want to cry. I didn't want to be in the middle of telling her and then cry. I almost didn't tell her. I almost. You're lying. That's all she said. You're lying over and over again. You're lying. You're lying. You're lying. Tell me you're lying. She flew down. The next day. My doctor gave her a stack of articles and clipping so big. She almost couldn't carry them. And then he said they really didn't know anything. We went to my place. And she read it all. She read it and gasped and read it aloud to me. And I said I didn't want to know and she read it anyway. She sat there and read the whole stack and didn't even get up to go to the bathroom, which is really quite a feat for my mother. And then she set the last piece aside and turned to me and asked why. I broke out the bourbon who was the only thing I could think of. She asked me what she did wanted to know what she did wrong. She wanted me to know she really didn't know she was doing anything wrong. It was charming. Her upset and guilty over making me gay, me upset and guilty over making her upset and guilty. She wanted me to forgive her. Then I wanted to cry. We got drunk and high. Yes, my mother who doesn't even know how to take a drag of a cigarette, sat there and got high with me. She told me things about herself that she told me about an affair she'd had. I told her about a few of mine. I lied to her though I said I'd never done anything kinky. bodies that touched leather never touched mine. She finally passed out me too.

17:11

right now if I may, I would like to, if I could, I would like to share with you something that I've been feeling I would like to share with you something that is it. If I personally share with you feeling that I've been having since the November elections

17:43

was good, you know? That's like a robic despair class. You know, out with a bad air and with a good air. Did you feel the burn? And these are really difficult times for all of us. It's just really difficult. And it's especially difficult time for a political humorist. I mean, it's very difficult for me these days to write original political humor. Do you know what I'm saying? A couple of weeks

ago? How many of you heard the results of the President's physical examination on the news? How many of you think that it would be alright if you never again in your adult life? If you never again heard the words presidential feces. It was on television. He was on the news. I could not believe it. I think that is an invasion of my right to know. I don't want to know I do not want to know about the presidential stool. Okay. I mean, call me crazy. But you know, I don't and as a matter of fact, when I think of number two, I like to think of George Bush

○

19:18

was wondering though, yeah, I'm getting a little crazy. I was wondering, is that a civil service job? I mean, he's plowing through the Presidential pile. civil service job I'm here. Is there such a person as the presidential faecal analyst See, what I want to know is if it is a civil service job, I want to know because I deserve back pay. Because I've been analyzing that boys crap for years.

J

Jack Valinski 19:56

For Thank you, Clinton. We have a little addendum here to the calendar. One thing tonight Nightline is going to do a I guess live from LA talking about that gala fundraiser for AIDS benefit for LA AIDS Project LA is how it's how it's put together at Project LA,

M

Mike Miesch 20:19

Los Angeles. Commitment into life is the title of it. I believe in you have a

J

Jack Valinski 20:23

few other items. Yeah.

M

Mike Miesch 20:25

I recently became an owner of a TV set for the first time in many years and got a TV Guide. So there's a couple of things on this week that you might want to check out September 24, Tuesday on channel eight Nova ah chapter one history of the disorder and attempts at cures Dr. Robert Gallo of the National Cancer Institute will be featured person on this. And on the 26th Thursday at 730. If you happen to catch pm magazine, they'll be a story on AIDS and Hollywood and a couple of other of the news magazine formats. We'll be doing stories on AIDS also. So you might want to check out your TV guy.

J

Jack Valinski 21:15

And last night there was a debate between the two major mayoral candidates, present Mayor Kathy Whitmire and former mayor Louis Welsh at the Galleria area. At the debate, somebody yelled out from their unknown Romans where the end of the debate got as much attention as

Hudson who was trying to let everybody know that he's also running as a mayoral candidate and wanted to be up there on stage. But this person yelled out, Mayor Wittmeyer You're spreading AIDS. And also campaigners for another less well known mayoral candidate Susan director had passed out leaflets making the same charge before the debate begun. I wasn't at this debate, I was invited to go there. And unfortunately, I had other business and that was the business ed, gay Political Caucus. Last night was endorsement. Meeting and first time since I've been part of the caucus, and first time in recent history the past few years, there was no endorsements. There is nobody seeking endorsements on a major of any major candidates. Seems as though we are no longer in vogue. Or we are no longer a plus, I guess no, we're a liability. And he so called friends, which I am not going to use that term anymore in City Hall, no longer seek our endorsement. They feel they don't need us. As a matter of fact, that President of gay Political Caucus, and the political coordinator met with the mayor's people before the meeting endorsement meeting last night. And they asked for no endorsement and even asked us to do any recommendations. And as a matter of fact, and also had a press release that they wanted us to handouts from GPC. Can you imagine the nerve of the see people asking us to hand out a press release that they have prepared for us? I just think that's absolutely incredible. Meeting was really long last night. So it started a little bit late. And at last past 1030, probably more towards 11 and 15. What was needed was a lot of people venting out their anger, their outrage in talking about what we should do. What was the direction we should take? They didn't ask for our endorsement. Should we give it to them anyway, it's called talking about city council and the mayor. Should we not recommend it recommend Should we ask our people to stay away from the polls? What has happened? It seems as though once the referendum came out. They thought GPC was a liability with the 80 to 20% defeat that we had two years ago, we've screened in almost every race, majority of the races. And some areas, we had more than one candidate seeking endorsement. We had a few candidates seeking endorsements. In two years, we've come a long way. And unfortunately, it's it hasn't been a positive way. But it seems as though they look at us differently as they did two years ago. It sort of galls me, where we've come into ears. Pokey Anderson got up and really gave a wonderful speech last night. I wish I can remember a lot of things she said. But I don't know where we go. And that's basically what her speech was saying. What what do we do? We have a lot of our people already contributing to the campaigns contributing to Mayor Kathy Whitmire working in the campaigns. And the problem is we're an invisible minority. These people are going out there and thinking that everything the mayor does is wonderful. She has been a good mayor for the city, a very good mayor for this city. However, what has she given us? There is no Montrose Library. There still is a lot of problems with the traffic problem here on lower Westheimer. Montrose has not been exactly a thriving community in the past few years, of course, the city has had a downswing in the economy, and that necessarily can't be blamed on one particular candidate. So what do we do? Do we secretly recommend that you vote for somebody has that has done a good job for the city? Maybe not necessarily for the community. And what I'm speaking here is definitely my opinion. And sort of my outrage also on what's going on. Somebody who works just a few hours a day he has this type of job that he doesn't need to work all these hours asked me what he can do. And he says he's very interested in working for Kathy Whitmire. In her campaign, and I didn't discourage him, I sort of laid out the facts. And I said, Well, that's great. If you want to get involved in politics, we really need all of our people to get involved in some way if all of our people to get involved we wouldn't be in this predicament. What has happened over the past two years at GPC was a ground grassroots organization, registered voters endorse people with the toughest screening process in the city, most thorough, Fairest, hardest. And it also seemed that there were people who registered to screen but then at last minute cancelled, there was one candidate, one minor candidate that did screen and another candidate running for district see who spoke to the caucus last night minor candidate, however, gay candidate, wherever we come, it seems as though the other

side has learned our tactics at registering voters organizing grassroots level, however, they are bigger than us. They have a lot more money than we do. And they're identifiable people, house wise, conservative people. That's the Moral Majority type of people. So I don't know where we go. We're at the end of the meeting last night, it was basically not a real concern. The the, what the caucus voted on was no endorsement, no recommendations. We will however, encourage our people to go to the polls and vote their conscience. And the mayor will probably win. I don't know. I mean, the polls say she is going to win right now. However, what was brought up was that the referendum registered an awful lot of voters on the other side. And also it should be noted in the referendum that we did exactly what they had asked us what the mayor's office had asked us to do. And we tried very hard to raise money. Things are not working right good now between what's going on with AIDS and what's going on with the Fifth Circuit Court of Appeals and upholding 2106. What really galls me also is that nobody screened. That was a major candidate, not even our own district council person, George graininess seems as though some of these people were scheduled, George Comenius was scheduled service Ernest McGowan. And my understanding that Eleanor tensing was going to screen however, she was out of the country. But there seemed to be an effort downtown of people comparing notes that they decided that it would be best for everybody if nobody would screen that's, of course, my opinion. And from what I've seen, it's going on. Of course, I'm not always abreast of knowing what's going on directly. I don't want to hear the terms. That's my personal opinion. I don't want to hear the terms. Our friends downtown, they're not friends downtown. They're politicians. And they do what is politically what they feel is politically expedient. And right now, it is not politically expedient to be seen that the gay community,

M

Mike Miesch 28:42

one friend of mine, been very upset about the council's vote on the bookstore ordinance, wrote a letter to Tinslet, Grenias, So, McGowan, Hall and Kathy Whitmire and what you're touching on is exactly what he said. Offering principles on the altar of political expediency.

J

Jack Valinski 29:18

Yes, that's absolutely true. I mean, it's politically expedient to vote for a bookstore ordinance.

M

Mike Miesch 29:24

Whereas I really have to agree with Ray Hill. Quiet, that may do other places, more dangerous places that people may go rather than the bookstores and we're talking about our campus to be specific. And you know, they don't see that, you know,

J

Jack Valinski 29:54

smokescreen. So. That's where we stand right now. You're listening to KPFT pacifically used. I guess my final words on the subject in this segment is, how dare they?

O

30:08

This is something that you can do for yourself and for your radio station KPFT. First, do you recognize this sound? That's right. That's the sound of your favorite writing instrument. Do you recognize this one? Yes, that's you writing a check or money order for the amount that you pledged during the last KPFT marathon? What about this one? That's right, you're now putting your check or money order into the postage paid pre addressed envelope that we had KPFT sent to you shortly after you pledged. We at KPFT would like to thank all of the listeners sponsors who pledged their support. But now we need for you to go one step further and pay your pledge as soon as possible. For without listener dollars listener supported radio would not be possible. Oh yes. One more. That's the sound of you mailing your pledge at your local mailbox. Thank you for pledging, and please send your money as soon as possible.

J Jack Valinski 31:12

Good evening. This is Jack Valinski with news of interest for Wilde 'N' Stein listeners for September 18 1985. stories tonight including Houston Chronicle poll on the mayoral election showing that the mayor will not be defeated because of our stance on gay rights and an international look on AIDS. Eight months after an explosive referendum. Mayor Kathy Whitmire support for job protection for gays on a city payroll remains her weakest point. But the results of the Chronicle poll indicate that the gay issue alone will not be enough to defeat her. The gay rights issue is a vulnerable factor in the election. Because the referendum brought out many new voters who can be contacted easily by get out the vote forces mustered by Wittmeyer as principal opponent, former mayor Louis Welsh and the anti gay straight slate of the city council candidates for Wittmeyer. Her support for gays is our single most vulnerable issue, said Richard Murray, the University of Houston professor who conducted the poll at the UNH Public Affairs Research Center. When asked an open ended question about what they like dislike most about Wittmeyer 19% of the poll participants said they did not like her ties to the gay community. In polling terminology. An open ended question is one without a list of possible answers. Wittmeyer is lead among the voters who skipped the referendum and supporters of the gay rights measure. The poll indicated that remains the support of 29% of the poll participants who said they voted against the two measures in January. Among the white voters interviewed in the poll 75% of the anti gay rights voters preferred Welch who was trying to unseat Wittmeyer and regain the office he held from 1964 to 1974. Where he says if the wells camp wants to win, they got to get out her pro gay rights stance more important. Wittmeyer has two successful campaigns for mayor. Gay voters played a high profile in her victories, and she toured gay bars to thank her supporters after the 1983 re election. Since the referendum however, Wittmeyer said that the voters had spoken on the issue, and she has declined further comment. Wittmeyer leads Welsh in a poll by a margin of 46% to 39%. And her strengths among the anti referendum voters is an important element in her lead, Marie said many people are willing to forgive her for her position. Other issues are more important to them. Well, she's got to do more on the gay rights issue if he wants to win in extraordinary turnout in a special election. Houston voters rejected by a four to one margin to Job rights measure that had been approved by city council in June 1984. About 30% of the vote, voters went to the polls Wittmeyer stands the referendum troubles some of her strong supporters, such as one affluent poll participant who likes her honesty and responsibility, but said she took the wrong stance on gay rights among strong row supporters. The major issues includes his values and his moral stance. He stands for the things I stand for said one participant in survey, Murray said Houston is not much different than the rest of the nation. There has been an upsurge in the visibility of gays because the AIDS epidemic, The Rock Hudson case and the fear of AIDS in the schools. Wells camp parent strategies have said that they will not attack Wittmeyer directly on the gay rights issue. But

well, she's already had broadcast television advertisement discussing his family values in his speech last Tuesday. Well as a former Houston Chamber of Commerce President reminded the audience that wit Meyers changed her chambers side called them bigots in the opposition to the referendum. The poll surveyed opinions about 600 registered Houston voters between September 3 and the 10th. Here are some of the results concerning the gay rights in the January 19 referendum. Well, it's received supportive 63% of those poll participants who said they voted against the referendum. wittmeyer has a support of 29% and 8% are undecided. among white Baptists 77% said they support wells, white voters who said they were members of the Church of Christ or Assembly of God support at Walsh net poll by a margin of 80% to 20%. Among the supporters of a referendum, 89% said they support wittmeyer and 10% said they support it Welsh among black voters who represent what my biggest block vote said she received the support about 84% of the poll participants who said they voted against the job rights referendum wittmeyer leads 69% to 22% Among the poll participants who did not vote on January 19. A 29 year old man with AIDS was the first person Britain ordered confined in a hospital under a new anti AIDS Law because he posed the risk to the community. Health officials said the man detained in isolation unit in Mosul Hospital in Manchester suffers from campiness bleeding, but was warned not to leave the hospital. And he had wanted to the magistrate's court in a five minute hearing over the weekend, or did the man continued stay in the hospital for three weeks under a new law which took effect in March, designed to halt the spread of Acquired Immunodeficiency Syndrome. It had not been used before. Health officials acknowledge most AIDS patients pose no risk to the community at large. But Dr. Donald Arvidsson, our government's chief medical officer, so this case the patient posed a risk to the community and himself if he were not detained in the hospital. The patient is unfortunately bleeding obviously from a large number of places and he is very ill he said it was felt that these circumstances it would be risky for him to leave the hospital, Archana. The man has since agreed that it would be best interest for him to stay in the hospital. Dr. Ernest Jones Manchester City Medical officer had told the court in a release from the hospital would be the most dangerous thing. He is reaching to the far corners of the world international health authorities report a total of 15,000 people in 43 countries had acquired immune deficiency syndrome as of August 30, the World Health Organization said of those 13,000 victims we're in the United States where the sexually transmitted virus has taken on epidemic proportions since the disease was first recognized in 1981. From Britain, where the tattooist Federation is turning away homosexual customers to Australia where health officials say aid scare has led to the eviction of some gay tenants from their homes. If you're spreading in many countries, China has banned imports of the blood products which carry the AIDS virus. In the United States. widespread use of the aid screening test has led authorities to declare Americans blood supply free of AIDS in Poland. The health ministry is asking high risk groups homosexuals, drug addicts hemophiliacs to volunteer for tests for the virus. Officials in Tokyo say 1/3 of Japan's hemophiliacs now carry the virus. The average number of AIDS cases in Western Europe and the United States doubled every six months until 1983. And is now doubling every year reports W H O which is headquartered in Geneva, noting the decline in the rate of increase. W H O officials said he hopes the crisis will be over by 1990. I think you'll have a residue of cases you'll have to live with. But it won't be our top priority. Frankly Ashley, Chief of W H. O 's communicable disease Department said people are changing their sexual habits in response to the education drive by governments. There is no cure for AIDS and scientists are not optimistic about the chances of developing a vaccine soon, the fatality rate is close to 50% and is expected to rise. No one is known to have recovered from AIDS in North America, Europe, Australia and Japan ally 70% of the victims are homosexual men, intravenous drug users hemophiliacs and blood transfusion recipients also are at high risk of contracting the virus since it appears to be transmitted through blood semen and probably other body fluids. But the syndrome which strips away the body's ability to fight off infection is not confined to these

groups. In Africa where the virus is believed to have originated, it has been difficult to identify any group of particular risk said Who article Belgium has the highest per capita incidence of AIDS in Western Europe, with 99 cases reported as of August 30 or 8.2 cases for every million residents. Of those 73 victims were from Central Africa, mostly Zaire the rapid spread of AIDS in developing countries took health officials and the public by surprise, a sense of panic combined with a popular misconception about how the virus is contracted has led to prejudice against a major group of victims. Male homeless sexuals when British fireman's union advise its members not to get mouth to mouth resuscitation to suspect suspected homosexuals. A corner refused to perform an autopsy on an AIDS victim in Australia, where 109 AIDS cases have been reported. doctors warned that up to 50,000 people may be carrying the virus diseases considering a leading public health problem in Milan, where 50 of Italy 60 for AIDS cases have been reported. Some medical personnel have refused to treat AIDS patients. Italian Health officials say the W H O is organizing an international research and education campaign against AIDS. In Australia, sperm paint sperm bank donors are checked if they are found to be contaminated, is destroyed. The Australian government has launched a campaign advocating the use of condoms by people with multiple sexual partners, including prostitutes clients, Australia's most populous state, New South Wales plans to find people who know they may have be aids carriers engaged in sex without informing their partners of the risk. Even the Soviet Union where sexual relations between men are illegal and punishable by up to five years in prison. AIDS has been a topic of concern. Although no cases of AIDS have been reported. The director of Moscow's immune oncology Institute has been quoted as saying that immune deficiencies including AIDS is representing an urgent medical problem.

M

Mike Miesch 41:32

Finally,

J

Jack Valinski 41:33

the House subcommittee overseeing research on AIDS has hired an expert on AIDS and you guessed it, none other than the reknown homophobic Paul Cameron. According to the Philadelphia gay news, Representative William Denton, Meyer, Republican of California, senior member of the House Energy and Commerce Subcommittee on Health environmental hired Cameron as a consultant for one month at a fee of \$2,000. Then, in my research, Cameron's expulsion from the American Psychological Association, and the Nebraska Psychological Association was accomplished by people who have abandoned their moral values. Other favorite rallying cries, Cameron regularly announces that all homosexuals should be quarantined to stop the spread of AIDS. Acting on cameras expert advice, Dan Meyer has stated that he will demand that health and human service secretary Margaret Heckler ban all blood and organ donations by gay men so much for overseeing research on AIDS. And that's the news for September 19 1985. Sources include the Houston Post, the US to chronicle, The New York Times, the Philadelphia gay news and gay community news, and for the Wilde 'N' Stein collective and KPFT Pacifica Houston news. I'm Jack Valinski.

W

42:49

Dr. Jeffery Whittington, he was going to give us some information about a study that he's been doing which he is entitled heterosexuality in perspective. And this is the result of years of

research into the feet world of the heterosexual. And he asserted his introduction to it that its purpose is to honestly answer questions about the problem of heterosexuality without making any moral judgments. The first question I feel that I'd like to ask you is are heterosexual sick?

43:21

Well, Lisa, the American Psychiatric Association estimates that four out of every five Americans have some sort of heterosexual experience during adolescence. The APA does not diagnose those who continue such activities into adulthood as neurotic or psychotic, with the exception of those who write books on the female orgasm.

43:40

Is there a genetic cause for heterosexuality?

43:43

No, there's not sufficient evidence to prove that heterosexuality is inherited. However, during the course of extensive interviews with 100 heterosexuals, including the cashier of a Christian Science bookstore, a bouncer at in Atlantic City gambling casino, and a student enrolled in the American bartender school, most admitted that their parents had been heterosexual as to how early

44:06

can can one tell if a person is going to be heterosexual do children manifest signs of heterosexuality?

44:13

Oh, yes, it's been documented that boys who went on to become confirmed heterosexual demonstrated a tendency to demand free surprises, rather than nutrition for their breakfast cereals, and that when questioned about career goals, judge themselves best suited to be cowboys. As girls, heterosexuals were inclined to play with dolls that upon being placed in a sitting position urinated tap water. As for careers, the majority were torn between becoming the first woman president and an airline stewardess.

44:46

Where can we find heterosexuals?

44:49

Well, to some degree, Lisa everywhere. The most popular places to spot them include at Wilco purchasing pom pom makers mathematics and car next one In front of a hidden camera describing the benefits enjoyed by their sheer energy leg, or recounting that their headaches feel like a nuclear accident behind their eyeballs. And as Miss America contestants reporting during the poise competition, that they plan to teach retarded children, how to

45:16

ascending how to heterosexual find each other. What do they meet?

45:20

Well, unlike homosexuals, they do not enjoy the convenience of meeting in the bathroom stalls of bowling alleys for notes written on toilet paper can be easily passed. They are therefore forced to meet in the studio audiences of the Phil Donahue show, or on checkout lines and stores that sell plastic lawn decorations and innovative forms of Home Insulation.

45:41

What a heterosexual say to each other.

45:44

Excuse me, our common icebreaking line is Have you seen the new Susan B Anthony silver dollar yet?

45:51

This is a question I find kind of hard to phrase we do have FCC regulations to deal with here. What do heterosexuals do?

46:01

Well, that varies, but usually one of them plays the woman and the other plays the man.

46:08

Well, did they purposely dress that way? Or can they just not help themselves?

46:13

Well this is most interesting. It's really too simplistic. To place the cause for heterosexual

Well, this is most interesting. It's really too simplistic to place the cause for heterosexual manners of dress at the door of bad taste. There is method in the madness of their raiment, the fabrics artificial and designs unbecoming that they wear are signals that tip off other heterosexual males. For instance, when a man sees a woman sporting such Clews plastic rain hat or an Avon organized and personal 23 Safar features, he knows he will not be wasting his time asking her a CC in the new Susan B. Anthony silver dollar. On the other hand, when a woman sees a man wearing socks, that are color coordinated with the piping on the lapels of his leisure suit, he knows he is a member of the heterosexual subculture. Unfortunately, the rest of us must suffer have true

47:04

there's a common belief that there are certain occupations and fields of interest that Heterosexuals are kind of located in, they're kind of all fused into that little area. For instance, take interior decorating now do heterosexuals make better interior designers?

47:21

This is difficult to answer since heterosexual is rarely allow guests to wander past their kitchens, where they're served choices from General Foods international line of coffees and which they may be encouraged to spill on the Congoleum. If one is daring, however, while one's heterosexual host or hostess is busy at the door with a Jehovah's Witness, wanting to sneak into the living room for a peek at some of the last remaining examples of shag carpeting.

47:47

What about cooking I understand that they cook better now. Is

47:50

that true? Well Lisa, this is almost impossible to answer. heterosexuals don't actually cook in the traditional sense. They merely heat things up.

47:59

I see we got them on that one. What about hobbies now? Did they enjoy certain hobbies?

48:07

Yes, reading is becoming quite popular among heterosexuals. Women tend to enjoy magazine articles with titles like graphing your orgasms, understanding nuclear fission, and what Bonnie Franklin faces now. Men appreciate books like The portable Henry Kissinger, the Jimmy Breslin, how to book and the Encyclopedia of electrical wiring.

48:29

Intersections gravitate towards certain professions in the local laws.

48:34

Well, while they can be found in nearly every profession, the majority of heterosexual seem to be attracted to the sciences. They are generally acknowledged as responsible for these inventions, the message unit, the wire clothes hanger and the duty loom.

48:49

What are the things that I think most homosexuals are most concerned with? When they consider heterosexual as this is children and and the big issue now really is in protecting children and what I think that our listeners here in Houston would be wanting to know is if heterosexuals molest more children than homosexuals.

49:10

Yes, Lisa. Even the casual observer will notice that heterosexuals especially parents spend a suspiciously large portion of time around children. These assaults are often blamed on the hostility that results from hearing the Bugs Bunny see and say talking phone repeat the same 10 messages endlessly from the child hiding under the dining room table after being asked to perform for at least for relatives when a fortune has been spent on the employment of a piano teacher, or from discovering that a child has invited neighborhood friends to a tea party and serve them liquid plumber

49:45

was bearing all this in mind. Should heterosexuals teach schools?

49:49

This question is open to debate. But after all, wants to prevent Mr. Define Oh from copying a field while he explains to Mary Sue Hurley why she has dropped from a gold to a green star. are in penmanship. And what's to stop Miss Gessen daughter from trying to initiate a satisfying emotional and sexual relationship with any one of a number of boys in her kindergarten class. Recently, the controversy has shifted its focus. Considering the reading level of the average high school graduate, the question has become less a matter of whether or not heterosexual should teach. The question now is whether or not they can.

50:24

Yes, I would tend to agree. Well, I think the next question is a little bit hairier, but we'll get on to

it. Hopefully nobody will be offended is the rate of venereal disease higher among heterosexuals and homosexuals.

50:40

The rate is about the same for both groups. However, the rate of hyperglycemia is rampant among heterosexual officials say that it is reaching epidemic proportions in suburban areas of the country.

50:52

We're almost out of time. But there is one last question that I know that all our KPFT people are waiting to have answered with bated breath. And that is, Can heterosexuals be

51:03

cured? Well, I'm glad you asked this, Lisa. Oddly enough, many heterosexual say that they are perfectly happy as they are and do not wish to be cured. My word for it psychiatrist see this is merely a show of bravado that heterosexuals must demonstrate, since they believe that they have no hope of changing. Until recently many heterosexuals have not even sought help having decided that their sexual orientation was something with which they would have to struggle through life like a birthmark or a clubfoot. But today, thanks to new techniques that have been developed by dedicated sexologist that heterosexual now has the chance of becoming a well adjusted and happy homosexual.

51:47

Thank you, Dr. Winnington. For those of you who have just listened to this and wonder what you just heard, this is not a real interview, and we would like to give credit where credit is due. And this is a piece which we found in the slick New York gay magazine, Christopher Street. And it was written by Richard Fidel. And it was an essay which appeared in the February issue and this is not Dr. Jeffrey Whittington, and I've just interviewed on

Mike Miesch 52:17

rooster and that's a piece from 1980 that Lisa pen and Ruth star did from Christopher straight and it's one of those occasions where they had this piece prepared and it was didn't have time for it didn't have time for it and they had the time to rehearse it for a month before they did it. And I wanted to play this during marathon something upbeat and funny, so I'm glad we had the chance to do it tonight.

Jack Valinski 53:05

Is that making too much of a cute, rather innocent little photo session? Look further into the

July issue. There's a feature article by Roy Blount Jr, titled What makes a woman sexy. The most revealing evidence of the new GQ mindset however, was tough guys do dance, a real man's workout. author William acento writes about straight guys who take dance lessons to stay in shape. macho guys with boring chest are confounding the stereotype that dance is for sissies although the stigma does not easily rate late to rest, a bit startling to read about the stigma of cityhood in GQ magazine who sensibility many people have always assumed to be gay if quantity it was a magazine that fascist conscious homosexuals bought regularly in the belief that it was admitted. However conversely at them

53:52

that's so much muscle. So much wrong.

J Jack Valinski 54:01

People have it all. What's happened is that GQ has made a concerted, deliberate attempt to shed its image of a gay fashion magazine. Now the heterosexual men have decided it's okay to be fashionable. The magazine is aggressively courting a larger potential more lucrative straight market. That's my impression that GQ has a significant gay audience. And that's something that they have profited from said New York Times business reporter Richard Stevenson, there's a popular mythology that gay men are more fascist conscious, and advertisers tend to believe the myth, but now men in general have become more aware of fashion. And in response to that the men's fashion magazine is trying to broaden their appeal. New Approach with its focus on feature articles that are often explicitly aimed at straight men, and the near total elimination of gay suggested visuals appear to be paying off. According to The New York Times 1985 article. GQ is best year in night since 1957. At the end of last year circulation was 650,000 up for 200,000 from five years ago.

55:03

It's something that I know about. It's something that I can't understand about a magazine man.

55:13

Magazine man magazine

55:19

makes me feel so inadequate. I pray that you view you

J Jack Valinski 55:25

advertising, not paid circulation is a source of profits for most magazines, being closely identified with gays was seen as a barrier to the magazines economic growth. But this

contradicts everything we've heard about the gay market, which is supposed to be a goldmine for advertisers, gay man and his said, are sophisticated consumers with lots of discretionary income. Why should any advertiser not want to trap the gay market? The Happy myth of gay dollars overlooks the fact that gay men no matter how influence constitutes only a fraction of the entire market for the products and services advertised in GQ. Moreover, the well heeled gay men is a minority within a minority. Most advertisers are eager to take a dollars, but they'd rather not make an explicit pitch for them, which might alienate it more numerous stray consumers, you'll never

56:16

have a family to call him. He died by age 33.

J Jack Valinski 56:27

With straight men took little interest in how they looked. Fashion was almost exclusively a gay preoccupation. GQ. No one happy with its image as a gay magazine knew where its bread was buttered, and was careful not to eliminate its readership. But because homosexuality remains a touchy subject with advertisers and the straight public. GQ also avoided hurting courting gays to explicitly in the 70s Gay sensibility exerted a strong if suggested influence on the dominant straight culture, apparently of innovations, encompassing music, dance styles, attitudes towards sex and relationship, gym workouts, grooming and fashion crossed over from the gay to straight society via the mass media and the marketplace.

57:11

Know about something you can understand about magazine man

57:20

magazine man magazine.

57:26

He makes me feel so inadequate apery that you are not straight

J Jack Valinski 57:33

men have adopted styles and attitudes originated by gays. A magazine like GQ can afford to heterosexual eyes itself. But 80% of GQ is male readership that is single is a wildcard doubtless substantial number of these readers are gay. Probably many of them will continue to look at GQ for their fashion and grooming information, particularly those with a weak or not existing commitment to the gay community. Others however, might decide that they don't need a magazine that deplores the stigma of cityhood.

58:02

Magazine man. Magazine man, you know

58:12

makes me feel so inadequate, free that you feel you

Jack Valinski 58:18

appreciating came from the advocate, dated September 17 1985. In an article entitled, those GQ hate gay men, by George D Steph marrow, and for the Wilde 'N' Stein collective on Jack Valinski.

58:31

Mad Magazine man GQ magazine Mad, Mad Mad Mad Magazine man magazine is a magazine Mad Magazine Mad Magazine magazine.

Jack Valinski 59:00

Music came from an album called New by a local group out apparel and called the Judy's.

Mike Miesch 59:05

And that's our most recent release. And about recent releases. I've just got so much that I want to share but I want to mention in the future I'll be doing feature on Tom Wilson's 10% review, which is really exciting. Not singer that I recently introduced myself to tape distributed by Midwest Music dot John Buccino tape from dinosaur records on the arrow. John has been touring the US as accompanist for Ronnie Gilbert. And he's got his own recording out now. And I really like his voice and say humor and lyrics and so we'll hear three cuts from the first side. You're so blase, what you're looking for and on Arrow

Jack Valinski 1:00:08

Rock Hudson makes his first public statement about AIDS. During a fundraiser tonight. I regret the circumstances in which we all are aware of that prevent me from being with you tonight. People have told me that this disclosure about his aides has helped to make this evening an immediate sell out. I've also been told my own situation has brought enormous international attention to the gravity of this disease, and is leading to more research more contributions of funds and better understanding of this disease. I am not happy that I am sick. I'm not happy that I have AIDS. But if that is helping others I can at least know that my own misfortune has

led to some positive worth. Burt Lancaster will agree Hudson's message at the Advent expected to raise about \$1 million Lancaster will introduce be introduced by Linda Evans who plays opposite Hudson in ABC dynasty last season. Hudson's romantic scenes with Evans including kisses led to the fear of Hollywood backlash against homosexual performers because of the disease. Suddenly, after years of being discussed and whispers behind closed doors, the plight of AIDS patients is gaining attention from the rich, famous and influential. In fact, tonight's commitment for AIDS benefit for the AIDS Project Los Angeles brings together as many celebrities as the Academy Awards. Elizabeth Taylor and Burt Reynolds will auction artworks donated by Andy Warhol. Betty Ford will receive the first commitment for what to Life Award, Marlo Thomas and Phil down and you will be among the host along with Shirley MacLaine and Burke Lancaster and there will be performances by Cyndi Lauper, Rod Stewart, Cal brunette and Sammy Davis Jr. Thanks to rock Hudson's public admission to his aides and the storyline up assault celebrities, the popular rent had to be removed to move to the Bonneville hotel to accommodate 2400 patrons paying anywhere from 250 to \$500 a seat the waiting list has been cut off after for 300 names. We've done some big exciting events like Ghostbusters premiere and motel TV special but we've never seen anything take off plus like this, said Lucy Paul check events unlimited which is handling the logistics. However, the more serious purpose of the event hasn't been lost in the glitter. Many people who sit in a \$500 tickets after the event was sold out told the people to keep the money anyway. And then it has become the focus of news reports on Hollywood and aids are the two major programs. Syndicated talk show host Donnie was taping a Donahue program in Los Angeles today. The show Hollywood homophily and aids will feature an actor with this disease. And Steve uncouples Nightline tackles a similar subject and ABC tonight at 1130. Eastern which is 1030 Central Time. At press time guests have not been confirmed. Celebrities will off often rally to causes but this is one of particularly emotional for them. They don't get using their name will help defuse the panic and they lessen the threat to the gate black lash in the entertainment field. That's was in USA Today. And hopefully tonight, we will be able to take some of that off the satellites or someone in Los Angeles will be able to tape it for us and we will be able to Prince present some of this next week. Also in the tradition of Live Aid for African famine in Farm Aid for US farmers, rock groups will play aid for AIDS in March at Los Angeles Coliseum. The concert will be taped, televised nationwide. Representative Gary Studds democratic mass Massachusetts the first congressman to say that he is gay is speaking out \$100 plate dinner October 12 in Chicago for the city's Howard brown medical clinic clinic number of things going on right now. USA Today also has a half page in the life section on page six, question and answers about what is AIDS. What is a it's Acquired Immune Deficiency Syndrome is a disease that slowly destroys the body's immune system, leaving its victims extremely vulnerable to infections that one or other forms of cancer. What causes it a virus HTLV three human T cell leukemia virus? How contagious is it? The AIDS virus is not spread like a common cold or flu. But it is a found in saliva, tears and other body fluids. But the evidence strongly indicates that AIDS is transmitted only when a person is exposed to direct and large doses of the virus through blood or semen. What means can you get? Does that mean you can't get it from kissing or sharing food with an infected person or such contact? Doctors can't rule out such things completely. But there is no evidence that AIDS is spread this way and the chances appear very slim. What about mosquitoes? Can they spread it? There is no evidence that they can spread virus but studies are going on. How is AIDS mostly spread? The vast majority of people who have AIDS were exposed to the virus to sexual intercourse with someone who has been infected. More than half the cases may be specifically through anal intercourse. Can women get AIDS? Yes, 857 women have AIDS about 1% of all victims. They can get it through vagina or annual sex with infected men or from sharing Dural needles during drug usage. What is the best way to avoid exposure? Avoid sexual contact with anyone who may be at higher risk that includes gay man or bisexual men, IV drug users and prostitutes. The more sexual partners you have, the higher the risk can run. Consult your local health

authorities about safe sex practices. How have children gotten AIDS 80% of the 167 AIDS victims under the age 16 acquired disease at birth from infected mothers mothers 20% were infected through blood products. None have contracted the disease from contact with another person. In such cases such contact casual contact as occurred with classroom is very unlikely to spread the virus. Our blood transfusions now safe. Yes, the blood is now tested by it for the HTLV three virus infected infected blood is discarded. Who should get the HTLV blood test? People who think they may have been exposed to the virus can get it through their doctors are one of several 100 clinics around the USA. If you have the virus when you get AIDS, it has been estimated that about 1 million people in the USA have been exposed. But no one knows how many will actually develop disease. estimates range from five to 30%. It is uncommon for people to be carriers of the virus and never get. It is not uncommon for people who are carriers of the virus and never get the disease it causes.

M

Mike Miesch 1:06:48

A new book to come out which was put out in 1984 by Jacque linguish, who is one of the leading AI researchers in the world. Some of you if you're lucky enough heard him speak on NPR press club a few months ago. Well, the book has been recently translated into English by Richard Howard, a writer translator. And this book is well, it's called and it is a Hirak behind the scenes account of international medical investigation of Acquired Immune Deficiency Syndrome, AIDS and it in very detailed questions as well as answers, answers a great number of questions on AIDS, including the history of AIDS and Karpaty sarcoma, which is one of the I believe it was discovered like 100 years ago. So carpal osteosarcoma and AIDS is really not an new disease. Unfortunately, it's a new play.

J

Jack Valinski 1:08:09

Tim, a person from the Midwest parents would allow him to come home during vacation unless he agreed to use disposable plates and cutlery just in case he had AIDS. You via we must believe in ourselves way other way only ourselves in our community to believe in. Especially when our parents and many of our relatives don't want to deal with us don't want to try to understand. So we have to make the effort to do it ourselves. And that's why we built a community. We have these organizations. But these organizations are only as strong as the people who support them. And remember, we have nobody to blame for our play for ourselves, right.

M

Mike Miesch 1:09:04

This week, has been just a real roller coaster. It's been rather exciting like at work Monday and she's down had wanted to put up a new sign at Wilde 'n' Stein Books, Wilde 'n' Stein Books and walk in peer counseling and coffee shop. And that some rather interesting experiences there and receiving Tom Wilson's new recording which is just really exciting. That's an incredibly beautiful song on that album called home which Tom Wilson joins in with Elliot pill Shaw Harmon nicely on the song and it's extremely beautiful and babble make it cry, laugh and say we just have so much coming up on the program next week.

J Jack Valinski 1:09:54

One of the things we haven't talked about a kiss of the Spider Woman.

M Mike Miesch 1:09:57

Oh yeah,

J Jack Valinski 1:09:58

a movie showing at the gallery. Lower Level Galleria lower level. William Hurt is starring in it playing a gay man in some South American or Central American country right fictitious country exact and he is a prisoner there for molesting a well

M Mike Miesch 1:10:16

not Well, that's corrupting the variety charge dropped into minor and Ral Giulia as Luis went no bad into revolutionary activists, rock journalist, and it's

J Jack Valinski 1:10:38

a wonderful story it's hard to story because they keep flashing back and telling a story about a movie. And it basically takes place in a prison cell. But it that may sound like a very boring premise, but they keep flashing to Oh scenes from a movie or being outside the prison. And it is wonderfully done. William Hurt plays an excellent role. And it definitely is a four lambda movie.

M Mike Miesch 1:11:00

And it's I recently was told that it moved from lower level Galleria to the upper level theaters for some reason or another. So if you go down by the skating rink, it's not there. It's

J Jack Valinski 1:11:14

upstairs and yeah. So if you do have a chance, please see it's an excellent movie. And we do recommend it very highly, very good movie. Also next Thursday, between eight and 10pm. Course nobody comes early, because they're all listening to the Wilde 'N' Stein show is Deborah Danburg's almost always annual birthday party politics and dancing is at the Metropole. It's a fundraiser for Deborah there is a charge at the door for a donation and dress business to bizarre typical Deborah Danburg Abdur dherbs cash bar. And of course there are sponsorships available if you're interested in call five to 280875228087. If you want some more information at the Metropole, which is at 1007 wall at West Dallas, next Thursday evening, and coming up in November, public television channel eight in Houston will be showing the times of Harvey Milk at 9pm to 1030. And of course we're going to talk about this a lot. Today Tonight tomorrow is the

M

Mike Miesch 1:12:19

production of the group's one by Jeff Hagedorn with Ken Johnson as a person with AIDS directed by Joe watts. And I don't see how they can not but have success with this production. And I have to go to it tomorrow night. And it's also playing Saturday night. For more information. 5222204 was the number again 222204.

J

Jack Valinski 1:12:47

Okay, and next week, we will have an interview with the some people from executes justice.

M

Mike Miesch 1:12:54

I was that taper live. It's going to be live wonderful at 8pm.

J

Jack Valinski 1:12:58

And of course we start at 730. Now, so we hope to have parts of the gala tonight in Los Angeles. And we'll do that the week after that on the third of September. And you also plan to replay your Bill Scott interview. Yes. So we have a number of things coming up and things happening in the theatre community. And of course, we'll be talking about the race for mayor in the future. And probably all the way up to the fifth of November. Maybe we should invite her on the show.

M

Mike Miesch 1:13:24

Oh, wouldn't that be nice if she had come by and pay us a visit? Okay, well,

J

Jack Valinski 1:13:28

I think I'll call City Hall and see if they'd be interested in doing an interview with the Wilde 'N' Stein show with about the gay community. But it's really up to up to whether she values us at all, really. And we will probably have an independent candidate for district C, talk to us about running for council person. And, you know, it's political season right now, if you do want to volunteer, it would be nice if you told these people that you volunteer at their campaign headquarters that you are gay,

M

Mike Miesch 1:13:56

or you have until October 5 to register to vote.

J Jack Valinski 1:14:01

And if you're interested in registering and if you don't go to one of the favorite bars, you can call downtown at two to 419 19 and they will send you a card postage free.

M Mike Miesch 1:14:10

Now there are voter registration cards that KPFT and Wilde 'n' Stein Books just to name a few places in the area.

J Jack Valinski 1:14:16

And thank you very much for donating KPFT making this program possible. We appreciate it. We'll be back next week.

∅ 1:14:24

To come out of town. It was hard believe in my

J Jack Valinski 1:14:32

and for this week. That's the Wilde 'N' Stein show. Please join Mike Miesch myself, Jack Valinski next Thursday at 7:30pm for another edition of a Wilde 'N' Stein program. This programs aim is to discuss the issues of Houston's gay community. Comments can be sent to the Wilde 'N' Stein collective care of KPFT radio 419 Lovett, Houston 77006 For more information on the aspects of the gay community called the Gay Switchboard at five to nine 3211

∅ 1:15:01
