We have our little quick we're gonna whip through a quick top 10 list so that we can explain to you our science editors. Oh, have something for this week. Okay, so here we go. Our little top 10 list. These are a continuation of how you might know that you just might be gay. Oh, okay. And we've been doing this. We started this a number of weeks ago, especially in honor of our hatchlings that are coming out parties that they you know, and some people don't need or hidden around the closet and in honor of Harvey Milk steaming or whatever you just Harvey man. No, not Harvey Milk. Yeah, Harvey Milk. Okay, the play I saw the play two was really good. Number one was the opportunity. Okay, here it is our top 10 list and how you might know if your game number one

P Peter 01:55

gay. And if you've ever said look at that tits on her and there were no women anywhere in sight. Well you just might be

02:07

irregular toss the salad and involves no greenery or vegetable of any kind of honey might be gay.

P Peter 02:18

Your thoughts valid Myrna more than you maybe you got there and I'm so shine retiring. If if at the gym you spend more time in the shower than on the Stairmaster well, then you just might be

02:35

okay

02:38

let's see if two if two you the atomium for no is fabulous than honey you might be getting Anthony

04:18

know a lot of people Walmart

P

Peter 04:22

Oh yeah. And

O

04:23

you know there's you know the one out off of Westheimer paths gallery is not 24 hours just fabulous. Yeah, no but you know if you have insomnia or something and you know it's a good place to go

P

Peter 04:38

I had a friend I used to take care of all night Walmart's there's one out of 290 and 34. Somewhere out in that area. We're out there but we stick it czar at

O

04:47

three in the morning. Oh

P

Peter 04:48

god. This doors. Everybody in there had like teeth missing

O

04:59

me Do you feel right at home? And they were all the ones in the blue smile?

P

Peter 05:05

Could you help me? Well, I don't think

O

05:08

there's a lot of things you can do at the Walmart shop. Oh, yes, there are, you know, you can set all the alarm clocks to go off at 10 minute intervals throughout the day. Wouldn't that be a fun thing? You can challenge other customers to duels with tubes of gift wrap?

P

Peter 05:29

What else could you do at three in the morning? Well, yeah.

05:31

Now for especially for people in Montreux, what we would do, we'd go in there, and we would redress the mannequins as we see fit. Yes, DMS

05:40

accessorizing. Yes. And you know, they don't do it. Look

Peter 05:44

for cute stuff boys to take to the back.

05:49

That's kind of up your alley, I guess,

05:51

would be up his alley.

Peter 05:54

I'm not going there. While it beats having to deal with wrapping paper, I'd rather do that.

06:02

Or you can walk up to an employee and tell him in a very official tone, you have no teeth. In a very official tell, I think we've got a code three and housewares and see what happens. Is these codes three things you know you're here though.

06:23

Okay, can it being an accident?

06:30

You can you can ask yourself loud enough for everybody to hear who buys this crap anyway.

06:41

You could test the fishing rods and see what you can catch from the other aisles.

 P Peter 06:47

Fly fishing to get the ball on you. And you're like,

 06:57

damn, I thought I kind of kept this

 06:59

fun thing you can do is go to the auto department and practice your Madonna look with various funnels

 07:10

they got from small, medium, or large.

 P Peter 07:14

You know some fun things you can do. I think that's where Thumper Knight just recently, well, we we have our we haven't heard from our science editors in quite some time. But they write you well. They've been busy doing other things. Well, and as a matter of fact, they've been busy doing a couple of things, you know, they sent. I was just looking here in our latest now I'm holding this up for you to see I can see it. There it is. This is the weekly world news of December 1 edition. Well,

 07:48

the Men in Black got all that their stuff from from next. Well, hey, you know,

 P Peter 07:52

and there's interesting things in here about doctors giving direct shots of booze into somebody's heart and saving them. There's 30 of those. And it was done here in Houston. And so anyway, our science editors brought this in, and there's just a load of things. So one of them was about that since John Glenn made his fabulous entry. It says here that the Pope is going to blast off in 1999 that he wants to bring in. I don't have a clue. But it says here, Senator John Glenn, may have been the first senior citizen in outer space, but he won't be the last Pope John

Paul to is lobbying to fly on the next shuttle at the ripe old age of 78. I don't have a clue where this articles go. But it's a whole big four column. Oh, God, he will be one giant step closer to Heaven. He certainly will be nice, and we got there early. But anyway,

08:46

the British IV room now. So

Peter 08:49

our science centers have a huge big column on that. But they also have done some other things. They've been doing a lot of stuff on gene therapies and things. So they've been very well, you know, one thing they've learned is that all babies start out with the same number of Ra cells, which over nine months develop into a complete female baby. Oh, okay, that's true. Okay. The problem occurs when the cells are instructed by the little chromosomes to make a male baby instead. Oh, we have probably, because there are only so many cells to go around, the cells necessary to develop the males reproductive organ have to come from cells already assigned elsewhere in the female. And so recent tasks have shown that these cells are removed from the communication center of the brain. So and they migrate lower into the body and develop into the male sex organ, right? Yeah, that's right. Yeah, because that's all babies are female, and then they go, Oh, it's time to be a male and so they draw cells from the communication center of the brain to the male. So if you visualize a normal brain to be similar to a full deck of cards, This means that males are born with a few cards short, so to speak. And some of their cards are in their shorts, so to speak. And this difference between the male and the female brain sort of manifests itself in various ways. Now, our science department has been working very hard to come up with this, so I want you to pay very close attention. Little girls will tend to play with things like house and learn to read and little boys, however, will tend to do things like whole placing a bucket over their head and running into walls. A little girls will think about doing things before taking any action and little boys will just punch or kick something to death and look surprised if someone asked him why they punched a little brother, who was half asleep and looking the other way. The basic cognitive difference continues to grow until puberty, when the hormones kick into action, and the trouble really begins. after puberty, not only the size of the male and the female brains differ, but the center of thought also differs. Women think with their heads, males thought, male thought often originates lower in their bodies, where their x brain cells reside. I see of course, the size of this problem varies from man to man. We all know that, in some man only a small number of brain cells migrate and they are left with near full mental capacity. But then they tend to be rather dull, sexually speaking, man are known in medical terms as Republicans. This is our scientific editors. Other men suffered large brain cell relocations large brains are located and these men are medically referred to as Democrats. And a small number of men suffer massive brain cell migration to their groins these men are for are usually referred to as Mr. President.

Yeah, she's gonna be 40 this year. It's hard to believe in 1999 Barbie will be 40 just in time to greet the new century. And they've been forecast but you haven't? Oh, yes. The greeting century is a little older and she has 40 Rich years. She began as a glamorous airline stewardess when she was introduced as Toy Fair in in 1959. She soared into space as an astronaut in 74. She ran for president in 92 and 97. She bore disability bravely by folding her first ever bend legs into a little wheelchair and became the role model for the that particular market. So in every incarnation nationally, and she is in every skin tone, she's Yes, she's perfectly turned out with accessories galore at her long, slender little fingertips. And every woman she's a Cosmo girl, she has it all. So what will Mattel think of next, as the company meets the challenge of Barbie turning 40 Well, we

 32:33 have a few thoughts. Well, we got to make them quick.

P Peter 32:36

We'll make them very quick. How about a hot flash Barbie? Yeah, press Barbie's little belly button and watch her face turned beet red and tiny little drops of perspiration appear on her forehead. And with her handheld fan and little tiny tissues. She comes prepared. I see about the facial hair Barbie. Oh, as Barbies hormone level shifts. So she gets a little older. You see her little whiskers grow. And she's available with tiny little tweezers and a magnifying mirror. Oh, that's nice. And then we have the midlife crisis Barbie. And it's time to ditch Ken Barbie needs a new change. And Bruce, her personal trainer is just what the doctor ordered along with some Prozac, I say and there'll be hopping in her new little red Miata and heading for Napa Valley to open a b&b. And this comes with a little tape recording of breaking up is hard to do.

Every cliche

and we thought maybe the single mother Barbie Yeah, since you know. There's not much time for primping anymore Ken's shacked up with the Swedish up her dream house and Barbies across town with Babs and Ken Jr. In a fourth floor Walker and Barbie selling off her old gowns and accessories to raise rent for money and it comes complete with the garage sale kit. Today and last but not least, tell me what to choose the recovery Barbie? Yes to many parties have finally caught up with the ultimate party girl. And now she does 12 steps instead of dance steps. clean and sober. She's going to meetings religiously and comes with a little copy of the big book and a six pack of Diet Coke. And new Barbie Jennifer

Peter and Laci later in life. Thank you. Thank you. Thank you. Well, thank you. Next month it'll be kind of the between Christmas and New Year's show. I guess.

P Peter 34:33

I don't know when the fourth I have no and I don't know how many Saturdays there are. And it's way too early 100 Saturdays. Anyway,

34:42

but that, shouldn't you that you should count because you know why? Why? Because as you get older,

P Peter 34:48

you have to keep your brain stimulated. That's it. Well, I'd really stimulate something else. So let's go do that dyslexia.

34:55

Thank you. Thank you. Bye, guys. We'll see I'll say love you Houston.

34:59

And now it's time for after hours news with big Roy and Michelle.

35:12

Hi, Ron. Good evening, Michelle. How are you? Pretty good. I'd like to welcome all of our listeners to this week's edition of KPFT that browses news with Michelle and myself.

35:23

Oh, yeah. How was your Thanksgiving?

35:26

Oh, much to eat too much to eat.

35:29

Oh, I think everybody does that. Last night. I went out to dinner actually. Oh, yeah, Japanese food. What a change of pace from Turkey.

35:39

Let's see, on Thanksgiving Day, I had Turkey had roast beef. Goes

35:49

venison, oh, you ate a lot of different things. I eat turkey, starting at one o'clock, and then at six o'clock, and then again at 12 o'clock. And then at three o'clock in the morning, four o'clock in the morning. And then for breakfast. So finding on Friday effects, we had so much Turkey that we went out and had Japanese food. And before we get started, I'd like to say a special hello to prudence and and Michael, who are listening to us on ke OS at 9.1 in College Station. Yeah.

36:22

And I'd like to say hello to Tony up there midway and to Randy out there in Beaumont.

36:28

Okay, now we finally got all the papers all straightened out. And so

36:33

yes, that's what we're doing. We're doing some filler here. So I'm carousel together. Okay, like to start off with beginning January 1. The state health department is mandating that people who test positive for the HIV virus, their names will be reported to the state health department. And because they are keeping track, however, and this is very important for people to remember, this is not an excuse to not get yourself tested. Because they are very serious about the confidentiality of this list. Okay, a violation of that is a Class A misdemeanor, that's high up on the list. Right. And that means that they could do up to a year in jail.

R

Roy 37:22

You won't get to do that you're in prison. You have to do a year in jail. And that is worse than doing it in prison out. Yeah. And means with our jail overcrowding situation means more than likely, you got to spend at least six months sleeping on the concrete floor.

♂

37:42

Wow, that's, I mean, that's the kind of thing you've got to do. If you've got to have names associated with the HIV test, you've got to have some way of keeping it secure. Anyways,

♂

37:55

if you want more information on the rule, as well as information about the testing change, that can be found at the worldwide web dot t d h.state.texas.us/hiv. Std. Doc.

♂

38:14

Okay. I mean, let me give that again. That's www.td H, that stay that T x, third, U S, backslash HIV, STD. So just think of Texas Department of Health state of Texas, US HIV, sexually transmitted diseases. That's what all that stands for. That's a very good way to get the information and to get it confidentially. So

♂

38:46

like I said, this new rule goes into effect January 1. However, the names are being strictly guarded, and there's very stiff penalties for violations of it. Okay.

♂

39:02

This is the beginning of the World AIDS Day, this coming week. So we're going to talk about that a lot tonight. Next week, we'll talk about all the Christmas stuff, but I'm sure Jimmy has a bunch of Christmas stuff he wants to mention because he likes to get into the season early, but they're gonna start off at the end sample theater with a ceremony of remembrance.

M

Michelle Meyers 39:30

And that's a 10am an honor of all the artists who have died as a result of AIDS. Sheila Jackson, the deputy Hamburg city council, person and his Parker are all going to be there. So that's, that's kind of like the starting of it. And the Ensemble Theater is located at 3535 Main Street.

39:53

So that's 10:30am. That's the big start. And as was mentioned, For later in the evening at 630 there will be a tree of remembrance ceremony at the Metropolitan multi Service Center at 1475 West grey. So they're going to be a couple of Christmas piece here and anyone. Everyone is invited to come and you can attach an ornament to the tree. The third one I want him to mention
