## SUMMARY KEYWORDS

leather, patrol, sexual harassment, heard, valedictorian, good, play, melissa etheridge, give, qm, supervisor, glenda, treatment, josie, laymen, requested, queer, horse, night, call

## SPEAKERS

Jimmy Carper

---

00:02

Whoo pretty song pretty song by Mark almond.

00:05

And that's one of my favorite songs that you play on the QM.

00:08

Thank you and we're still in quick Q MC people keep calling up and they they are requested in that queer music and we're gonna play it baby

00:15

as long as you want it. We've got it and Sandy I have to no no, no, no, teddy bear. I have to apologize. We don't have the song you requested but we're going to play you another one. Melissa Etheridge like the way I do to Sandy from her teddy bear.

00:37

Huh, god damn that woman rocks. Melissa Etheridge. And let's see we're about to close out the QM z we didn't have low I didn't bring my Laurie Anderson. But let's see. Glenda to Glenda from surely. Some pansy division kinda surprised would have expected horse they didn't get requested this week, first week and a couple of months. But hey, to Glenda from surely rock and roll queer bar.

01:16

And we're back. Thank you Jimmy.

01:18

You bet. I love playing queer music.

01:23

Now the criteria for queer music is that in the QMZ. Queer music so the performers must be

01:33

openly gay, lesbian, bisexual or transgendered.

01:39

And that's

01:39

what I've got a question where does Frank Zappa fit in and now?

01:46

Well, he could fit a number of places, I'm sure. Does anybody remember? Frank Zappa and the mothers who invented it? Yeah. They had a couple of couple of tunes I

02:03

yellow snow.

02:05

Yeah, they had a couple of tunes.

02:07

Hard to believe that guy was valedictorian, his class at Juilliard.

02:12

Oh, my God. Oh, my God. Yeah. And his, his, his daughter is now an actress and

02:23

now his son.

02:25

Let's say it's Moon Unit, weasel? Dweezil. And he was valedictorian of junior at Juilliard. Oh, my God. Wow, the 60s produced many strange and wonderful things of which I belong to the group.

02:41

So we're not valedictorian at Juilliard

02:43

now. But, and I'm not a Dweezil either.

02:51

Weasel or devil.

02:53

I'm evil. That's evil, when as opposed to clever learn, as opposed to,

03:01

I really think you need to get the two of you in here. together some that's

03:04

a scary thought. Scary, scary, scary.

03:08

And do it as a call in because I'm sure a lot of your listeners would love to get a hold of her about things she has said in her column.

03:15

Oh my god. She has some dirt. I did not say thank you. And I need to say thank you, Rick, from Q patrol called in. Thank you. Thank you. Thank you. Yes, yeah, I did talk about him calling in but I didn't say Thank you, Rick. I appreciate it. And to all the Q patrollers out there, they should have probably just about finished up with their shifts. And it was a pretty quiet night in the Montrose. They said that they had a few strangers lurking about and lots of us out in the streets. But apparently it was a pretty quiet night. As far as they're concerned. They do a lot in our community. They walk in patrols, they also have wheeled patrols, where they ride around the neighborhood looking for trouble and trying to keep trouble out of our neighborhood. And we really appreciate them if you have just a few hours a month. Even if it's only two or three hours a month they're looking at alternative scheduling. I understand. You can call Q patrol and volunteer. Get your pens ready and I'll give you the number in a minute. Let's see we still have with us, Josie and Stacy and it's been it's been really fun doing the show with them. I like having them around. If your pens are ready Q patrol 8718519 Join Q patrol they really need the help. Well, what you guys got going on over there?

04:58

I was just thinking if it's a quiet night Q Patrol. It's been a safe night, which is always good.

05:03

That's always good. It is. I have volunteered for q patrol. I am ashamed to admit that I just haven't been able to give it the time it deserves I go out when I can.

05:17

Because I make her bring her ass down here. That's why

05:23

Yeah, and Friday nights are hard. I work on Saturday morning and then come up to the station till the wee hours of Saturday night. So Sunday morning. Oh my god. You know, I was reading something I'm trying to find it I was reading something about this weird experimental thing that they've got going on for HIV that apparently, the bait basically it basically what it was, thank you. Scorpio bottoms are wonderful. They organize you and

06:00

they'll work their chest.

06:03

Oh, wow. There's a new AIDS treatment that I found interesting.

06:10

Tell me about it, I need to know, the government

06:13

wiring mind firing mining stuff, the government is allowing 30 AIDS patients into a controversial experiment where they they take their blood and heat it up to 114 degrees, put it back in the patient's body until the body temperature rises to 107.6. And it says that six Americans in similar trials have survived in the scary, they have survived the test. And those whose temperatures were the highest showed improvement. And this is this is like really bizarre in it at convulsion level at like 1051106106.

06:58

In real life when I'm not running around playing goddess of love or world scientist I am in fact a scientist in that particular treatment. Mind you, you're reading a one paragraph blurb that I'm sure is three or four pages in the American Journal of Medicine. No doubt. In that particular treatment from what I've heard of it is one of the most promising actual potential cures they have.

Jimmy Carper 07:29

Um, they this was tried about four or five years ago in England. And I remember the big brute brouhaha about it and how this this might be something exciting. And then then that was it. Never heard of anything else. And now, several years later, they're bringing it up.

07:46

Yeah. Well, you gotta realize that what we as, quote unquote laymen actually hear are just snippets of things that are ongoing. A classic example of that was a few years ago, they announced that new steroid treatment for spinal cord injuries. Right. And that was an announcement of a result of a test that was ongoing, and is still ongoing, although they of course approved and recommended that treatment for spinal injuries, but you've never heard anything else about it. It's almost like icebergs, what we hear as laymen is are really only the tips of these research icebergs. Now this particular method that evil is talking about, basically amounts to a method where you can harm or damage the HIV viruses DNA, which of course in a virus is what's causing the damage, with out doing as much harm to the human organism itself. And anytime with a pathogen or a disease causing agent, if you can do something to hurt,

what's causing the disease, that is you're hurting it in disproportion to the amount you are hurting the human that is suffering from it. You're doing some good yeah. Well, this this is just and that's it for me in science tonight.

09:25

The seat full of surprises. What are you hearing me?

09:31

I just gave you a little note there.

09:32

Okay. Josie is full of surprises. Yes, she is a scientist in the real world. We all have live lives outside of the gay community. And sometimes I have to stop and really think that a lot of people who listen to us probably have no idea that this is Free Radio. This is all volunteer and

09:55

a lot of people are working on this like these little news articles that we run through That's something that that Judy Reeves does for this show. She sits around and reads all these newspapers and cuts stuff out that she thinks might be of interest. That's wonderful.

10:10

Thank you, Judy

10:11

day,

10:13

she's doing this. And that's, that's one of them. That's what it takes to put together a show like this.

10:17

And

10:18

thank God some people do not have lives.

10:22

Well, she gives a good portion of her life to us. And that it that is a life and we appreciate it.

10:29

Coming up, we're speaking. Speaking of Valentine's Day, when you see all of those, those cards with Cupid on it, just be reminded that Cupid is a bisexual Roman god. So don't think that the straights have a corner of the market on Cupid,

10:49

it's well, actually, you do realize it straight is not the politically correct term. It is non homosexuals predominant. Very good. Yeah.

11:06

I like that a lot. I'm gonna use that. My boss is non homosexual. predominant. But he's really friendly to me. And I? Oh, god, that's funny. I like that. What is this same sex harassment suit is dismissed by a judge. Apparently, the 1964 Civil Rights Act does not cover a person claiming to have been a victim of sexual harassment by a supervisor or co worker of the same gender as a man in who was an employee of Baltimore Gas and Electric. Found out? Well, you know, I wonder how often that really happened. I think they I think sexual harassment? Yeah, I don't think I've ever heard that in the news. before. I think we're I think we, we we tend to have a little we've got better protocol than that, don't we?

12:01

I have ever felt like I was in a situation where I was experiencing sexual harassment on a job that was with a commanding officer, but I had in the military who was in fact, female.

12:14

Oh, really. I don't know, the only the only sexual harass. You know, I had I had a guy claim claim that I was sexually harassing him on the job one time when I was a manager. And, you know, my, my immediate supervisor, the district manager and her supervisor, the regional manager came down and pull and pulled me I was completely unaware of it. And they pulled me into the office to talk about this charge that was placed against me that I had no idea not a clue why I was being pulled into the office. And so here's this guy that had been giving me a

hard time anyway, sitting in the office with these two supervisors. And they said you're being charged with sexual harassment. He said that You pinched him in the in the storeroom and did this and did that and said, If you didn't, that if I did not, if he did not sleep with me that I was going to give him an extra workload. I busted out laughing I said, Listen, if he was the last man on earth, honey, I'm a lesbian. I'd buy batteries. And I came out right there. They all died. He quit the next day.

13:24

Of course, this has nothing to do with our earlier conversation under the counter over the counter.

13:29

Oh, no, no, no, no, no, no, no, no, no. We're not going to talk about that. Anyway, well, there's my it's kind

13:38

of like the game there's certain things are off limits.

13:44

Okay, we're going to play horse for sand. First, from Sandy to Jennifer.

13:54

Okay. I see I mentioned that, you know, first week and Monson horse has not been requested and we get the phone call.

14:02

There we go.

14:04

And she smiled.

14:11

And that was horse and horses. Good. I like it. I like it. I lost it rocks, baby. And in closing, I want to allow Josie and Stacy to talk about an event that's coming up.

14:28

Well, let's here's a couple of events coming up. You've been trying to get us on here later this month. For Kpf TS all live. Yeah.

14:36

Sarah, Sarah, who usually does second weekend and I usually do fourth weekend we want to Oh, yeah. And Gigi is another person. Yeah. And so three out of the four weeks are all leather people. So we decided to have it all leather night that we hope to pull together either in February or March and will be here. Yeah. Come prepared. Yes, you may come prepared that you had something that you wanted to talk about.

15:09

Yeah, another thing that's coming up in the leather community in the very near future is not next weekend but the weekend afterwards the first weekend of Mardi Gras in New Orleans will be the pantheon of leather awards.

15:25

We really ought to just we ought to take a whole bus full

15:27

of leather people that are like a whole bunch of them are cough

15:31

I want to go I want to go I don't know it depends on

15:36

fist will be presenting its colors at the colors presentation. both fists chapters from Houston and Oklahoma. We'll be sending representatives of the MS. Gulf Coast leather shadow will be there. Yay. And it should be a real good time the Pantheon lover Ward's is Gabe Rhodes in the leather journals, math recognizing people in the leather community that really really have over the years. done their part.

16:16

Okay, that's it sounds like a good time to me. And New Orleans. Mardi Gras leather. Sounds like females in search of trouble. Yes. We may have found it may have found it there. No doubt. Oh,

16:36

Evelyn. I've really enjoyed it.

16:40

Thank you. Thank you, Katie an off your knees now. I can do why. Oh, you're quick girl too quick for me. I want to thank you guys for coming out. It's been a fun night. We have a lot of fun up here. live radio is adventurous at best and fun at the least and so we really have a good time with it. Okay, well, Jimmy. Yeah. Thanks.

17:22

Next week, we'll have Sarah dipalma and thanks for listening to after hours.

17:28

Good night.

17:34

You've just been rebooked with American Airlines. And you're comfortable with KPFT extraneous music
