**R** Roy McCarthy 03:07  
Okay. They're still looking for volunteers for the HIV vaccine. They need 5000 volunteers for this right now they for Chris was telling me earlier this evening they have less than 100. Anyways, the requirements to participate in this study is that you must be HIV negative. He must be a man who has sex with men between the ages of 18 and 60 years old and be available for a 36 month participation. There I go with participation. And there is no possibility that the study vaccine can affect you with HIV. The vaccine is made from genetically engineered proteins, which make up the outer shell of the HIV virus. The vaccine does not contain any live virus material, and you will never be injected with HIV during this study. And if you would like to participate in this, call them toll free at 877-682-9436. That's 877-682-9436 And as always, in any kind of scientific study, one group will have the actual vaccine another group will have the placebo. After the close of the study you will be told whether you received the vaccine or the placebo. If the vaccine is licensed, anyone in the placebo group will be offered the vaccine at no charge.

Chris 04:51

Roy McCarthy 05:39

hopefully be able to get that at the at the door if

Chris 05:43

they still have some available but hurry because like I said that is at four o'clock this afternoon.

Roy McCarthy 05:48

Okay, now, the state is not the only group of people that we can adopt children from from there's private adoption agencies, and family the family adoption service. And it's an adoption networking agency is in partnership with several nonprofit adoption agencies, who are dedicated to finding loving home for 1000s of orphans from around the world, and from many different countries. And these people are sponsoring a free workshop for prospective adoptive parents seek more information about adopting children from other countries, single men and women and couples for that matter, from ages 25 to 57 years old are eligible to adopt. Chris 07:05

And now we have from the immortal words words of William Shakespeare to suck or not to suck.

Jimmy Carper 07:12

A forum that is the question, a forum that answers

Chris 07:15

the question. Then from the old commercials, how many licks does it take to get to the truth about oral sex and HIV sounds

Jimmy Carper 07:23

like Michael Crawford's in on this sounds like something he'd do.

Chris 07:28

It sounds like a fabulous boys network thing. Wednesday, August 11, from seven to nine at the Lesbian Gay community center at 803. Hawthorne, will be informed about oral sex and HIV sponsored by the fabulous boys network. For more information, call 713-874-0798. Or you can email them at fabulous\_boys@yahoo.com. And I must say they picked a beautiful poster boy for that.

Jimmy Carper 08:03

Can we talk about that for a little bit? Go ahead. Oh, I didn't see that. Oh, you didn't see that. Now Rich has some some info on that.

08:11

A few years back, I think the Center for AIDS and in conjunction with another group. And I don't remember to had a big seminar. I think it was at the DoubleTree Hotel, on the same issue about the dangers associated with oral sex. And it was one of the most well attended things they'd ever had. And that's right. Everybody's into oral that there was a lot of discussion about the subject as you can well imagine. And no conclusion and no conclusion. And I think here we are, I think it was it's probably three years later now. I wonder if the conclusions will be any different?

Jimmy Carper 08:48

I bet not? I bet not.

08:50

It's it's a weird, I don't know. It's a real quandary for the medical community sure quandary for gay men, you know, who who whose avenues for sexual expression are becoming more and more limited.

Jimmy Carper 09:07

And from a standpoint of advocacy, as someone involved in AIDS organization or someone involved in the media, we just can't go out and say hey, go do it.

09:22

And I think it's because

Jimmy Carper 09:24

we don't know we don't the answer, there is no answer. And so you cannot say Oh, go ahead and not use a condom because we don't know.

09:32

Right. And I think with most things with regards to HIV and AIDS, so much of this is done on a patient by patient base Oh, yes. What works for you Jimmy may not work for someone Yes. And, and I find that you know, that HIV and AIDS affects each person differently. It can affect each person in a different part of their body. You know, some people it affects them in their guts and affects them in their central nervous system. And I think But the problem with what we see in the gay community is a lot of gay men are saying, well, the hell with this, you know, if I can't do this, what can I do? You know, what, what is the point? Where is my method of self expression sexually as a gay male? Yeah. And I think a lot of people are just saying, Well, I'm gonna do what I want to do, and the heck with it, because this is really the only thing that I have left, to me that that identifies.

Jimmy Carper 10:30

I think the big problem here is that it cannot be determined on a strict scientific basis, because you are relying on people's information about their own sex life. And they're gonna lie,

10:45

right one of the I went to a presentation the other day, by Barbara Hendricks, who is a she's a sexologist, and she works with sexual addiction and addiction. One of the things she was most emphatic about was she said that any anybody written regarding their sex life, whatever they tell you, there's always more. Yeah, that's her first point. And even though, you know, guys say, you know, to researchers, to counselors to case managers, oh, I do this, and I do this, and I do this. There's always more. And I think this is a very, this remains, I think, the preeminent topic in the mind of the gay male as far as what what defines safe sex. So,

Jimmy Carper 11:29

so where's that again,

Chris 11:30

it will be at the Lesbian Gay community center at 803. Hawthorne on Wednesday, August 11,

from four to 9pm.

11:40

And I think the fabulous boys network, I know they did a body image forum they've done they're they're starting to really focus on some things that are really at the forefront of the game on Yeah. And I think they're to be commended for that. But this is, this is definitely something that I think everybody should go to you that it's it's one of those unresolved issues. And we need to have as much knowledge and as much discussion about the scientific facts that are available to you. Ultimately, I think people have to make up their own mind as to what they're comfortable doing, what they feel secure and doing, how comfortable they feel about their specific partner, and what their attitudes are about their relationship.

Jimmy Carper 12:23

And this just doesn't this is just not for the queer community. This is for everyone. Sure.

12:29

Because basically, I mean, sex in the 80s. And 90s is about negotiation. Sure, you know, you didn't used to have to negotiate sex, you just did it. Well, now people negotiate, negotiate what you're comfortable with? Yeah, what's your partner is comfortable with, you know, there's a lot of sex researchers, you know, have this thing about what they call the sexual continuum, basically, on one side is is abstinence and on the other side is unprotected anal sex without a condom. And everything basically falls in between sure that and so you really, as individuals, you figure out where you fall on that continuum, what you're comfortable with what your partner is comfortable with. And I think the fabulous boys network is kind of hit the nail on the head, so to speak, with this topic,

Roy McCarthy 13:16

and I'll say this the fabulous boys network today. Another recent seminar study on on bear backing, protected animals that was a very controversial, very well attended event. Well, that's Michael Crawford.

Jimmy Carper 13:31

You know, he's just gonna He's gonna ask those questions. He's, he's,

Roy McCarthy 13:35

somebody doesn't need to ask, he doesn't shy away

 Jimmy Carper 13:37  
from no

 Chris 13:40  
help with the advertising that he puts out.

 Jimmy Carper 13:43  
It's really hot looking. Well, that's the whole idea. That's how you get people in

 13:48  
is this Is this the one that Paul Simmons from the Center for AIDS is involved with by any chance is one of the presenters here.

 Chris 13:55  
It doesn't list any of these speakers. It's just, it's just one of those little teaser.

 13:59  
Let me give a little a little plug for poster or the Center for AIDS. For those of you who don't know, the Center for AIDS is a treatment advocacy. Organization.

 Jimmy Carper 14:10  
Okay, hold on treatment, advocacy. What does that mean? Okay,

 14:14  
basically, my understanding my understanding of treatment advocacy is the folks at the Center for AIDS and if anybody's listening from there, they can certainly call in and clarify Of course, what they do. They basically they talk with drug companies, they talk with doctors, they try to inform people about the different treatments that are that are available, and they a lot of that information. They published the what is I think, the preeminent newsletter in the southwest called Rita which was Research Initiative Treatment Action, which is really aimed towards medical providers and people heavily involved in the treatment side of AIDS. Joel Martinez. Michael, Toronto, and Paul, are are heavily involved in figuring out what the treatments are figuring out, you know what, what you can take them a history of your treatment as an HIV positive person, and Paul will sit down with you and and guide you, in addition to information from your doctor, in terms of what what the best treatment for you is, I know they have

monthly gatherings that they call treatment mixers. And these are basically sessions where a bunch of HIV positive guys sit around a table and they talk about different treatment issues. They talk about, you know, what are T cells? What is viral load? What is the myth of reinfection? You know, what are the side effects? How do you handle these things? And it, it does a lot of things, it helps people to realize that there are other people that are in the same boat. And it also gives you good information. So I know, Paul is Paul has had some Paul has some very strong views

 Jimmy Carper 16:00

on how I need to go to one of those. Yeah,

 16:03

it's a great, it's a great way to meet other HIV positive guys. It's a great way to get information. I kind of we've done some coverage with them on the voice. And I think it's it's you walk into their center, and they're right at the top on Hawthorne in new park, right. You walk into their center, and you see a square building that has nothing but shelves and shelves and shelves of research, litter, literature, documentation, study results, you can get on the internet there. You can call them and ask for questions, ask questions of them, to great staff. Michael paronto is HIV positive and very out about it. Joel Martinez who who found it, he and Michael founded the Center. The two of them have just an extensive extensive research background and AIDS and they were they were working with AIDS before anyone else was. And there there are some terrific organizations in town but that that group is one of the best.

 Jimmy Carper 17:06

And I just I know we're interrupting the news here with this, but I wanted to put out that and it's it'd be who's the gay, the core community that we were the ones who stood up and said, Okay, we got we got to help our own here. And that's why we have the organization's we have today.

 17:25

And I think Michael Crawford is continuing to do that by asking these tough questions that

 Roy McCarthy 17:31

I'll say this that through no thanks to the the Republican administrations that we had when we got it. You know, we had to look after our own without any help and from with a lot of criticism from the street society. Okay, like to move right along with the sorry to some other.

 Jimmy Carper 17:53

Yeah, well, I want to give a farmer market report. Oh,

**R** Roy McCarthy 17:57  
oh, yes, we gotta get that for that.

**J** Jimmy Carper 18:00  
Scratch latest Market report. Okay. The Farmer Market Report is brought to you by a friend of mine who pulls the escorts in town. And lets you know, a little information about what's going on there.

**R** Roy McCarthy 18:19  
Oh, that's the profit sharing. They share. There you go double.

**J** Jimmy Carper 18:24  
There were two new people for a total of 45 currently advertising and gay publications and other other areas. And my sources wondering if this is way probably kind of way too many for the market. Of those we have mystery shops 78% The range as always is 50 to \$200. The average is \$104. And, and that that went up a little bit because there was a visiting star asking for \$200 last week and you know that kind of

**K** Kirk Keevert 19:00  
question to I'm sorry, yes. Back to that. That first statistic you read. What was that mystery?

**J** Jimmy Carper 19:06  
Mystery shop mystery shopped. That means that they call okay. Yeah, they call crisis. Yeah.

**C** Chris 19:16  
Just checks the quantity of the wallet. You need not the quality of what your purchases

**J** Jimmy Carper 19:21  
do most frequent frequent numbers \$80 and \$100. It's for a visit from an escort and that's the weekly farmers market.

**R** Roy McCarthy 19:34  
profit sharing program sticks that are useful

**J** Jimmy Carper 19:40  
No, no, no. That that this is the edge and I'm standing on it. That's it.

**R** Roy McCarthy 19:51  
You're not going to get this stuff on the FNN. New New, okay want to speak about another minority group. That's SynTec that, you know, is here in Houston and we do not talk about them enough. And that's called the black lesbian and gay coalition. And they meet every Monday between seven and 9pm.  **Kirk Keevert** 28:09  
I you know, I gotta be honest. Yeah,

 **Jimmy Carper** 28:11

 28:18  
I like the lira. There you go. Yeah. You know,

 **Jimmy Carper** 28:21  
that's, that's one of the things I really like. And I've said this many times before, when we're talking about safe sex, I'm an old fart. And teens out there are not going to listen to what I have to say about safe sex. But what if I can get somebody some group like rainbow flavor? You know, to say what, what I want to say it's going to reach more ears.

28:45

There's an interesting line in there. But he says Come on, let's do it. And he says, Oh, give me another drink, I think I think is the law. Which I that's pretty compelling. Yes.

29:39

it used to be that you were geographically undesirable and now your area code undesirable Yeah, it's like someone gives you a card and has to wait one on it. You're like later buddy.

Kirk Keevert 29:49

Yeah, exactly. I'm actually considering moving. Closer, ran out no clothes In funny,

Jimmy Carper 30:01

well I know you're really

Kirk Keevert 30:02

close. Yeah. No, actually outside the loop but just barely. I mean, it's still 713 That's the saving grace.

30:10

Yeah, but it's but it's not a five to exchange is it? No,

Kirk Keevert 30:13

it's not. That's gonna be that's gonna be the hard part to deal with.

30:16

You've cut it's like smoking you cut your dating prospects in half.

Kirk Keevert 30:20

Oh, that was subtle. Oh, do you smoke?

Jimmy Carper 30:26

Yes, he does like us so what is it with smoking? Hardly anybody doesn't

Kirk Keevert 30:37

I know. But you know what? I found one that does and and we smoke after sex. It's It's It's

Jimmy Carper 30:43

boy. It's really great. Yeah, it really is. Yeah.

30:47

I don't know. I got caught smoking when I was 12. My little sister and I got caught smoking in the attic of all places. What a place to smoke a cigarette. We smoked cools and every time I see a cool I think of that childhood memory. You know, those, that menthol flavoring? I don't know. I mean, Jimmy, you smoke, don't you? I did. Okay, I

Jimmy Carper 31:08

quit about five years ago, but I smoked for many, many years. And I smoked a lot. And they smoked Ellen M's.

31:15

s&m

Jimmy Carper 31:16

It's close. Yeah, it's a strong cigar. And yeah, and I smoked three packs a day.

31:21

I mean, I don't know I I, you know, the, the classic thing for me is when a when a guy lights up a cigarette. He goes from hero to zero. Wow.

Kirk Keevert 31:34

And, you know, I've, I've come across that before. And, you know, that's fine. I I don't I don't I don't want that to be an issue with somebody you know, that I'm that I'm hanging with? Yeah, you're right. Um, I mean, I've got I've got plenty of friends that don't smoke and we don't date. So

31:54

would you quit for some? If you were if you were involved with someone asked you to quit? Would you do it? No.

Kirk Keevert 32:00

No. The only way I would quit would be for myself. I wouldn't do it for somebody else.

Jimmy Carper 32:07

And I got to say that's about the only reason that you should do it yourself. Yeah, that's I did it because of of health reasons. I really had to Yeah. When that because when I smoked it was you know, people that were smoking pot, sometimes, you know, when they saw me with a cigarette, but there, you know, for when it gets to the point where you have to sleep sitting up

because you can't lay down. Yeah, because all you do is cough, then you need to do something now and it's I quit. I miss it a lot. I loved smoking. I really enjoyed it. And I wish I could do it again. But

32:43

we'll come up with a more acceptable addiction. You know, something? Oh, I did. I've

Jimmy Carper 32:48

always done that.

32:51

I'm sorry, I wasn't really being specific. And I'm scared to take this any further.

Kirk Keevert 32:58

Look at the track marks.

Jimmy Carper 33:00

No, no, no, no, no. We're talking about some oral fixation things here. Oh, there you are. Yes. Yeah. I mean, that's the way it is. Yeah, the way it is. Yeah,

Kirk Keevert 33:13

I smoke I don't have I have I have no problem with it. I'm a size clean. I don't have a problem with that either. So but don't

33:20

you deal with like a bit of a pariah right now with with, you know, people basically you go to parties and people say smoke outside.

Kirk Keevert 33:28

I know, I know. Because I'll go smoke outside. I had I had on the fourth I had a group of people over to my place, because I live close to Buffalo Bayou Park. And, and it was, you know, a nice place for everybody just to meet and we walked over to the park. And none of them smoked. And I didn't smoke in my house while they were there. It was not a big deal. I don't

33:50

know what it is my little sister who is also a lesbian. You're wanting to Yes, it does. Okay. She started smoking. She got involved in this relationship. And it was highly stressful. And she started smoke.

Jimmy Carper 34:06

Oh, that's, that's not funny.

34:09

And I was just like, I saw she she lives in Denver, and she came to Houston. And I met her and she was on my porch in tears over this young woman. She was involved with smoking a cigarette. I said, Paige, I've never seen you cry over a woman. And last time I checked, you didn't smoke. And she said, Well, I do now. It's like, what is it with smoking and stress? Yeah, relationship

Jimmy Carper 34:31

is supposed to be a way to have stress reduction right there at your fingertips, so to speak, so to

34:38

speak, especially for her.

Jimmy Carper 34:41

You know, what is their deal? But 1015 years ago? You smoked anywhere. Yeah. When I first came to Houston in the late 60s. You could smoke not only in buildings but on the elevators.

Kirk Keevert 34:57

Oh god I watched I watched the exorcist again recently yeah on DVD got wonderful. Anyway, um, there's a scene that just cracks me up. Though there are very few in that scene that would want you to do that. She the Ellen Burstyn is waiting in the hospital for the results of another test. And the doctor walks through the big doors and lights up in the hospital. Yes. Good time you could do that. Yeah, exactly.

35:30

You know, if you're a nonsmoker, my best friend smokes against my, my advice from all corners, and I have become a slave to his addiction. Like if we go out to eat, he starts tapping his fingers on the table. And then we all of a sudden, you know, I like to sit and have a cup of coffee. And yeah, he's like, Well, we have to go now. Well, what he has to do, he has to go smoke a cigarette? Well, I have, I've become like this tagalong addict.

K

Kirk Keevert 36:01

If I'm with a friend or a group of friends who doesn't smoke, and were at a restaurant, I, I will get up and go to the bar and smoke or, you know, go step outside and smoke. If I know that's what

J

Jimmy Carper 36:13

people do now, but you're attentive. And I don't mind doing that. You know, it was you didn't even think about lighting up in someone's house when you went to visit. Just everybody had ashtrays, most people smoked. And this whole societal thing has changed and reversed itself in 10 years now. I mean, I have to explain to friends that they may smoke in my house. I have ashtrays, it's okay, they don't have to go outside. And for the most part, they won't do it. Yeah.

K

Kirk Keevert 36:44

Oh, I won't. Absolutely. No, I won't. I won't smoke in someone's house who doesn't smoke.

J

Jimmy Carper 36:48

And so you know, I'm just flabbergasted overall. Yeah.

K

Kirk Keevert 36:54

I, I mean, as a smoker, I understand that. Now, there are more people that don't smoke than do. Yeah. And that's sort of the trade off, you know, I have to

J

Jimmy Carper 37:10

say, how come the bars are still so smoky. You go into a gay bar, and it's this blue haze? If so many people are not smoking anymore. What's the deal here?

o

37:21

Well, it's not as bad here. I was in Montreal. Last year. I walked out walk, listen to this, right up to this bar. And I was out on the street walking towards this bar I don't remember was the darkest bar ever been in my entire life? I was in the door opens. And it looks like the building is

darkest bar ever been in my entire life. I was in the door opens. And it looks like the building is on fire. I mean, there is so much smoke pouring out of the door. I couldn't believe it. I thought oh my god. You know, I always complain about the bars in Houston, and have for years because I'm a nonsmoker. And smoke really bothers me. And but you go to other places in the world, and it's just like, it's worse. It's horrible. It's really horrible.

 Jimmy Carper 38:04

So, you know, still don't get it done.

 Kirk Keevert 38:07

As to why the bars are so smoky if nobody smokes anymore. i It's it's, you know, it's a balancing act. For me. If I've got a drink in one hand that I want a cigarette in the other.

 Jimmy Carper 38:18

I know people only who only smoke in the bar. Right.

 Kirk Keevert 38:22

Right when they have a draw. I think there's a lot of that. Yeah, I think there's a whole lot of that.

 38:25

I don't think it's I think it's nerves.

 Jimmy Carper 38:28

Oh, yeah, I

 38:29

think that's nerves.

 Jimmy Carper 38:30

You're there. This this is bringing the queer angle back into it, folks. That you know, it's it's approaching someone. Yeah.

38:38

And while we're on the subject of nerves, let's talk about we need answers in the bar. Notice I didn't use the bad word. Oh, I love to dance. Let's talk about them in the bar. Okay, here you are. What is the purpose of the average American gay bar? The average American gay bar is where average American gay men and women meet one another. Okay. Well, you know, here I am. I'm in my little polo and my little jeans and my little kids trying to look my very best. I combed my hair before I got out of my car. And I walk into the bar. And there's this guy that spends 46 hours a day in the gym on a box next to me with nothing on. Okay, here I am trying to meet my future ex husband. And what do I have to compete with? I have to compete with this. You know, this muscle head? And I'm like, well,

Kirk Keevert 39:30

well. Okay,

Jimmy Carper 39:32

you're very good looking. And you have huge long thing.

39:35

Oh, thank you. Thank you.

Jimmy Carper 39:40

We have an after hours exclusive folks. Oh, do I don't have any drum music or anything like that. Big Roy.

Roy McCarthy 39:50

Yeah, right here.

Jimmy Carper 39:52

We got we got the we got the microphone. Who do you have with you?

Roy McCarthy 39:57

I have with me, Matt. was the doorman who was the doorman? And still is? Yeah, at the 611. Who was there? Who was there the night that the the raid happened during Great Pride Week?

Jimmy Carper 40:11

Yes. There's been lots of controversy over that man. Tell us

Roy McCarthy 40:15

exactly what happened. And I want you to know that we're being told that it was an inspection.

40:21

Well, yes. Part what they were doing actually was I looked outside and there was like four or four cop cars. I pulled up close to undercover vans, what no one was a van. One was a link, Crown Victoria. And I said, the police are here and I let them all in. How many were there? Oh, there's about 20 of them the same way about 20 officers. But 20. Will about?

Jimmy Carper 40:44

Well, you know, those those licenses are really heavy. It takes a couple of people.

40:49

Well, also team at the bottom. I work and

Jimmy Carper 40:52

it's also very small. Yes, it is. A small bar crowded

40:55

there in one place. It looks kind of intimidating. But what I wish it was not actually because for one, we had no problems in the bar to begin with. So actually, it was kind of not really harassment, but it's kind of like saying, Okay, we're bad. We're here. Basically, you got to do what we say. And that's about it. Sure.

Jimmy Carper 41:11

What did they what did they do when they

41:13

came in? When they came in? It was like, first of all, they just like, told me, they asked me if I was a doorman. I said, Yes, I am. And they told me to go sit down by the bar. They went on,

they had they had the office open, they open up the coolers, and they check in the bars behind the bar here and see the but all the bottles and stuff like that. And they're checking people's they weren't checking IDs, actually, they're just checking, checking just the bar. Okay, and it turned all the lights on. They didn't let anybody out or anything with the bartender and the bartender came back, it was coming onto coming onto a shift. And they said no, you have to wait outside.

R

Roy McCarthy 41:49

All right, so what time did this happen? It happened about

R

41:52

989 10 somewhere 19 o'clock somewhere. Okay. It was a very weird just a very weird word not actually because they were there for about half an hour 45 minutes and then they said Okay, have a nice day and they just all laughed and then and then what the Jr's

R

Roy McCarthy 42:10

30 to 45 minutes. Now I've heard conflicting reports that some of these officers showed up in flak jackets.

R

42:17

Yeah, they had Houston PD written on they had a vise and also TNBC there

R

Roy McCarthy 42:25

for an inspection with flak jackets, they had

R

42:29

they had they were fully decked out yeah.

R

42:32

What what was their attitude towards you? And the other paint

R

42:36

was actually very, very quiet. Very calm. Really just they just basically they came in bombers. Basically. all was

Basically, all was

Jimmy Carper 42:46

let me ask you in. I don't know if you even know this. But after they left, did like most of the patrons like

42:53

leave No, no. Well, when it came into doors, like three or four people wanted to leave, and to please tell them to stay inside the building. So they went back sat down, had had their cocktails, whatever they had, and it's just like, they were just contaminating actually. Yeah, it's like they were like they're all on the door all over here sitting over here.
