SUMMARY KEYWORDS

houston, talking, drug war, people, hear, queer, gay, men, night, discussing, part, starting, played, transgendered, dean becker, pflag, listening, parade, black, women

SPEAKERS

Jewel Gray, Chris Harrison, Judy Reeves

00:00

He didn't serve either.

00:02

Hardly anybody did these days. It's like John so long that we've done without and you know, John Wayne

00:08

never served but Rock Hudson dead. You know, we always put John Wayne as the macho guy.

00:14

When Thank you. Oh, that's

00:15

what it was

Chris Harrison 00:16

when he played in enough war movies that people figure he is that

00:20

they figured they got their value out of him to

00:23

their instead of but Rock Hudson farm Oh, his time they drilled the Tsar. He was in the Navy, I think yeah, he was. He was a seaman

c Chris Harrison 00:36

see, when you look at John Wayne, I mean, his latest. His last tour of duty there in the in his military outfit was for a beer commercial. They brought him

00:46

back from wasn't him. That was actually fun. That was computer.

00:50

They pulled it from actual film, right. But it was actually him. Yeah, it's the same way like how JFK was in Forrest Gump. Yeah, same principle. Oh, I gotta pee.

01:05

And I bet you 1000 million dollars. John Wayne would have done that if he wouldn't allow it. If it was.

01:11

Well, unfortunately, with John. John way Jr. signed off on it. And John F. Kennedy said that guy says he gave up. I love that.

01:26

We got going, Hey,

01:27

we're almost out here.

01:28

01:30

Steven. I was wondering if we were going to hear from

01:33

cultural baggage.

01:35

Is that Yeah called is culture where? From

01:39

Dean Becker Dean Becker.

01:41

But we didn't get to hear it come from him last time. I know they're awful busy these days over there. At the local normal chapter. Awful busy.

01:53

I know. I know when something's coming up, it's Luther King weekend. Monday is a parade downtown at 10 o'clock. To permitted made park they have a new route now for the all the parades except for the gay pride parade, in the art car parade, but most of your parades gonna start like at Minute Maid Park. It starts at 10 o'clock in the morning, too early. Sorry. And I will be at it. I'm gonna have my red card and

J 02:20

Judy Reeves 02:20
you're gonna be pulling in or driving and honey, I'm driving

02:23

with my fingers. I hope I make this parade. And then again, there's supposed to be a rally and a march anti war March at Mickey Leland. He's on Mickey Leland building at noon. And then they're going to go to the rally or the parade. The second Martin Luther King parade. We have two parades, Martin Luther King parades.

02:53

Like we have two courts, to, to, to,

02:56

to well, it's competing groups. Also, just a few special things with Martin Luther King day on Monday, queer voices is going to be having a special on Ella Josephine Baker, hardworking genius of a woman who worked but mostly behind the scenes. Not many people, even those very familiar with the history of civil rights movement know much about her. Her six decades long involvement as an organizer stands as a testament to her persistence and relating a personal vision for effecting change. What's more, this time it is crucial to revisit her ideas that were based on the strength of grassroots organizing. And so it's going to be on queer voices are gonna be discussing her trying to find a way to kind of read the rest of the stuff off of hand that

03:45

isn't eight o'clock.

03:46

Yeah, we're voices is eight to 10 on Mondays and also KPFT is gonna have some special programming for Martin Luther King day during the day. I believe it's the at the three I know this knows the three to five time slot in the afternoon. What used to be work in the afternoon is going to be at work in the afternoon is now work on Fridays.

04:13

Yes. Well, I watched I listen that program I listened

04:18

to He kept telling me it's gonna come

04:20

back. I don't know there wasn't there wasn't brought up. It'll be a surprise.

Chris Harrison 04:27

Let's put it this way. I didn't follow the Don't Ask, Don't Tell. And I asked and we didn't get told so. It's still on their minds. So we actually have Dean Becker who is waiting in the wings on the phone line.

04:42

Right so let's give Deena all or

c Chris Harrison 04:45

do you want you want to be on here with him?

04:47

Aren't we all we should be?

c Chris Harrison 04:50

Okay, hold on. Let me push the magic buttons. I don't know which one I'm going to have to hit the magic but it's the one that says phoned you Dean Yeah, hello. Hello. How's everyone? Oh, we're doing fine. How are you?

05:04

I'm doing well. I'm doing well, I, I have had a busy day I heard somebody talking about the normal folks being busy. And yes, business is good. The drug war is not over by any means we still need a lot more folks to stand up. The good news is lots of folks are starting to stand up. We're starting to see the hypocrisy and wanting to make the change. Let me tell you a little bit about what I did today. I, I you know, I first started working for Ray Hill, and then it was Jimmy Carter. And then it was Jennifer with the all vinyl show that picked up on the idea that the drug war is needed to be on the air. And I thank each one of them for it. Then Roark bless his heart, he took it prime time, took it Monday through Friday at 420 in the afternoon, and then Joe put it on his for 20 Roadhouse show. And for those whom you were just talking about, Roark is now going to be able to do those the promotions and stuff. You know, I mean, the guys working 100 hours a week or something. And he's going to do the Friday show. Thank God. I mean, we he's so smooth. Now, but you know, I was starting to worry. But what about Monday through Thursday? What about the 420? Drug War news? What just Today we had a producer's meeting, heard from the program manager, the station manager is going to stay on the air each day, no matter who's running the board. TJ is right.

06:30

I mean, they see the value and it do.

06:32

Yes, I see it as some sort of justification or gratification or something. For what I've been doing that the station has adopted it, that, you know, people were calling in, they're gonna miss work,

and they want to find out what's happening. But a few of them were saying, Well, what about the 420? Drug War news? And you know, that feels good.

06:50

I have to tell you. It's time has come.

06:52

Yeah. Okay. I want to thank the late the listeners out there, I think they're patriots. Everybody who wants this drug war to be over, will someday be considered a patriot. Because there is a I don't know, the divide an idea of ideologies and so forth here. And Sunday, these people that have been running this war are going to be looked like, like we now look back at slavers, you know? Yeah. It is. Well, anyway, after that I went into I did get a chance to address the drug war rally. I saw some reports in the Los Angeles Times that said we had about 300, and I say BS, there was at least double that there were a lot of people there. I couldn't stick around. I had, you know, a couple of things to do. I went to give a speech to Houston humanitarians, about the war on terror and how it uses the tactics of the drug war, to further erode our rights. And we spoke of all the fear, that's, you know, the fulcrum point for every aspect of the drug war. Then I, there was an event over at the BC Headshop on Westheimer. Out Loud, Dave was over there promoting them, not talking about that. They invited the normal people to come and distribute information. They announced over the air that North Houston normal now has a new website, trying to get people involved in signing up.

08:20

Yeah, I've been there. It's a good good space. Good information. Lots of links.

08:23

Yes. Well, thank you. Yeah. So and for those who don't know, it is Houston normal. It's the word Houston, N O R M. I.org. And then I I'm sorry. We also put together a couple of parodies of some of these new drug war ads, you know, audio style that also online there you might find them of interest coupler kind of interesting or cute, if you will. And I wanted to alert folks that next Friday he's what's it going to be the 25th I guess? We will have you for Terrell, the professor of law from South Texas College of Law is our guest. Buford is also the co host of the access cable program drugs crime and politics and he's a very astute, knowledgeable person. He'd be a great you know guest for our listeners to call into and get some you know, valid facts about what is and what isn't.

09:32

Really needs that's all we really need to do is get the facts out because the facts will speak for themselves.

09:39

As always, I want folks to know that they can access the you know, this week's for 20 drug war news. They're actually online if you can access them through Houston normal.org. We've got in depth interviews with judges and doctors, politicians. And one last night I I've made arrangements to bring in One of our new rookie state representatives name is Dwayne Bowe hack. He's going to guest on cultural baggage sometime in February. And I've been talking to several other of our state politicians. They know this budget is cratering, that this drug war has sucked so many billions of dollars, billions and billions, and they're going to have to change. So so there can't afford it. They can no longer afford it. I'm trying to work on my radical stance a bit. And try to give these representatives a little more dignity if they're willing to walk in the door and talk about

10:36

does that mean you put on a tie? Well, I might have to.

10:41

You know what I'm saying? Yeah, if they're gonna talk what by God, they do deserve the respect. I'm going to give it to the Atomium on their ground. Yes. And, you know, it does start to sound like that drug war door is opening in a bid. And it's over the day that those listeners out there, write that letter, a little one, a two sentence letter. That's all it really takes to I'm totally upset is a failure, etc. Use that money, use that same letter, send it to the Chronicle, send it to your state representative send it, send it to the federal representatives, send it to Mayor Brown. He's coming around, he's actually starting to see the light. And the city council is going to have to see the light if they want to maintain fiscal responsibility. Yep.

11:28

Yeah, they can't afford it.

11:30

That's it. That's it.

11:32

Well, we appreciate your time, Dean, we always love to hear from you. Well,

11:36

I thank you so much. And one more time. I've just got to say three cheers for Rory.

11:41

Yeah, three cheers for work. Yep. Is he gone?

c Chris Harrison 11:46

Yeah. No, Dean, you're still there. Right. We kept hearing a lot of static we weren't sure. on that. Well, what we appreciate you calling in and I actually have your promo card here queued up.

11:59

Well, I thank you so much. And I look forward to talking to you next week.

c Chris Harrison 12:03

All right. All right. Dean Becker with cultural baggage the only straight man who has a regularly contributing segment on after hours which Jimmy likes to promote that part that's our diversity

12:15

before you do his cart I want to say goodnight because I'm gonna hit the road is Israel I'm gonna be doing a second part.

c Chris Harrison 12:21

I hope Steve enjoys here is Yeah, I don't know unfortunately there's no big ROI. Oh no, it'd be worse Yeah, I think I think big ROI packed himself in one of Oh Oh, are we instantaneous information.

12:38

People running in and out

12:40

like a real emergency. Fire Department came to my house the other night trees and mine came to my house they said they saw some Sparky things on my fireplace gasoline on the fire sprinkler?

12:56

Well, the cops came to my house last summer and the reason why is because my phone for some reason what 911 some reason? I didn't it wasn't my Well what happened was it got crossed, the lines got crossed somewhere down the line. And this was when my phone wasn't working. And so things happen like that you won't believe

c Chris Harrison 13:16

Oh, they've had tomatoes that have called 911

13:18

I keep getting calls from Alliant Energy telling me to hold on stay on the line for an important message. Man

13:29

but I ain't done yet. What I hate are the sweepstakes that I never signed up for but I've won when

J Judy Reeves 13:37

yes all of you sign up yeah,

13:40

you want to trip this? I want to get this number you know or video and yeah, it's only good till midnight tonight. So you got

13:49

a sweepstakes legal in Texas.

13:54

I'm sorry. But if those things that say stay on the line for an important message, we're really all that important. Data have been important enough to give a live human being.

J Judy Reeves 14:06

Call me thanking my doctor's office calls that way and I just hang up. I know who it

Call me thanking my doctor's office calls that lady and I just hung up. I know who it

14:10

is. So my doctor's office I call energy and tell him to tell him to stop calling my house lady summons harassment. You can't talk to me like that. I can't talk you know what I want you get him stop talking to me on the phone every night. Not even a customer.

Chris Harrison 14:24

You know, tell her that very simply. If you don't like me talking like that. Please hold we have an important message for you in just a moment.

14:30

I did do I did what I saw on TV. Somebody did somewhere I saw that video you might remember. I said Okay, give me your home number. I'll call there we can continue this conversation. Give out my phone number I said I love TV. So

Chris Harrison 14:48

I thought I'd use it Seinfeld. Oh, was it there? Yeah. Brandon is telling me a Seinfeld.

14:52

I like what it was they asked the lady the house and I said well, you're talking to him. Yeah, so I guess this was when I was doing shows like it he Jays are similar that I almost got all my makeup on. Go ahead.

Chris Harrison 15:06

I've almost I've almost told them sometimes if you're looking for the lady in the house, you got the wrong number.

15:11

Yes. Or I would say I'm gay. Sorry. There's no lady here.

15:16

And those letters in the mail you get from the dating sir, I have connections.

c

Chris Harrison 15:22

I've sent some of them back going. Excuse me, you don't have anything for me? Where are your gay male coverage? Especially send it back to the Christian dating service

o

15:33

can't believe that people out there dating?

c

Chris Harrison 15:35

I'm not trying to find someone who's found Jesus I want Hey, Zeus.

J

Judy Reeves 15:41

They just do it on a computer.

o

15:44

Why do men date

J

Judy Reeves 15:47

gives them something that they would save watch British television

o

15:55

have you Did you see this new data we

J

Judy Reeves 15:57

know this

o

15:58

science of the sexes the other night

c

Chris Harrison 16:00

was a lot of

16:04

it was stunning. It was talking about the difference between you know DNA and then you know, male and female that, you know, that's not just, you know, common knowledge. It's actual fact based upon, you know, DNA, and that, you know, our cultures, trying to change all that. Not that that's a bad thing. But that we got all this from the plains of Africa, how women are and how men are now, our brains function came from the things that we learned on the plane to act Africa a million years ago now to me is going

16:35

well. Yeah, we've been around almost that long.

c Chris Harrison 16:39

What I liked on that series was they showed an M, they took a straight couple having sex, and they put it into an MRI. So you're sitting there watching this 3d distorted view, right? On the X ray. Yeah, he was coloring. I couldn't tell told what was going on if they didn't tell her, Nancy, but it was like, I'm sitting there watching.

J Judy Reeves 17:05

Watching this,

17:06

and why are we watching this? It was it was it was

J Judy Reeves 17:09

not the show this aspect of it. Why would we want computer enhance color enhanced MRIs of people having sex because

c Chris Harrison 17:16

what they were showing was that in that disgusting thing of penis vagina intercourse, that the uterine wall,

J Judy Reeves 17:25

totally disgusting. or you wouldn't be here discussing it. Think about that.

c

Chris Harrison 17:30

My daddy was a turkey baster. All right, his parents that? Yeah, I mean, they're twisted. I mean, they've been together for 30 something years

J

Judy Reeves 17:39

to have things like

o

17:42

they're working on, they're working on the cloning. All right, that's what we're going for. But they were all there, they were trying to show that the uterus moves into a different location that they didn't realize where it moved, when inserted moves way up and forward. And so that's the

J

Judy Reeves 17:57

positive, they didn't show you actual pictures of this, you wouldn't embodied that the whole deal, okay.

c

Chris Harrison 18:03

And hey, they had to show a little bit of TNA.

o

18:07

They showed what channel was,

o

18:10

they showed right through

o

18:12

people listen to help.

o

18:15

You could see blood vessels

J Judy Reeves 18:17

or learning channel or,

♀ 18:19

you know, bones, like you can see right straight through them through half this thing. But a lot of what they did was talk about the psychology of the difference in sexes. And you know, being a lesbian, I've kind of fought that, that whole myth about the difference in sexes up my whole life. And I sat there listening to this thing, and there are some things that are very common, that we all know, that we just accept. And nobody really talks about that a difference between men and women, women are better at spatial things, you know, they can park the car better, but women are better, better looking at the bigger picture of things, seeing the broad scope of things and how they relate. Women are better at communicating. Men are better at directions. Now. Those are things that they know experiments with, with babies, babies from babies all the way up to old men, and consistently comes out. And they found out reasons for this because men men's brain isn't as well put together as women. So that's why women can multitask and men can't. It's because they're not

c Chris Harrison 19:17

actually, though the women have a harder time multitasking. Oh,

♀ 19:21

no, women pass. Men. multitask. Okay, which

♀ 19:26

brain is part? Yeah,

c Chris Harrison 19:29

I must have been multitask trying to multitask at the

♀ 19:32

same time. Women multitask, focus.

♂ 10.25

19:55

Like what they were like what they were saying with some of the legs with directions, and that is that women at the end of their toes, the TV screen. Women are women like navigate. They need to know set directions they need to go, go here, take this road here, turn here, menus, landmarks. And so that's the spatial part is okay, go to McKinsey's barn and turn left and go

19:58

down to the old McFerrin. Lesbian cuz I want direct

J 20:02

exception I will do the one thing champion shows they didn't discuss the difference in lesbian gay men because they were consistently comparing heterosexuals now they often wanted to watch it right? They often talked about what was still about humans, whether they're heterosexual a lot of this was about human regardless of sexuality. But they often talked about well, they held things. You know what I mean? Not necessarily six things. I know that six, six becomes part of the health issues at certain point, but there was more about the health and the well being of the body in the sexual things, rather than having sex. Now, last turning my thought here was I say,

C 20:48

I don't know we just got a call from your biggest fan. Oh, God, I couldn't put them on the air because the FCC doesn't allow those kinds of language. No, fanboy. Now, your biggest if I was being sarcastic,

21:04

or facetious here, folks, which biggest fan you got? No, it was a

C 21:08

caller who didn't like what would you say? Well, as far as a four letter word turned into a seven letter word? Ah, sorry.

21:15

I didn't say they think, oh, you know,

J 21:18

by the way, you thank them for calling her?

c

Chris Harrison 21:21

Yes, we do enjoy phone calls. And, you know, everything. We kind of touched on this last week. You don't have to agree with everything we say. In fact, you know, there's

o

21:36

that whole corpus callosum thing they talked about that I'm sure the female brain, you know, the the connection between one half and the other, right? Is stress thicker and female

o

21:47

brain and not as strong and men's brains. What when what makes you has communicate better with one another? multitask, right? That means brains don't have that built in as strongly between the brain hemispheres. So that men have to focus one time at a time on things directly, how many they still left brain and do something funny?

o

22:05

How many do they have? Oh,

o

22:09

well put together research and spin over? Some of the studies had been over 20 years?

o

22:14

Well, I mean, hundreds, hundreds and hundreds of individuals? Oh, yeah. Because everybody's different. You know?

o

22:21

Yeah, that's, and they talked about that too. But you know, and they discussed was the nurturing versus nature, you know, is something you get from your environment, you know, these, these mores and cultural, you know, things and they

c

Chris Harrison 22:35

are, there's a lot of studies that you're seeing nowadays, and they even really relating

22:39

things that we always used to think, oh, that's just them as to being very particular to them.

22:44

There was another part I saw that they've been showing a lot of transgendered shows on YouTube. And one of the things that they were that they had studied was and it sounds like the old standards of where you're talking about a woman trapped and I keep hitting this damn mic. Want to try to

23:01

word again, Mike.

23:06

We can say Damn. He is the word he used was a couple letters. We didn't use but no, they were talking about that. They had gone in after people who were transgendered had passed on, they did a study of the brains, right. And they, I don't know, remember what part it was. But in a heterosexual male, it's a larger Yeah, it could have been the hypothalamus is larger than in the woman. And in transgendered men, it's been found that it's a smaller one that's smaller, that's more similar to the female not smaller than smaller than the male. So there, they've done some studies there, it's your it's not as much it's not even more of a choice than you thought. Then some people are saying it is. It's, it's part of your ingrained nature.

J Jewel Gray 24:02

They discussed a little of that in the birth section last night, the other night about how much testosterone is emptying into the blood system depends. We'll see. That how much depends on how much known the other way around how much pins What did what depends on the amount of testosterone in the body at that time. And then the more testosterone The thicker the vocal cords become the

J Judy Reeves 24:34

almost have a lot of testosterone.

24:37

And, you know, various things that happen because

 Chris Harrison 24:40

God is whatever gay man aspires to be.

 Judy Reeves 24:44

Down to forgive it.

 24:46

And that that's why they have some people who feel that they trapped in you know, in, in a body not suited to their mind is because they have this either they have a flood of testosterone or not enough During the,

 Chris Harrison 25:01

you know, that's developmental stage three days? Well, yeah, because within the first three days, well, fetuses are born, or start all female. And then testosterone kicks in and will turn the fetus towards males.

 25:15

You know, you're at you're either you're an average male or

 Judy Reeves 25:17

problems with a study. I really do. I mean, back in the olden days, careful. Back in the olden days, he was like, well, cloning is strictly going to be for so and so. You know, and it's like, then I turn around, I was like, Oh, we've got this brand new clone, they became bull. Now the they go in they study and they do this and did that. Well, we can tell when they're born, they were doing this or we can check the hypothalamus and it's this or the thickness of this. A, you know, and I see this, this rash of of euthanized babies down the road was like, oh, died in childbirth, too bad throw that queer went away. Well, have you seen what's coming? That's what their did. They're not doing it for the betterment of mankind. He's, excuse me, humankind. They're doing it so that they can pick us out? Because that's the way the government always turns it around.

 Chris Harrison 26:02

Have you ever seen the movie Twilight of the golds? No. Brendan Fraser plays a game man whose sister her husband, the husband of her sister, does research on genetic testing for babies. And that their child is going to be has a potential has homosexual potential, as the gene that has the has the gay gene,

26:29

and there's a gay gene, there's discuss Bible one, they discussed

26:33

a portion. And they were discussing it and the parents reaction was like, and he goes and the parents were saying weren't sure what to do. And he was like, if you had the chance, would you have aborted me? And it's a very interesting walkthrough of

26:49

I couldn't get a straight answer.

Judy Reeves 26:51

I mean, that's where that's what this kind of research guys it

26:54

was a good, good thing.

Chris Harrison 26:57

But I mean, that's a very interesting movie to go. And I

Judy Reeves 27:01

have seen you there like you just described it to me, it wasn't good.

27:04

To me. It's one of the it's one of those things that makes you kind of think of what's happening with with where we are going with technology. I mean, we're now talking about the possibility of a clone child. Oh, that's all bull. Oh, come on. I believe the Raelians

27:20

I think that they will have it will happen. But this particular thing is a ball.

27:25

It's a religion. And remember, all religious beliefs are accurate, right? Only the child that was cloned is a product of the Raeleen religious religious sect

27:37
who's really

c Chris Harrison 27:38
Raylene. Raylene is a Frenchman, who was visited by aliens

27:46
told oh my goodness, another alien, that aliens

27:49
populated the earth. And they they aspire to cloning as being the ultimate form of reproduction. And they're trying to build a space embassy for a man in Canada. It's really

J Jewel Gray 28:05
they got a bar, a bar, a lawyer that what is it bar, legal, whatever they call them bar, you know, who's the legal lawyer now to get up and do that press conference and say those things because there's just no way. They don't have the facilities to do that kind of stuff. But one doctor says it's not that hard to do. But they don't have the facilities, it has to have certain kind of sterile colocation. So it's not it's all bull. I'm sure it's coming. Actually, if it's not already happened, and we just haven't heard about

J Judy Reeves 28:38
it, but my point is, I mean, you can take the purest of resource with the biggest heart and the purest, you know, mind and soul and, and once it all becomes, yeah, and then, you know, then the government steps in, and that's when it happens. So I mean, I'm not that thrilled to know that one part of my brain is sicker than some guy who can't focus you know, just because all that means is they're one step closer to killing my great great great, great grandchildren down the line or whatever.

29:08
Knowledge is dangerous. You say?

J

Judy Reeves 29:10

No, I'm saying that kind of research is dangerous with our government.

C

Chris Harrison 29:14

A little knowledge is a dangerous thing. That's that's part of why we're, they try and keep us in the dark because when you know this, when you're out there we completely in the dark. So many people enjoy it there. Oh. Yeah. Like if ignorance is bliss, we're going for a really happy,

J

Judy Reeves 29:37

static, I can tell.

C

Chris Harrison 29:39

I do believe we have a second half host now. slide in here. So

o

29:45

before you before you go, tomorrow is the marathon by the way. Oh, yeah. I can go through. It's going to go through Montrose. And I was talking to Sunday, Sunday Sunday. I was talking to John from the west Thomas street fest.

C

Chris Harrison 30:00

You know the cute one and they're setting up a they have a booth set up I believe over at the stop and go,

o

30:05

right and it's gonna be drag queens on stage entertaining the runners as I go right by Yeah, they don't stop Well, it's 40 degrees. Seven out there. And first of all, John John floors from the west side was street festival. As I said, John, drag queens up at seven in the morning. First of all, to be in drag at seven in the morning. That means they had to give it like five or four.

J

Judy Reeves 30:35

No, it means are coming straight from the party. They're going to an after hours.

o

20 10

30:40

Last night. Okay,

30:41

so what we'll do is this, I actually have a promo about the marathon. Oh, you do? Have a D. I have a promo for that. I have the promo for Dean. And then we're going to finish off then with some Dusty Springfield. Oh, have you ever picked a song you want? Yeah, we did. Number three,

30:56

you wanted to easy easy evil. Yeah. So I'll see you guys next month or weekend. So we're

c Chris Harrison 31:01

gonna put a few things in your ear. Thank Yes,

31:04

that'll be during the paid better me that'd be the pledge drive. pledge drive.

31:08

Oh, great.

c Chris Harrison 31:11

Well check the check the calendar you've got the rough neck, you've got the

31:25

crash. I go to Hawaii.

c Chris Harrison 31:27

Okay, we're gonna put a few things in your ear and then we'll be back in with Steven Jerome and black on black.

31:34

The 31st Running of the Houston Marathon starts this Sunday morning. Join KPFT sports Brees Richard Hanna, along with Lance Phegley. A runner triathlete news magazine, and members of the KPFT news team, David Stiles and Jackson alors. As we'll be giving updates before, during and after the race starting at 7am. So join us for capabilties coverage of the Houston Marathon starting Sunday morning on KPFT 90.1 Houston.

32:02

Drug War got shut down. What you need some unvarnished truth from people like ASA Hutchinson, the administrator of the DEA,

32:09

marijuana use does have consequences. It may not cause the overdose deaths like heroin or cocaine, but its cumulative effects are just as dangerous pot grower Boris saw Murray

32:22

in the marijuana party in the block pot has launched a new website called marijuana home. delivery.com drugs are John Walters.

32:29

We've had too much toleration in the last 10 years of marijuana and that's why we have the problems. We have

32:33

San Francisco attorney Tony Sarah,

32:36

we see a snitches, US Representative Dan Burton.

32:41

We've been fighting this fight for 30 to 40 years and the problem never goes away.

32:46

This is Dean Becker asking you to tune the 420 drug war news every afternoon about 420 on ~~Beach show and on 106.7 Beachhouse. Please listen to the unvarnished truth about the drug war.~~

ROARK SHOW, and on Joe's Roadhouse please listen to the unvarnished truth about the drug war second and fourth Fridays midnight to 1am Saturday.

 Chris Harrison 33:30

And we are back this is after hours. Queer radio with attitude on KPFT in Houston KOLs College Station and on the World Wide Web at KPFT dot O R G. The music you just heard was first off was Dusty Springfield with easy evil. And that was the one and only Tina Turner. With we don't need another hero. And the semi-conscious Steven Jerome is here. Are you trying to tell me your number one?

 34:08

Good morning.

 Chris Harrison 34:09

Hey, I can't pick on you. Since you've since the switchboard relocated, so I don't get to pick on you as often as I do. That's right. So I have to remember, I'm the one who controls your mic level. Okay. But Steve Jobs here for black on black.

 34:27

Good morning, everybody. Glad to be back another morning.

 Chris Harrison 34:32

He says with a sarcastic red on his face.

 34:35

Very true. Very true. Glad to be back this. We're still in the middle of the holiday season. In Louisiana for my brothers and sisters. It was listening down there in the middle of celebrating Mardi Gras and across the country were in a weekend of celebrating the birth of Martin Luther King this weekend. So there's a lot going on around the country who had various marches. Is parades and ceremonies just going on. Here in this h town we have the PFLAG Houston, and Houston black lesbian gay transgender coalition will be sponsoring poetry readings this Monday at 7pm at the Houston lesbian and gay community center. Call the center their numbers 713-524-3818 for more information. We'll keep you posted on that, but currently is on the calendar. Also going on around the this weekend, there's going to be special services held like on campus at Tsu. So check your local calendar and find out what's going on. I noticed shape centers also have something going on this weekend

c

Chris Harrison 35:52

and keep an eye out here on KPFT. Because we're going to have some special programming during queer voices. And during the day, unfortunately, I look for a promo card for it and there isn't one. But I do know what the programmers meeting they were discussing there was going to be I forget which I forget which programmer it is, is doing a special in the afternoon for Martin Luther King Day. Which is part of the diversity he was with KPFT in the new Pacifica, there was the Kwanzaa celebrations that was covered here on KPFT.

o

36:27

Nice show.

c

Chris Harrison 36:29

So I remember last year, I think they did a whole day worth of or several hours worth of from Martin Luther King Day. And it was very family oriented. I mean, you could hear the kids and the babies in the background here in the studio.

o

36:43

That's part of what the celebration is about. Speaking of the celebration, you know, just about every black American know about Martin Luther King, the struggle of the civil rights during the 60s, many of us our parents allele during that era era. Some of us including myself actually didn't live in that era. Now. I do remember parts of the parts of it very vividly. But what many of us don't know and this is a little black GLBT History The night is that the man who was in charge of organizing the March on Washington was named bear rustling. A black man born in Philadelphia, not only was he black, he was openly gay. He he played a very important role in the American Civil Rights era. And during the marches that time fact he was known as Mr. March was organizational skills of these peaceful marches. But he stayed out of the limelight for one because he was an open homosexual. And also because he had a prison record, actually, to prove that he was a homosexual. He got arrested when he was like 17. Right arrested for having sex with two guys in the back of a car.

c

Chris Harrison 38:01

Yeah, that was the good thing about cars back then you could have three people.

o

38:07

He later on he also served time in jail for being a conscientious objector because he was raised as a Quaker. He was born in Westchester, Pennsylvania, in 1939, if I'm correct, no 1912. He was a little older than I thought. He was raised by his grandmother in the Quaker community. So he did not believe in war. Or he believed in social justice for all not only just blacks, but for all people including gays and like says he was openly gay, which was the reason that he did

that play a more. He was not really out there on the forefront, but stood stay behind the scenes because he did not want to hurt the the movement at that time. But I'm fat. And if you want to really find out more about it, we got to talk more about this guy during the show. There's a PBS Monday night at 8pm Central Time, Check local listings. The rusting, Renaissance man story will be on TV. So check it out. I mean, it's really good because like says we're talking about an openly black gay man during the early 60s era which went when at that time it was hard not being black much less being openly gay and black. At that time

c

Chris Harrison 39:27

it was really take your pick for what you're going to to be killed for basically being black being gay or

o

39:34

you know, saying that we don't that's one of the reasons I open up with the song Tina Turner tonight. Like just call it Tina. We don't need another hero because we do have your we already have heroes within our community who stand not only for being black but but for being gay and just for equality and justice. And we need to learn more about our heroes that we haven't be Ross is one of the Black Heroes of all time for the people. Also, Tina ism, pretty much a hero in a home, right. She's a diva with a very beautiful voice. But she stands for domestic violence, which is a very bad problem here in this country, not only in the black community. But in gay relationships, though. So something that we don't talk about, we feel shame to talk about domestic violence within our relationships, even though it is there, we try to maybe say if we don't talk about it, it'll go away. In her autobiography, she chronicle how she had a very turbulent, and very violent relationship with a turner. And how she overcame that is to be a model that to all women around the world, that you can overcome domestic violence and go on and have a very productive life. You know, don't let a bad relationship destroy you.

c

Chris Harrison 40:57

Yeah, it's one of those topics that you you don't hear much about in the gay community. And we've, we've done some a couple of times, we've touched on the subject with same sex domestic violence. And there's has been a few articles written about it. The press has done a story on same sex domestic. And I think channel eight also did. And speaking on that topic, are one of our topic, one of our regular, irregular, irregular regulars here, Bobby knows a thing or two on that subject. So that's something that it's very much in the community that doesn't get much attention to in fact, a thing on hand that this past week was discussing. They were calling it our community's dirty little secret. Oh, yeah.

o

41:53

And I think each community, whether it gay, straight, black or white, that's all been their little dirty secret. They just, it's something that they don't like to talk about is domestic violence, or just violence within a relationship. And we're going to talk more about it but right now, we're going to get back to Tina, and let her sing to us for a while. Okay,

c

Chris Harrison 42:15

and that was number eight, correct? Yeah. All right. We're step out for a little bit of music and we'll be right back

o

42:27

let me say the see

c

Chris Harrison 42:40

Tina Turner,

o

42:41

okay. Yeah. I like the lady. She's really nice. Oh, yeah, I'm looking for something. Okay. Oh, the correction the bay interesting story will be on channel eight at 10pm. So

c

Chris Harrison 42:56

that's and the title of it, it's on the if you look at in your listings is gonna sell Brother, brother outside its POV it's the Point of View Show. And it's brother outside or the life of a yard Reston. And if I remember correctly, the those mics are off. And I still heard that on the air. The if you go to Bayard Rustin dot o RG, you will find that's the done by the producer.

o

43:33

So there's actually just go in and type his name in there's several websites, including the official website or be arrested. In fact, there's a trust fund foundation set up, be running now Philadelphia, because his work is really still going on. In fact, the guy was like really deep into the behind the scenes movement on the civil rights movement, not only in this country, but also worldwide. He worked with India, to help with their winning their independence. And he also where we later got to deal with the American studies on Africa. The American Committee on Africa, the first study, to deal with racism in South Africa, he was the head and organizer of this committee. So the guy was a worldwide noun, and he was actually open at that time, very open about his homosexuality and very comfortable with it.

c

Chris Harrison 44:39

But it's one of the things I think that you you hear a lot with the Civil Rights Movement. I know. Dr. Martin Luther King Jr's wife has come out and made statements of that if if Dr. King was still alive, he would be working for gay rights and So that that, because I think you saw in the

earlier days that there was a lot of closeted homosexuals who were a part of the movement for civil rights. And it's, it's one of those things that you don't hear much about because you the standard for history is glossed over for the civil rights movement period. In the for the most part, because the History is written by the white European male. And so it does gloss over a lot of the facts of that. And so definitely there if they're going to gloss over the the African American civil rights movement, they're also going to gloss over the fact that there were gays that were instrumental in helping with that behind the scenes, and

45:50

quite a few of these gays were actually open. During that time, it seems like gayness went into the closet somewhere. After the Vietnam War, suddenly went, it went deep into the closet

c Chris Harrison 46:01

after the sexual revolution. Yeah. Free love free sex and then go back into the closet, right?

46:13

Something I want to say about this guy. But he worked, he did a lot of travel, he dealt, he dealt with free India, I remember that. And I just read part of his biography. And it's like, really interesting that he played such a vital role in civil rights around the world, because and he kept it very much behind the scenes because he did not want his past and his criminal record, or his homosexuality to affect the movement. So he distanced himself from it to a certain degree,

c Chris Harrison 46:44

I'm trying to remember I remember. I'm trying to remember if we've got archive of any of his any of his speeches here at Pacifica, because I remember I first heard about this on believers Democracy Now, about a month or so ago. And some of the some of the stories of Bayard Rustin. And I know Alexander democracy now covered a bit of his his story. And it's one of the things that you start hearing some of the the history of some of these people. I think part of what he's coming up is between the twin this documentary and having a school name for him. Coming up here in up in Pennsylvania. Oh, sometimes it takes a little of extra stirring to find out some of your history.

47:37

Yeah, these these forgotten heroes, these unsung heroes that we don't talk about, you know, it like says, this week, we commemorate the birth of Martin Luther King, but not only the birth of Martin, Martin Luther King, but we also celebrating the entire Civil Rights Movement this weekend and the importance of it within American history. So we do have to look at also the other characters who have played major roles within

48:06

this movie that's been going on in life. Talking about this young lady I like and it was Anna Marie. Tina, you know, she was born in that bush. They do not Bush, Tennessee.

48:25

She actually made us sit I think pretty famous. We went one of her songs later on. But um, she went on and moved up to St. Louis, where she got her start and from there she's become world, one of the world famous divas that we in our century now legacy, yes. On last year, she did her five farewell concert, which she finally said, Okay, I'm not going to be doing a touring thing anymore. I know in November this past November 26, she may 61 years old. 61 is still kicking. And it's a good looking sick. Oh, yeah.

c Chris Harrison 49:03

This is coming from a gay man. She's a good looking 61

49:05

This is the woman who? I think Time magazine wants it at the most beautiful legs in the world. Oh yeah. She currently makes her home and switch between Switzerland and the south of France. So she's not living in Montrose.

c Chris Harrison 49:19

Switzer got what a horrible life to be living over between Switzerland and France,

49:26

south of France.

c Chris Harrison 49:29

Must be horrible. Chocolate. Yeah, you wouldn't be thinking chocolate.

49:37

But, so I'm going to turn it back over to Tina let her sing.

c Chris Harrison 49:41

I think I just made him blush. The only problem is I don't know which one you wanted to play.

49:46

Was it anything you play by tennis?

c Chris Harrison 49:48

I would be like the next one was two or four. Which one go for 40222. Okay, good. That's about my stop on one, two. And here is a little more Tina I don't know what in the world happened there I don't even know what was going on due to technical difficulties we'll be okay let me try pushing the buttons again and see if we get a totally different story is Jimmy Vaughn still here with us? I don't know. Well at least it didn't say that it was erasing the CD let's try that again. All right, hold on let's see okay, why are we getting a whole bunch of feedback from Oak let's don't yell love it when stuff like this happens. Yeah, and I wasn't prepared for anything else to go on. In case of something like this disaster which is happening as I can continue to walk away from the microphone should be let's try this looks okay, let's put something else on and we'll give that a try and see if we can make the buttons work their happy little bits in a moment so much for going to CD number two to learn fast this is what we love about live radio at 320 in the morning and because big Roy's not here we don't have coffee. So let's let's go as people are going well, hopefully they haven't started the evaluation process yet. What is this? I don't know what's going on here.

52:42

Doo doo

52:49

doo No, you can bet we're the world's first beauty shop or test.

52:57

Come join Kinsey sakes and PFLAG got the new Houston hobby Center. 800 Bagby on January 30, beginning at 7:30pm You can pick up tickets at basic brothers 1232 Westheimer or contact PFLAG at 71346 p f L ag a portion of each ticket goes directly to benefit PFLAG Houston. We hope that you will be able to attend and thank you for your support

53:27

we are a priority of the Kinsey

Chris Harrison 53:26

Chris Harrison 53:30

six we are back on after hours were radio with attitude and hallucinations apparently the sounds that we were hearing it was only us here in the booth that was hearing the feedback unfortunately unfortunately I'm going to blame it on the radio radio and there was picking it up okay good. So there wasn't okay. We're just afraid we were getting flashbacks there from the atmosphere that was in the of the show in front of us here the dead air show. And we were having an acid flashback. Fortunately it wasn't. So we had a watch just because I looked at you when I just said acid flashback doesn't mean anything as it goes back to reading his paper. This is after hours correlated with attitude and Steven Jerome is here for the black on black segment and we are discussing biard Reston

54:36

pact and Mr. Ruston. For those who would like to know more about him ago, you can check out his official web page www.dotrustenrushtin.org Very enlightening check it out. You learn a lot there. You know also celebrating Coming up just talking about equal rights and I know they're having a massive marriage getting ready to come up. Oh

Chris Harrison 55:10

wait, are we dragging BK in for this?

55:12

This is one of the things about Martin Luther King's speech. So many people highlight that, okay, because it was African Americans, but that particular day he was speaking. And one key thing in his entire speech was that he was dream he had this dream of a day when all Americans, red, yellow, black and white, could walk hand in hand. You know, history was a totally inclusive dream of all races, creeds, colors, and lifestyles. Mrs. King has also been a very proponent for the gay rights movement. And she's been very outspoken in saying that she knows because of her husband's doctrines of believing of justice and equality for all, that he would also believe in equality for gay rights,

Chris Harrison 56:03

that no one can be free unless all for free. Yeah, yeah. The part you were talking about was the lesbian and gay immigration rights Task Force Houston. And the Stonewall Lawyers Association of Greater Houston are going to be having a the first major Freedom to Marry event and is going to be held on Houston on national freedom to marry Day on February 12 2003. From six to 8pm. It will be a masked union commitment ceremony that will take place at resurrection Metropolitan Community Church at 2025 West 11th Street at TC gesture, and afterwards, the meteor club will be hosting a reception celebration of love and equality. And everyone including singles couples who have already had a union or commitment ceremony. heterosexual couples and family members are encouraged to attend this historic celebration of love and demonstration in support of marriage equality for GLBT couples.

57:04

What about gay divorces?

c Chris Harrison 57:08

Are we going to start talking about old films of the 60s now?

57:14

The coffee work okay.

c Chris Harrison 57:18

Let's say I'm pretty sure they'll take it we'll have you there. All couples who partakes? Sorry about that all couples who participate in the ceremony will receive a special certificate commemorating the event and photographers will be present.

57:35

No registry of float Foley's. Fajr no dishes. No, I don't need my picture taken up in the post office.

c Chris Harrison 57:47

I think what they need to do is they'll have like IKEA and see who's gonna be offering the outfits we're gonna have a basic brothers providing that honeymoon supplies by

58:03

Walgreens

c Chris Harrison 58:06

national freedom to marry days organized by Lambda Legal Defense and Education Fund to end discrimination in marriage.

58:12

I think the van is gonna have a national divorce data same day

c

Chris Harrison 58:20

I would slap you but this is National Preservation of human life day.

o

58:23

It's also Sunday.

c

Chris Harrison 58:26

Now it's official. The President signed a proclamation This is national respect life and he wants to go to war. Let's not talk about him. And not only that, but he announced it on Martin Luther King's actual birthday

o

58:45

this is a black on black show bush is not black I'm not talking about

c

Chris Harrison 58:50

I was That's why That's why I had to bring it full circle for he's

o

58:53

nowhere in this sort of well anyway, moving on to black on black subjects. Back to the civil rights.

c

Chris Harrison 59:05

Well, if we're gonna talk about that, and I'm gonna kill my mic,

o

59:09

I know. But now I lost my train of thought thinking about the bush. Bay rustling rustling went on to form one of the major foundations here in this country. The A Philip Randolph of foundation for justice equality, which is located in Philadelphia. He died in 87. From appendix side is it 70 Some years old? 78 years old.

c

Chris Harrison 59:42

Appendicitis in at least that's something nowadays you don't think of as being something that

will cause death something usually or they catch early enough, right?

59:57

But looking at his age and everything now And here's his partner at the time partner I think is like 10 years at the time was named Walter Nigel, who's also Nigel, who's now also running the foundation. So Mr. Nigel is keeping on the work and a dream of the man who actually was behind the I Have a Dream March. This was the man who actually really did have the dream. And reading about his biography, one of the things I found out was the when he first met Dr. King. It was he who had been following the teachings of Gandhi and the nonviolent movement. And it was he who persuaded Dr. King to also teach and to preach this nonviolent movement that later Dr. King became so famous known for one of the things that he knew would make the success of the March on Washington was the fact that it would have to be very it had to be nonviolent no bloodshed or violence could take place otherwise that would mark the entire margin if there would have been violence on that day. It would have totally it would have detracted the message being broadcast was actually destroyed the message that day and I do remember that day and to this day, that was still was it was the largest nonviolent peaceful demonstration in this country that has ever been Hill and just like it was all put on by a gay man Well, I mean, how to draw a party

Chris Harrison 1:01:41

and then keep wondering why we go back to Washington for our marches and such

1:01:46

they got in wonderful reflecting I know anyway,

Chris Harrison 1:01:54

moving I can see you and your outfit out there in the reflecting pool.

1:01:57

Watch it I have a military uniform I really feel like listening to my late at night I get I think I have enough time to get to more of a cutscene now we should be able to so this time, we're gonna let you try to do it. From home.

Chris Harrison 1:02:15

I was my problem is I was in queue. Strange that something was something that sounds like the letter Q. Is it getting the problems? What number would you like to hear now? Or should I just spin the dial and see where we land?

1:02:31

That's fine. I was loved get to do with it. And that one is number four.

Chris Harrison 1:02:37

Scary that's what I had on here. We're gonna hit the buttons now we're gonna hope is gonna work this time. He was picking on me that was the engineer as well. Yeah, I can see with his hat. So we're going back to Tina. We'll be back in a moment we'll see what does love have to do with it?

1:03:18

On switchboard I don't have the answers. Okay. Yeah, speaking of the switchboard, everybody don't forget about the switchboard. It's out there. The Gay and Lesbian switchboard Houston, phone number 713-529-3211. So if you need information about the GLBT community, you're looking for professional information, and information about businesses and organizations. If you need somebody to talk to or if you having a crisis, give them a call. There's somebody there to talk to.

Chris Harrison 1:03:56

And that's now available. 24/7 Yes. 24 hours, you actually speak to a live human being? Yes. And if they can't help you, they put you in touch with the Groggy head that's next to us. Yeah.

1:04:12

I'll put you in touch with somebody who can really help you. But as being

Chris Harrison 1:04:16

of that, can you find that person to help you right now?

1:04:20

No, that's my answer. No.

Chris Harrison 1:04:24

And you have church in the morning?

1:04:26

Yes. But moving on. So whatever you do, get out there and there's a lot going on this week in the community, take part in it. Before I sign off there for another month, I'm gonna tell all my brothers and sisters out there. Just remember just like chocolate comes in all shapes and flavors, but it's still all sweet. Love each other. Give somebody a hug, tell them you love them. And we're going to close out the rest of the show. We're just gonna sit back and chill out on Tina and let her take us out of here for the rest of the night.

Chris Harrison 1:05:05

All right, we will go on to TNA. We'll be back in a little bit again so much we're trying to push the buttons fast if you get it to work, stop, okay. This is after hours queer radio with attitude. And we're going to play a little more Tina Turner for the black on black segment, and we're going to be getting ready then for Zydeco Pasquale, I believe their crew is already in here. Ready to go. And we'll be back in a little bit to wrap up the show for the week. And push that button and here's Martina. That was definitely not Tina Turner. After playing Tina Turner for the black on black second, we went for a totally different change of pace, little country a little twang. That was Jeff Stryker. Yes. Do you know him? Have you seen his films? you've rented them? You won't admit it. You probably have his toys at home. I think we heard a testify on there. Are you testifying? Are you able to Jeff Stryker toy

1:06:48

maybe a tank or two? I didn't know he could say

Chris Harrison 1:06:54

yeah, see? He sings he acts he performs and it's just not. He actually does things. It doesn't require someone needing a towel that afterwards. So that's one Jimmy kinda likes and

1:07:08

did he write the song himself or is written by someone else?

Chris Harrison 1:07:12

Well, let's put it this way. I don't think it's a cover. I would love to see the cover of poppy when the pooper the CD hasn't hit the streets. Yeah, this is an advanced copy we've got

1:07:24

we've been hearing it more and more and more.

Chris Harrison 1:07:27

Well, I almost played him last because he has another song called My Vida Loca. And so I figured it is perfectly Hispanic segment. But one thing I wanted to let people know about as a new group here in Houston, you're not running anywhere you're you're you've got a title in that group. Very simply, everyone knows that. Everyone in the queer community does not fit the queers folk stereotype. And for those who are a larger person like myself, and like big Roy, there is a group here in Houston, the Houston big men's club, which has monthly socials if you're a larger, gay, bisexual male. I'm pretty sure they'll take transgendered males and their admirers, check out their website, Houston, big men's club.com and sign up there and get some information on the larger side of the queer community. And Brandon, you don't speak like us? It's a very interesting group. It's very different. And I will say I'm a member of it. And until they start requiring dues and then I think I'm leaving I'm not sure. But like I said, one of the one of the things about the queer community is we're and that's something we show on the show is that we're not like you see the face you see young Queer as Folk we're not this face you see on Will and Grace, we're not the we're not the pretty people. There's a reason there's a reason for some of us why we're on radio, and wait till we get cam. Oh, God. But that's one of the that's one of the things about what we do here in this portal. What we enjoy doing on this show is bringing the diversity bring in the African American queer experience bringing the Latino experience the country Dyke Show the transgendered segment, I mean, the show was the pioneer for transgendered radio. And that's, that's something to be proud of, of what we do here. And we're very proud to be a part of being allowed to come into your homes and under the covers and wear the headphones hidden in the closet, and I get kind of sentimental on that. I mean, that's how I started listening to the show was a I was one of those headphones speakers in The Night running down the stairs to use a payphone at the apartment complex because I don't wanna use my parents line to call on my first pledge. And it's an experience being out here and it's it's something we enjoy doing it's it's a labor of love you here on here and we may not know how to push the buttons right the first time. God knows I don't and it's one of those things that we like being here to help out everyone in the community. So now that I brought us all the way completely down into a mellower mood after a pop you in the pooper this is after hours queer radio with attitude. And it's KPFT Houston Kate us College Station, and the worldwide web at KPFT dot O R G. If you want to send us any news stories, coming events, love mail, hate mail, Dirty Picture. I can't hit his falsetto. Not even with

Chris Harrison 1:11:09

Who knows I couldn't hit I couldn't hit Jimmy's falsetto with a Jeff Jeff Stryker tool and a bottle of tequila. Anyway, you can email us at after hours KPFT just@hotmail.com. And we are going to close out with Christie Claxton. And unfortunately I don't think this is her dance mix version of it. But we're going to end out with best love girl. And Jimmy hopefully we'll be back if he doesn't catch his normal returning to Houston cold. And we will see you next week. Have a good week.

1:11:50

Can I run a flat say in here real quick for the court. Real quick. Okay. This coming weekend is going to be the coronation nineteen's Thursday, Friday, Saturday, the in town show on Thursday, out of town show on Friday is going to be at the Sheraton Wirkkala And then Saturday night is the coronation itself on the brookhollow We're gonna have a blast, all the money that is raised will go to the charitable organizations. So please, if you want to come, we'd love to have you.

Chris Harrison 1:12:26

Alright, see you next week.
