Because at two o'clock, it becomes three o'clock. And then we're out of here in that on that is very strange. So tonight, only and for tonight only. We are not going to be playing this way out. Because we have this great, great, great, great, great interview with scooter and some guy I don't know. Who is it?

07:05

07:57

Is that how that works? Most of the time? Yeah, I think that's a workout and gave horses on Friday nights at six o'clock. Have you have you heard it? Have you been able to hear it yet? I've been working. Oh, that's right. You said they're unemployed. We'll talk about that later. Oh, well, see, I've been taping it so we can get together. Yeah, yeah, yeah. Okay. Okay. Who's ever calling? Hold on, please just submit it because we have something else to say. Yes, yes, yes, yes. Because I want to make sure everybody knows that lesbian and gay voices comes on at six o'clock Friday night. So if you can't make it set your recorder When else will Yeah. And I also want to talk about how all the programmers here at KPFT work together because the next song we're gonna play, it's called by, and it's by living color brand new. One of the programmers from well, they Jesus trashcan from the dumpster came in and said, Hey, Jim, I've got this great song that you need to, you know, copy and play on after hours, because it's really cool. And everybody's gonna love it. And so when he gave it to me, when he gave it to me, I went to the production room and Bill out nine from St. vibes was in there working and I said, Hey, would you mind you know, just so you know, we all work together to bring for the people. That's right. And so I will shut up and you will get to hear this song by living. The

09:25

people on the phone hung up, Jim, I see.

09:27

Call back. We really want to talk to you. Yes, we do you please stop back. Okay. And so we'll shut her up. Lifting color. It's called by you're going to love it

09:45

Oh, some people don't like you to talk like that. Oh, some people like to shut you up for saying those things. You know that lots of people. Lots of groups in this country. Want to tell you how

to talk. Tell you what you can't talk About what sometimes they'll say, Well, you can talk about something but you can't joke about it. So you can't joke about something because it's not funny comedians run into that guy all the time. Like right because so you can't joke about rape rapes not funny I say you I think it's hilarious. How do you like that? I can prove to you that rape is funny picture Porky Pig raping Elmer five. See, Hey, why do you think they call them parky? I know what you're gonna say Elmo was asking for it. Elmo was coming on to pork. Pork, he couldn't help himself he got too hot on he got home he lost control, he went out of his mind.

manhood things made possible by a grant from the ball pain group rooting for men since 1910.

13:45

This is Scott Lewis rafter hours and with me is Anthony Rios, from the city or county health department, city of Houston, city of Houston Health Department. What's your position?

13:55

They're one of the public health educators in the Bureau of HIV prevention.

14:01

And so what do you do?

14:04

Primarily my work is doing presentations in the community, HIV education presentations and schools, churches, businesses. Wait, wait, wait, wait, wait, wait. Yes, sir. Churches? Yes.

14:18

Have you been to like would?

14:20

I have not been like what? No, I've not

14:22

has any done an HIV AIDS education. presentation at a church at Lakewood Church.

14:28

I'm really not sure. We've been to when the churches that I've been involved with primarily have been Hispanic churches, Catholic churches over the last four years.

14:38

And when you go do an HIV or AIDS awareness presentation in a church, how is that different from one you would do at a gay safer sex party, for example?

14:49

Well, initially when I first started doing presentations in churches in the Catholic churches, I had to speak with the priest at the church and I Ask him what he felt comfortable with and really find out their comfort level their knowledge level about HIV, and in some instances met with the parish councils to let them know exactly what I wanted to talk about to the adults and what I wanted to talk about to their youth groups, because a lot of the Catholic churches have very active youth groups, and I wanted to reach them as well. Most of them, a couple of them were very intimidated by the fact that they knew I wanted to talk about sexual activity, not just heterosexual activity, but homosexual bisexual sex with teenagers, the whole idea of sex outside of marriage was, you know that it goes against the doctrine of the Catholic Church, but as a public health official, always let people know that I've got to talk about or I just wouldn't be doing my job, if I wasn't talking about it. And you do this in schools in schools, right? HSD, North Forest Aldine ISD, all over the greater Houston area.

15:53

Now, how do they let you do this in the schools head to tail Did they let you get

15:57

pretty much in the high school level we can we can say whatever we need to say to get the message across. And many times it's guided by what questions the students ask us, the students will ask us all kinds of questions about sexual activity. You know, we'll do our regular age one on one as we call it in the classroom. And again, you're dealing with 45 to 55 minutes in a class period. So you can't you've got to cram a lot of information into that. A lot of times students will come up after class or after the presentation and ask you a lot of questions one on one. But most of the students are very, very responsive.

16:32

Are you allowed to do a how to use a condom demonstration, for example, on a cucumber or banana or a woody as they call the wooden?

16:41

Right, right? Yes, we are we do kind of demonstrations on the cucumber on the woody on an actual rubber penis model? Do you? Yes, sometimes we do them on our hand. A lot of times I'll do the, the condom demonstration over my fist, just to break the myth that the one size condom will fit all the guys see me put the condom over my fist and then you know, open my hand up all the way and the condom doesn't break. You know, they'll they realize that those condoms are very, very strong. And if they're used properly, then it will be effective. And you know, preventing the transmission and not just HIV, but sexually transmitted diseases, especially with teenagers a big problem right now.

17:21

So you will you bring up two points. One how strong a condom is, and that a man with a larger penis might not necessarily need to buy a larger size condom, if you can open your hand up inside of a condom and it doesn't break. What about the myth of two condoms wearing two at once.

17:40

A lot of people have talked about wearing two condoms just for extra protection. And again, it's going to depend on the people that are having sex on how much sensitivity they want. Because they make condoms now that are extra thin, they're called micro thin, and they are very, very strong. And you can do the same kind of demonstration putting over your fist. I've seen people put them over their head, you know, and they'll fit over the head on their shoulders, and it doesn't break, you know, and they're very thin, and they're more sensitive. But if as long as it's used properly, that's the main message if the person knows how to use a condom properly, get all the air out of the condom. Don't use any kind of you know, baby oil or Crisco or any kind of oil based lube on the condom, and it shouldn't break.

18:23

What should a kid who certainly I'm not here to advocate teenage sex, right. But at the same token, there are teenagers who listen to this program who are going to become sexually active. Could you go through briefly how to put on a condom for someone who doesn't have that knowledge and also, when you get it on? What can what kind of lubricant would this teenager have access to that might be around the house that they can use because you know you said you don't want to use Crisco or baby oil or something like that. Well
