Police Chief Michael Vancouver was suspended for 15 days without pay after an internal profound he violated city policies at a scene of an accident that he caused. Isn't that interesting?

08:41

Under the Influence right,

08:43

nonetheless, most likely,

08:47

and speaking of that inmates in Florida sue over torture claims Tallahassee Florida this is from the AP 22 inmates sued the state of Florida on Friday seen it allowed prison guards to torture them in their sales by spraying them with pepper spraying gas. That is ridiculous. Florida You should be ashamed of yourself.

09:02

And speaking of inmate an inmate falls into judge's chambers while trying to escape into Keturah Georgia and it may find himself before Judge sooner than he expected. When he fell through the courthouse he leaned into the judge's chamber while trying to escape, police said

09:17

and the gateway series not for the Houston team. Local team protest after another city has too many straight players on the roster doesn't make no sense. Houston Montrose, softball league and Houston force created a brief controversy last month at the gay world series when a softball team from Houston accused the team from Atlanta of having five straight players come on Houston grow up. Anyway. Dallas man in jail after shipped himself home and a plane's cargo hold. This is absolutely ridiculous. Have y'all heard this? Let me read y'all the story. Dallas AAP Charles McKinney found a unique way to save a few bucks getting to his parents house he crawled into a wooden airplane crate and succeeded in shipping himself from New York to Texas. Where is it? Are airport security exactly been a bomb? Anyway? After hours of traveling McKinney 25 of New York pried open the crate with a crowbar Saturday morning he popped out outside his parents doorstep in South Dallas suburb of the soda shook the hand of the shocked delivery man and walked away. I might add that he was later arrested because he had outstanding warrants. Isn't that interesting works.

10:23

And also, here's a good note here when stealing don't leave identification. in Muskegon Heights, Michigan, a suspected shoplifter was found when, after dropping a person at the scene of the crime she called police to claim her bag. The woman allegedly set off an antique death alarm and she fled her Family Dollar Store. She dropped her purse in a parking lot while being chased when she was when she went to the police station to retrieve her last purse. She was promptly arrested Hey, I'm like common sense.

10:53

We've got some more common sense here. If otitis a breakout hits concert circuit 25 cases involving residents of nine states according to the Federal Centers for Disease Control and Prevention in Atlanta that CDC for y'all I don't know that the agencies report linked the outbreak to the following three so called jams bands but did not identify them except one group and that is stinky cheese incident and they posted their information on their website. Um, here's another one students scared angry over music lawsuits. This is ridiculous here. How many of y'all have actually downloaded music and y'all can get sued for this? Let me read a story New York City. Anger, defiance and fear were the main reactions of college students on Tuesday after the music industry said it was suing 261 individuals for swapping illegal copies of songs over the internet this will be no sets. The reading Industry Association of America said Monday is sued the individuals across the United States for as much as \$150,000 per song distributed online targeting the biggest users, those with large libraries of pirated music.

11:57

Oh my god, and then Barbie is apparently deemed a threat to morality. Morality by Saudi Arabia's religious police in Dubai United Arab Emirates Saudi Arabia's religious police have declared Barbie dolls a threat to morality complained that the revealing clothes of the Jewish toy apparently banned in the kingdom are offensive to Islam people I mean, who who know what about the candles? I mean, do they find them offensive also just because they have a nice fuzzy kind of the hair it's the hair Exactly.

12:32

The hands off the Barbies having a little

12:36

thing that is interesting. You should hear this next door slightly off center. Take the money and run that and that is exactly what a Gainesville Florida man did. The driver of a Brinks arm truck armoury of goodies a Brinks armored truck apparently took the money and ran James Parker that's his name drove away in the truck carrying several \$100,000 After a co worker left the vehicle to pick up a deposit at a home improvement store. The truck was later found with the engine running in the brinks parking lot. But Parker in the cache remain missing. Parker has yet to be found.

13:09

Oh, he had a master plan. That's why he knew what he was doing. He knew what he was doing. He wanted to get away with it. And hey, it was me. Grimes isn't paid. That's that's all I have to say. But yeah, that's exactly right. Exactly. Oh, Mike. Well, women's remains kept in freezer for years. Oh my God. Where did we get this stuff? It's in Phoenix. A 75 year old man stored his wife's body for nearly six years in his backyard. twisted and upside down an old freezer because he hoped she she could sometimes oh my god, I'm gonna be brought back. Yeah, exactly. I'm like, Okay, well, I'm like under kind of kind of understand that water science here on my cryogenic freezer. There you go. Thank you.

13:48

That's not good. Grandma cremated let's put her in the freezer. Freezer in Twizy with her legs behind her back and everything. So she can

13:57

go back and make some cookies. Okay, grandma,

14:02

okay, here we go. Borrowed County, which is one of the Ground Zeroes during Florida's 2000 presidential vote counting problems has done it again, mistakenly failed 6559 public school students in June due to what is later called a computer error. They failed those poor kids they miss counted, again, work school officials called the total count of students affected small number. Whatever.

14:30

Yeah, it's my very minute.

14:32

Sounds like somebody didn't finish school.

14:36

That's our good state of Florida. That's Jeb Bush. And he's, he's so cantar. President. Yes. Which brings us to our next controversial topic proposition 12 Can you believe this? What kind of crap is this?

14:51

I know it to

14:52

where they take away somebody's rights. I mean, I mean, they're they're saying they're, they're they're using this is because well Let's keep these these bull these crap cases down, you know, let's keep all these whatever the word is frivolous lawsuits down, but they're not looking at the ones to where an MD comes into the operating room and he's purposely drunk and he operates on for innocent grandpa and Grandpa dies and all I can get his \$250,000 If I decide to sue No, no, that's That's crap. That is our politicians doing that. And I think it should be up to our courts. That's all that did is took away the rights of our jury. That's all this is done. And this is crap crap crap crap. What is Texas thinking?

15:36

What was the percentage on that? 98% 98% 98%

15:43

And that's why it's important for everyone to vote make sure they voice their opinion, even though you think it doesn't matter. I mean, you think you were one vote doesn't matter, but

15:53

that one vote does count. And this is this this whole topic is really really controversial, and I can't believe that it even pass I thought that Texans had a little bit more sense than to think, but we can just pass this bill. This is absolutely crazy. Y'all are ashamed of yourselves. I'm

ashamed of yourselves. I'm ashamed to be a Texan right now because this is Crap. Crap, crap crap. And I'll say it again. Crap. And if you don't like it, call and talk to me. 713-526-5738 or 713526 Easy to remember five to six KPFT Houston jam KPFT 713 Jam KPFT That's right. He is the Assistant Director of Barbara Davis. Welcome, Paul. How you doing, Paul?

18:29

Thank you find Mike. Good morning. Good morning, my friends. Those of you still active at this early hour coming from or going to an emergency call regular duty or coming from one party and going to another. Now that is not easy. Again, I'm Paul white, associate director of Barbara Davis gallery in Houston. In this short segment, I would like to have a dialogue with you about the modern art. In fact, this wouldn't be proper dialogue. I will conduct most of the talking and you will do most of the listening you see works like this you know sometimes it is very fascinating to me to see how we came to a close circle. You see we started 1000s and 1000s of years ago 10s of 1000s of years ago to be precise by painting and drawing sticks and lines and dots when our cave walls. Then we got better and better until we could paint precisely a tree exactly like the tree we had in front of us. Then something happened. We went back to lines and sticks and dots. And those kinds of paintings we see today they sell for 10 or \$20 million. See my friends See, this is not craziness. This is something truly to be respected. After a certain point in time there was a an apparent or there was rather no apparent need to paint a tree exactly like the tree we had in front of us. There was a need what a drive to paint what would Barbara Davis would call the essence of a tree. Artists broke away from the Orthodox

representation. Shortly after the turn of the century, artists along with virtually any other professionals, be gone. Like what my good doctor friends psychiatrists Leo Burrell will call thinking outside of the box. But it would be interesting to see all this started and buy home. In the early part of the 20th century, literary artists reviews were a primary means by which the creative community exchanged ideas and remained in communication vehicle for promoting emerging styles, establishing new theories, and creating a context for understanding new visual forms. This review played a pivotal form in forming the spirit and identity of movements such as dada da da, and surrealist and serve to spread their message throughout Europe and the United States. John R. Richard, who's in back Marcelo yanco. Sophie Tobler and Tristan Zara were among the artists and poets who represented and began gathering at the Bowles Zurich stubborn. From this diverse and passionate group, the data revolution was conceived and fueled, as German artists Hans Richter recalled, there was a highly charged atmosphere the Cadbury that united with diverse group and common goal it seemed that the very incompatible if character origins attitudes, which existed among the data is created the tension which gave to this fortuitous conjunction of people from all points of the compass, its unified, dynamic force, united in their frustration and disillusionment with a war and they're disguised. With the culture that allowed it. The data is felt that only insurrection and protest could fully express their rage. The beginning of data three, Stan SATA remarked, we're not the beginnings of art, but the disguised as Marcelli inquiry called we had lost confidence in all Karcher. Everything had to be demolished. We will begin again after the tabula rasa after we start again from zero, but the Cabaret Voltaire will be gone by shocking the bourgeois demolishing his idea of art, attacking common sense public opinion, education, institutions, museums good taste, in short, the whole prevailing order. Through uproarious evenings filled with noise, music, abstract poetry readings and other performances, data began to voice its aggressive message. While data evening soon became notorious for insurrection and powerful assaults on arts and bourgeois culture. It was through data journalists that the news of this development movement reached all corners of Europe and even the United States. In 1970, and after a year of data, evenings and data, my ham Cabaret Voltaire was forced to close down and data group moved their activities to a new gallery on Zurich's, Behan, Froslass shorter after the closing of the cabaret ballet left Zurich and the Romanian poet Saara took the others direction and ambitious and skilled promoter Saara began a relentless campaign to spread the ideas of data. As wholesome back recalled as data gain momentum. Saara took on the road of profit by bombarding French and Italian artists and writers with letters about Dallas activities in sorrows hands. This Romanian poet he declared that is achieved the great triumph irrelevant with widely managed imaginative Tara was to emerge as dadas potent leader and master strategist.

28:51

yeah, that sounds great. Okay, you've been good little reminder, folks. You're listening to the Morris KPFT 90.1 Give us a call 713526 KPFT I'm remind y'all so at the end of the end of the show, we've got a live broadcast coming up from Pacific Street. It's called street smack. Chris and little ale gonna be out on the street finding out exactly what is going on at this early morning hour. It's 3:33am. And now we're gonna go to Lewis. Lewis is going to give us a brief introduction about STDs. We're gonna call it a quick, honest. And also, Lewis was fortunate enough to get Dr. Duncan. Dr. Duncan gave Louis an interview. Tell us about that interview, Louis?

29:38

Yeah, I think that the the folks in the city of Houston, this sexually transmitted disease deserve a lot of credit. They don't get much they should. And in addition to the traditional STDs that we're all familiar with, like chlamydia, syphilis, and gonorrhea. Dr. Duncan has brought from his private practice the idea The year of using liquid nitrogen to treat venereal warts and pregnant females. This was a tremendous problem. Yeah. And before Dr. Jenkins joined the city, they had none. And he brought the idea in and now they're just doing it as a matter of course. So I was fortunate enough to get a few minutes of his time just so you can, you know, hear His voice. And he's talking about talking about the clinic is just a couple of minutes. Okay, and then I'll fill in afterward.

30:25

Okay. And this is Dr. Duncan.

30:29

Testing one, two.

30:34

Okay, well, it's supposed to be Dr. Duncan. Where are ya? Dr. Duncan, you there. It's a common, it's a common just hold on boys, and girls and children of all ages. Maybe we might have a little bit of Brian's But Dr. Duncan. So I thought that was right at the beginning of that tape. A Yes. It was supposed to be. It's supposed to be anyway. You're listening to KPFT the Morris. We're gonna have an interview with Dr. Duncan. He's at an est. He's a doctor, he specializes in STDs. If you're just joining us, Lewis did the interview. And

31:09

well, if it's not on the tape, I'll just repeat it from memory. We'll just

31:12

go from memory. Tell us about it. What exactly does Dr. Duncan do and who is he employed by? Okay, he's,

31:17

he's one of the clinicians that works in the sexually transmitted disease unit. And he's on Breezewood southwestward kind of Medical Center. And so if you go down Holcomb paths fan in here and go down to separase. Where there it is, it's on the left, okay, so it's pretty easy. And they work. Basically, the clinic is like Monday, Wednesday and Friday from 10. Until about three, okay, so with four clinicians on staff, one of whom is 80 years old, and interned and worked in Jamaica for for many years. Dr. Titus, he's there. And I went in and I started thinking about was, if you'd notice any change in the last 10 years as to the mix of diseases that he's been presented with, and he said, No, pretty much things have things have kind of stabilized. And we have periodic spikes in syphilis and gonorrhea.

32:12

Why don't you tell any listeners that don't know what STD stands for? For sexually transmitted diseases? And how exactly can somebody contact an STD a sexually transmitted disease?

32:23

Well, the primary methodology of course, is through bodily fluids. Okay. However, there are instances where skin to skin contact is sufficient.

32:32

Okay, and what what are the words for general words, okay, and

32:36

they are a tremendous problem we pray in pregnant women.

32:40

Okay, so what if, what if I contact this and where to where would I go, and I don't have any insurance or anything like that. And I'm broke. And I don't I don't want to embarrass myself, I don't want people knowing is that confidential, we're all

32:53

for the STD clinic. It's not based on income. It's not a sliding scale. It's a flat fee of \$3 for an HIV test and \$3 for a test anything of any other kind of like darkfield culture for syphilis, for

example. RPR, which is a blood test that will tell you if you have syphilis, or gonorrhea and that sort of thing. Mha MHA will also tell if you've ever had syphilis in your entire life,

33:21

is it confidential. It is not

33:23

confidential. It's not confidential, you have to show identification, okay, and bring \$6 and bring stuff that is not confidential. And state law requires them to of course, you know, catalog it and to collect statistics and that sort of thing.

33:38

Okay. Um, tell me how I can how I can contact this clinic?

33:43

Well, the telephone number is 713-794-9640. Okay, and

33:50

you have a website or anything like that.

33:53

Well, is the city of Houston's website has the link to as the link

33:57

to the site. Okay. That sounds really interesting. And if you're just joining us, we were speaking to Louis, and Louis had an interview with Dr. Duncan. Dr. Duncan works over the STD clinic and works for the city of Houston. Is that correct?

34:10

Yes. And another thing I wanted to mention is that Riverside may be opening back up in the next year, it had an asbestos problem. It's been closed for like two years. They had their own STD. Yeah, exactly. Exactly.
