SUMMARY KEYWORDS

people, talking, transgendered, hiv, matchmaker, drug, free, side effects, sex, transgender, problem, pay, hormone treatments, give, love, thought, song, female, person, happened

SPEAKERS

Roy, Bobby

00:00

underwriting that I myself specifically have not started anything because I'm flat broke. I'm working on it. But there's numerous ways to go about this, you can either start medical hormone treatments, which is prescribed by a doctor. That is the most powerful hormone treatments you can get. There's also a herbal hormone treatments which are a little cheaper. If you're in the Houston area and you go to the magic cauldron, they do have books on this type of thing, or stop by Whole Foods or any place that sells herbs. You want to find a place that sells a lot of them. And I'm not talking about weed guys. No, and you go in there, they'll what you want to look for is herbal concoctions for PMS or menstrual periods. Anything that will help your body create female hormones on its own. This is usually best to use as directed by them. There's also you can go by Gene C. And if you start using the breast enhancement pills, it is also another way won't do much but give your breasts but your body will start making the estrogen which is needed. And wouldn't it be more it would be better to suggest that everybody go to see their doctor before they try doing any of these write these treatments at home. One thing you want to do is you want to get as much information as you can before you try anything. What I suggest is really what's this apparently we have a caller I have a little light flashing over here. That's I'll do it in a second. What are you doing? No, I suggest you what you do is you want to get as much information as you can. If you if you have the internet, go on the internet look at herbal remedies for any type of menstrual or female hormone oriented problem. They will give you a list of herbs. Take that list to your doctor, get checked and see if you're allergic to any of them. Talk to your doctors ask if it's best to either do the herbal or the medical option. I will warn you ahead of time to do the medical hormone treatments you must be a female for two year, two years or one year. I was looking at I'm looking at the space in front of me because they can't see me but what it is is you do have to be a female for a certain period of time. The hormone treatments last for six months before you do any surgeries. And I will warn you it is not an easy thing to do. It is painful for some people. You can also get checked. You might want to suggest your doctor to have your yourself check to see if you have the triple chromosome which means denotes that you are genetically hermaphroditic, which means that you're genetically hermaphrodite. For those that don't understand that. And for those who don't know what a hermaphrodite is that they are born with both sets of sex right

sexual organs but technically hermaphrodite does not mean you have to be born with both you can actually have your chromosomes which is your genes have both in it but you can be one or the other. Yeah.

 03:19

Is intersex another word for hermaphrodite basically,

 03:25

okay in some circles, but with the circle I run in which is GG, which was last weekend we tend to go with hermaphrodite but I liked the way Scott put it the other day. Yeah, he said multi gendered love that fits so well with the world today. And it's so nice just rolls off the tongue.

 03:51

Why are we having a break in the conversation here from it? We're

 03:53

gonna take a real quick break because I have to find out for something and we'll be right back with Kim and the young trends. Transgender segment. We'll be back in about three minutes. Okay. 30 minutes.

 04:07

Girls, we don't have time to sing the next song. We have an appointment with Yenta Oh Yenta the matchmaker no honey the other one Yenta the gender reassignment surgeon? Maybe she's brought us something special. Oh

 04:27

matchmakers matchmaker. Make me yes match. I'll be reassigned open my hatch. matchmakers matchmaker, looked through your book and made me the perfect matchmakers matchmaker. I'll fight for a good search and not out on fling off my thing does I'm longing for pain as envy towards guys. I thought Oh Mama, I'm a queen. Not a king

 05:01

for me. I'm living in squalor so

05:07

matchmakers matchmaker make me a snap. I feel confined, please. disattached matchmakers matchmaker and both my new look and make me the

05:19

top snapmaker snapmaker make me define my night after night with my partner made me a snatch my

05:37

tears Wait, have you been interested in snatches when he thought you only had your eyes on your book? And you you have your eye on the rabbi's vagina?

05:47

Well, why not? But you only have one rabbi and he only has one vagina. Why shouldn't I want because you're

05:55

a girl from a poor family. So whatever you have to brings, you'll take right? Course right? Snatch maker snatch maker you know that I'm still very hung. Please take your time. Till this minute I misunderstood that I could see that shirt gentles Manber with attention and pride. I'm tired of dressing like them. It Up Batsto are you so that's that's makers that's maker I am concerned what I trade and can't be returned paying for snatches girl can get

06:53

Rumi now Master Mind No

07:05

Baba Baba Yaga Baba Baba Baba All righty. That was not my fault. I repeat that was not my fault. Jimmy came in here told me to play that song so he hasn't played about that song directed it Jimmy. So by the way, that song was a happy song. It made me want to visit the snatch

07:35

this isn't your segment. This is kin that was Kinsey six six in the city is the name of the album and the song was matchmakers matchmaker. And we're back with the young trend Tinder segment with Kim and as Robin Robin Yeah. We were talking about song just fits so well with

the segment for that one word. I'm not gonna say the word don't worry about it. And so anyways, we were talking about the financial ramifications almost. Yes. financial ramifications of going through the transgenders the the one thing you have to pay for it, you have to pay for the hormone treatments, you have to pay for the doctor's visits. You have to pay for therapy sessions, therapy sessions, which are psychological therapy because they want to make sure this is what you want to do. They will not do it. If you do not do this because they will not give you the surgery and want to want to change back then you sue them. They don't want to do that. Because already getting enough money for me as it is. There's also the fact that you have to pay for the final surgery now most transgenders that I've met have the older generations pay this piece by piece they take it one step at a time and pay it as they go. I have met transgenders that have paid for the whole thing kitten caboodle, but they're not usually the ones paying for it. It's usually their sugar daddies or Mama's whichever happens to be. And just to let you know, out there, boys, girls, it goes both ways. Girls can become guys. Most people when you say transgendered, think of a guy becoming a girl. But ladies, I'm telling you, if you think you might want to be a guy, it can be done. It's the same process just in reverse. You start taking male hormones, then you have certain things removed and replaced and inverted. And you basically become a man now, there are probably young transgendered females out there that are hiding themselves because they get more, more. Well, what's the word I'm looking for more trouble. Then the males or females do. I can't think of the word Well,

 09:54

no. What are you male to male. Once they start turning over? It's So according to the male mode, it might be easier for them to garden world and it flipped when they try it. That is because a lot of street women don't want to change over to kind of look like men and dress like men, but they still steaks.

 10:14

We have leather daddy in here last weekend on was she was so much fun. And usually

 10:19

what happens is when they change it from a woman to a man lot of times they just get mistaken as a dyke in lunchtimes, they get assaulted easily, then it would be a godsend.

 10:29

Step moms like that. Have you? Have you found it to be easier to what is the word I'm looking for? Like not really hide the fact that you're you're going through it and everything is easy, too? Would it be easier for you, you know, if you just disappeared for a couple of weeks and came back as a woman? Or are you thinking it's going to be easier to slowly transition everybody to you be honestly to disappear for a couple of like a year and come back as a female would make things so much easier. Except that that doesn't happen in this day and age. You can't do that unless you move to Europe or a teacher that did she left as Mrs. Anderson and came back Mr.

Anderson. I know but she probably went on over to Europe to get it done because in Europe in Canada it's covered by the government Yeah. Which I have tend to do move to Canada and become a dual citizen there so I can get it done. Because then I don't have to pay

11:26

for it. Yeah, unfortunately now had it in United States Yes.

11:29

And see this is one thing that I would love to start a petition for is to get the US government to start paying for this like the other countries because then you would have a lot of problems well then again, the US government's so tight that it can get beat.

11:45

Okay, I'm not gonna finish that. Please don't win it. What was that your Woody Allen impression? A little like Woody Allen there for a second. Okay. What were you gonna say? I don't know. I forgot. You stumped me with a brain fart. Actually was a brain burp actually. What happened if you're going to talk talk into a working my I turned it off for a reason. So back on, he's cute. I agree. But I get that but what

12:31

is wrong with it's a nice but well, yes, it is. Okay, I'm not gonna finish that. I'm more interested in what's in the other side of it then.

12:44

Right now. Okay, we're getting off subject here. But it's such a nice subject. Yes, it is. A wonderful specimen. We've chased him away. Yes. Oh, gosh. Anyways, how much there's a pain in the butt when you need it. No daydreaming not yet. The financial burden on you has on on most the financial burden on most genuine transgendered is quite heavy. I mean, I know it's not like we're all living in TV land where we all have the rich parents who just the rich understanding parent, you know, the ones facelifts in our nose. There there are people I wouldn't be surprised if there's politicians out there who have paid for their children to go through this when they were 18. Then they paid for them to go away. They buy him a condo is like if you've ever seen the movie. Which one is that? Rome better than chocolate? Yes. Wonderful, wonderful. Tea. In that movie. Her father paid her off by buying her a condo and paying for her surgery. As long as she never you parents out there who are listening to the show who have a transgender kid, do not do this. You will regret it. Because when you lose a child is the worst thing that can happen to you. Ask anybody who's lost one. But anyways, onto a happier note. The financial burden of I know I keep harping on this, but it's like the only thing I've got it. But the financial burden on just like the financial I've we've covered the psychological or well covered psychologic psychological, physical impact. There's actually one

subject that most people don't talk about is the fact that it is very scary to admit this to your friends. If you've had friends that have known you all your life. And you tell some of them this they will leave you and never speak to you again. Well, you

14:48

don't need those friends. Yes, that is true.

14:51

But here's the thing though. There are kids out there there are children under 18 There. Let's see what was it three years ago, a 15 year old went through the transition to become a female Well, legally, parents sign the paperwork and everything. transgenderism can come from birth. It doctors do it all the time too. Well, they don't do it anymore. Because it's not legal anymore. It isn't at least i g i need GG for that one.

15:19

I don't believe it is illegal. Well, well,

15:22

no, they are doing it. I know that I know that the amount of the parents consent whether my understand for night one or the other. I understand the general rule of thumb. Now for most hospitals when a multi gendered person is born, that they tend to wait until they're older than 10 years old to see which way it develops, then give the child the decision. Or the parents. They should do that with circumcising, but that would be on cruel and unusual punishment at that age. The Israelites went through it when they were in their 50s. Okay, we're not going there. Right. As you heard a collective out to crossed our listening base, oh God, we need a sound board seriously. So the physical, the emotional and the financial part, I don't want to really say burdens. But bolt aspect is accurate there of goings. But their burdens don't have to be bad. I will tell you that from the start because you can have a sexual burden when you're doing stuff like abstinence, which is okay. In most situations, if you're going through a transition, if you're taking the hormones, and you're developing, I would suggest that you hold off for a little while until you understand which how the development is going to affect you. Because you will start having some people have mood swings, some people get tired, some people get nauseous. There's many side effects to changing your hormonal balance.

16:58

I had some written on my net that her parents know about that, you know that they knew they still friends with that person, but that person went through a real deep depression for about a year. So

17:10

depression is a very high risk for this sort of thing because of the fact that the world does not really accept us all that well. But I will tell you this the funniest thing about being a transgendered is the lesbian community loves us. Seriously, I think it's the most interesting thing because I have yet to meet a lesbian that does not say, How are you doing? When I say I'm a transgendered? And it's like they they just open up completely. It's like the leather Daddy that was in here. Last Friday. I told her that and she got a big ol smile on her face.

17:44

sat on my lap. Here was a high one. Oh,

17:48

God, I love leather. It was last week. Or was it? No, we just it was GGS but we had the leather the what is it? Montrose leather daddy came in? Apparently her brother was allegedly it last year. And she is the one this year? I can't remember her name. I sure would. I'm sure we'll talk about it next week on leather line. More than likely, I'm sure she's listening right now. Oh, maybe

18:16

coming down here next weekend.

18:18

I'm thinking about coming down every Friday at this time. I mean, it's so much fun. To touch on the you're saying about brain fart? Oh, excuse me, transgender, it is still listed in the psychological DM for so most medical benefits if you're working for larger company, a lot of the medical health insurance will take care of the and pay for the surgery. That's correct. But you have to work for a company that goes by that policy if Walmart does not need their do most of the larger companies, smaller companies like like if you're over 21 and you get a chance to work in a lingerie store, or any of those type of stores that sell laundry or sex toys or anything. You will be surprised how willing they are to help you through this financially. Because they are very open to the GLBT community because 90% of their customer base is us. 90% of their employee base is us. All the little gay boys go to stare at the straight boy now see, what's really interesting is I found out something interesting a month ago. I've only been at my school for a month and I found out that the majority of my school is GLBT you said you're in the medical field. Right right. I'm going shy for the first month and see it's like shooting fish in a barrel man. We have lights flashing here. What are they? They know that's telephones there. They know button. The other is Is anybody calling in to speak? We'll get to know just as a door if they are Yeah, they'll Let us know if it's for us or not, I have to call us. The number is 713-526-5738. Please do I'll answer any questions the best of my knowledge or will look on the internet and find it. feel about the I know within the gay community, I can't quite speak for the transgender community because I'm not transgender, but within our GLBT, Qi, S, T, whatever. At the end, I

know between the gay lesbian and bisexual where we're very divided, we try to unite as one but and then there's always that the T on the end. That is, what is it from what I hear that was actually thrown in to make us happy? Yeah, I'm hearing this from the older generation. And I know that the younger gays and lesbians are more open about what we are. As I said, this, this falls into hence the reason for the segment young transgendered because older generations don't quite don't ask, I was attacked by my ear headphone for older generations seem not to agree with a lot with what the younger generations are deciding about the education wasn't out there. That's right. There's a that the information for tease of the older generation, it was a lot harder to transition. Because the surgeries weren't as advanced as they are today. I mean, you can go over to Japan and get a complete organ transplant to become a female, although you end up having a really weird skin color down there. But I mean, this is how advanced we're getting darker down there. And basically, this is this is how advanced medical science is getting. You can go over to Japan or I think Switzerland is considering doing this. And it's just it. What happens is when we have a note is this. I want to call her. Oh, we got one. Oh, good. All right. All right. Let's get her on. Let's see if we can figure out what am I supposed to press here? You don't press anything you leave? No. Okay. Okay. Please be gentle. That's what it says. There we go. Hello. cheering you on the air.

22:15

Karen, Karen's not on. No, you don't have no one yet. You gotta push

22:18

them. The other one

22:20

there. Yawn. Yeah,

22:22

there you are. You can Hi.

22:24

I'm listening to the show, obviously. And a little while back, y'all were talking about? Can you turn the radio down? Yeah, is that okay? Now? Yeah, that's good. Okay, anyway, and y'all were talking about the circumcision and how the Israelites had to wait till they were old to have it done.

22:44

No, no, no, what it is is when the Israelites first started circumcision, everybody had it done.

22:52

I know but y'all all like had a collective flinch at the thought of being circumcised when y'all were older. And

22:58

I didn't get it done.

23:00

I know but what I'm saying

23:02

is the other one flinching was David the control guy. Okay, well,

23:07

I was just wondering because if y'all were all born male wanting to become female No, no,

23:11

no, no, no, no, I'm actually the only one in here that is that we have a female who is Robin David is a male and so is the other gentleman. Even Steven good looking at that. Anyway,

23:21

I was wondering why they was just a little skin coming off when they want to have the whole thing cut off.

23:26

Well, actually they do not cut it off man. What was your name again? They do not cut it off. What they do is they slice it and then they turn it inside out.

23:36

It turned make turning into a vagina right?

23:39

They actually do not waste any of the materials. The entire penis. We can say that right? Yes. Okay. Because the entire penis is turned inside out and turned into a vagina

23:52

because actually Dinah's actually made I just say materials anyway they used

23:57

to do that they used to do what you said and then just add skin but this that was the older methods nowadays they've learned how to keep the sensations and everything right there's also reconstructive surgery has become very advanced as of late for because of people who've been shot in the face and other very harsh conditions that have happened to people oxygen on the channel oxygen had a very good a lot of this Discovery Channels had a couple of times, Discovery Health there if you want to type in transgendered or transsexual on the internet, and there's sites you can go to that'll explain it to you.

24:39

And the other question I have is, like you said, they take the penis and turn it inside out to make it into a vagina, right? Okay, they want to make a vagina into a penis because they might add as it

24:51

is, they remove the uterus and the ovaries then they take the vaginal canal and they turn it inside out and create a penis from it. Okay, ever reactions

25:00

naturally, the same muscle,

25:03

the same muscles that are in the vaginal canal or in the penis. The only differences is when they're in the vaginal canal. They constrict. And when they become a penis, what they do is they put it, they attach a tendon that causes it to become erect. Okay? It's just that one tendon that changes it. Other than that all the materials is basically the same. As I said, I'm becoming a medical student and biology and reproductive organs is one of the things I'm learning. Okay. And this is basically what they do. It's the same thing like severed arms and hands where they

reconnect the nerves. They do the same thing with the tendon. It's basically a tendon does it run along the top or the bottom? I can't remember. bottom bottom. Yeah, it runs. It's along the urethra. That's right. It's between the it's between the urethra and

 25:50

go to your second or third, which is your first or second trimester that everybody's a female. And then after that they Yeah, it's

 25:57

a certain it's much earlier. Yeah, what it is, is there's a certain chemical reaction that causes you become male. But then then you have people like myself, who genetically have the three chromosomes, what happens is, is that we are actually both at birth. And when that time came, our body chosen one or the other. And believe me, I wish it had gone the other way.

 26:21

You mentioned your mother is a transgender was your father became your mother, your mother's? Yes.

 26:26

For those in the transgender community, they probably recognize my mother. She is one of the boards for the transgender community. Her name is Rose wall. And she's very sweet. And I love her to death. She is biologically she was your father. Right? Okay. And she's not fully done because he's, as I said, is very expensive. She has the final surgery she needs to get done, and she's waiting to get money together for that. But being in the family I have, it's not exactly been any easier than most people who have, you know, regular parents. Because neither of my parents are normal. Having a lesbian or transgendered father.

 27:13

Sounds like Chandler on friends. Better pants. Okay. Well, thank you very much. Thank you for being here. Thank you.

 27:24

And if anybody else wants to call in actually we're going to have to wind down we're running out of time. Okay, let me wrap up real quick. Once again, my name is Kim wall. If you have any questions, you can email me at radar. Radar 20 two@yahoo.com That's R a d o r n 22. I will guide you to websites that can help you with this. I will also answer any questions to the best of my knowledge. If I don't have the information, I will get it for you. I can also connect you if

you're in the Houston area to any of the trends tutored support groups that exist, I can connect you with the GLBT community center. I can connect you with the radio station and just about anything else I can help you with. And thanks for having me.

 28:15

You want to say good shout out Robin. Oh, well, I just want to take a Shadow Fall bisexuals out there?

 28:24

Oh yeah, one more thing. Any of you kids out there that are dealing with drugs or alcohol or problems with too much sex and believe me, this is an addiction. Sex can be an addiction. I also am a peer counselor for addiction addictive behaviors. I am a peer counselor for by gay lesbian and transgendered Young. Those of the younger generation I am currently helping some people through this time those that want to come out and don't know how or afraid to suicide is not the answer. Please contact me. Also there's hatch. Right there's hatch there's, there's there's no others hatch for the younger kids, the Houston area teen Coalition for homosexuals, which is the right word, but there for those of you out there who don't want to get into a large, large group or large group or something you just want somebody to talk to or to hang out with. I am more than willing to do that. I do that with three people at this time. A mother her and her son have come to me on numerous occasions. This is something I do for free. It does not cost you anything in our community, we have to help out everybody. That's right. I don't charge anything because you know what? I've done. I've been there done that and still dealing with it. All right, thank you, Kim. That was Kim and with the young transgendered segment we're going to take a quick break and I'm gonna fight with my mic some more. It's on Viagra I guess so it keeps popping back up. taken hold Oh, damn song Get a quick play a quick song as you can hear Chris is in the background background griping as usual. We'll be back in a few minutes and I'm sure Chris is gonna kick me out of here now so here is the Kinsey six drag apella Oh, that's great. And the name of this song is proud Mary's

 30:29

rube Hall coming out of hiding. You're listening to after hours queer radio with attitude here and listener sponsored commercial free Pacifica radio for the Gulf Coast. KPFT 90.1 FM Houston 89.5 Galveston and always in the World Wide Web KPFT dot o RG their mics aren't on Yeah. The whole journey.

 30:51

Okay. Am I on now? Sounds like it. Okay. I can hear you. That would be KPFT Weston.

 31:00

He was in there.

31:02

Sort of kinda. It was

31:04

I said everything we need.

31:08

A couple of things I want to do before we get to the roundtable. But I guess this could be part of the roundtable because we discuss a whole lot of different things. I see why each calendar that we didn't bring you in earlier in the show. This Wednesday is the last chance to enter the space city idol contest that will be at Mary's at 8pm. And that show it's a jukebox show be a fundraiser for IC o Ah of course next Saturday night is the P and P ball hosted by Scott and Marcia. And that will be at Rich's starting at five to 9pm. And on the 21st Sunday THE 21st THE COLT 40 fives bartender at EJ is four to 9pm Stop by have a cocktail. Give them a little tip it all goes for you or give them your big tip. Whatever. It all goes. It all goes to where the call is called 40 fives. Of course then the next Wednesday is the space city idol competition at Mary's at 8pm. And on the 26th There's a show at Mary's at 9pm Elephant Walk with that show was brought to you by the current and permissive ich. Miss earthquake that explained Yes. Doo doo doo doo doo doo and 27 back from Safari, part two hosted by Imperial prints. Mark Cohen and you

32:52

wonder why the Republicans say that homosexuality is the gateway to be sociality. Hey.

32:58

I do want to

33:02

your mics on okay. I don't know why I put it on but your mic is on.

Roy 33:06

I do want to remind people that didn't get to see our own Chris on Saturday nights over at the ripcord wrong no for what happened Friday night Friday night first and third first and third. Friday making that burgers cooking his meat. You can see Chris's meat is meat that sizzlin meats

33:29

and last week wasn't it last week we have theater suburbia here and cheese tried

33:33

to sleep since then.

33:35

Yes

33:38

that's right because I have a dean and asked him to bring over a medicine supply for me

33:41

Chris with a more proper question is what we did they not show up.

33:47

We had no we had a full house last week Sure

33:49

did. Anyway,

B Bobby 33:50

it was a busy week we

33:51

put a revolving door on it yeah, we've already from someone's bedroom I don't know who wasn't your what happened to that

B Bobby 33:59

anyway because you know with you out of town

 34:03

he is presenting caught in the villains web that's their annual Mellor drama that's that's the one where the villain where's the cape black black cape and top hat and you get to throw popcorn at the villain are very deadly do right yeah. Boo the villain and swoon for the heroine and for the

 34:25

for the safety of the cast. Yeah, combo popcorn will not be available.

 34:31

Right that's playing through August the 27th. And there's a very special deal going on. If you want to go see this and you should because it's a whole lot of fun every Friday and Saturday night through August the 27th. Call make reservations and tell them that you heard it on after hours and you will. If you know for every ticket you buy you'll get another one free

 34:55

for the first time after hours features BOGO There

 **Bobby** 34:59

you go. Bogo, buy one get one. Oh,

 35:03

yes. And that number for reservations is 71368235257136823525. Like I said, tell them that after you've heard it on after hours and you get a free ticket for everyone you by Merlin is here. Yes,

 35:34

I am. And Joshua

 35:35

was here. Yeah.

35:36

Merlin celebrating one week of not being mentioned in LSA. Oh, you missed all that.

35:44

Oh, I heard about it. Although

Bobby 35:46

I have had 50 People say, tell me, have you seen your picture and outsmart No?

35:51

Yeah. Okay. Anyhow, anyway, Marylyn or resident pagan? He Yes. And Joshua was here. And your dad is a resident

Bobby 36:01

something.

36:05

Yeah, your dad's just finished writing a book. You were just telling me?

36:08

Yes, my dad, it's in the publishers now being year and a half in writing and publishing and trying to get it published. And it's based on Okay, wait a minute, what's the title, dark arts of immortality, transformation through war, sex and magic, wow.

36:28

And it's about it's

36:30

about obtaining kind of a personal immortality through renown, and the deeds you do and things you can do to kind of make it's kind of a mix between a self help book and philosophy, a good mesh of things you can do to like, things you can do through willpower, which would be the magic side to make yourself better person and get yourself closer to what more of what a

dramatic sense of what immortality is, and then fighting through making yourself someone who can be physical, you know, not like going out and killing people, but just being one with your body. And then sex being you know, the ability to be who you are, and express that in a physical means with another human being. Yeah. And meshing all those things and combining them in a way to make yourself the best possible person you could be thus giving you the best opportunity to obtain whatever possible immortality there is.

 37:33

I think your dad is the best possible person he can be. Well, I guess just

 37:38

does it all. He's one of the few people I can actually say I've seen him practice what he preaches. He's done martial arts for the last 10 years. He's very active and doing the mental part of not necessarily casting spells and stuff, but working on his willpower and things that he wants to do. And it said, setting goals is a major part of using your willpower to get the things that you wish to achieve. By then the sex part well, very important. I bet it has a contract that's Trojan and they just send them pallets of it.

 38:18

Yes, no, I think it's sexes. Were a funny country where we say we hate violence, but it's all around us and our movies and, and TV.

 **Bobby** 38:36

And we say we hate sex, but you know that sex is evil and sex is all these other things. And yeah, it's all over the place. Yeah, in our marketing. I mean, we don't have to go.

 38:48

Well, that's a it's kind of a contradiction in and of itself. It's like sex sells yet. As long as it's not real sex. Yeah. As soon as someone accidentally shows a breast whether it was purposely or not on TV, everyone gets all huffy.

 39:04

Which is so ridiculous.

 39:05

They say that by the time you're 18, you've seen over 200,000 people killed for real or fake in

any kind of form of media. You show one naked woman

39:17

and you go Oh, my God, you're going to Hell yeah.

39:19

And that's ridiculous because sex is very important for your and it's for your well being. And

39:30

I think the country has it's so backwards at this point. I almost wish you are dyslexic Yes. Yes, everything will make sense.

39:36

If people have more sex in this country, they I think they'd be less ill. You know, what

39:42

part is? The whole pharmaceutical industry is not a health industry. It's a sick industry.

39:49

Yeah. Yeah.

39:51

That's another

39:53

one. Here Merlin on I was

B

Bobby 39:55

I was while I was. My original thought was going back to the idea you were talking about willpower and things, you know, using one's willpower to do I mean part a rather large a considerable part of magic. And, you know, I define that as magic with a K none sleight of hand.

The is the is the will to do something, you know, the, the ability, the the, the, the, the mental focus, the mental strength, the mental will to make something happen, can be applied to whether you're doing spellwork you know what, like some of us do, or whether, you know, you're, you're putting effort into building that house, you know, it's

 40:52

that's kind of part of that hole, because there is a difference. And, you know, you know, it's, it could be as simple as you know, if there's something you need to do, and you really don't think you can do it, odds are, you're not going to do it. But if you're in the right mindset, and you say to yourself, I can do that. And it's reasonable to you, it makes it that much easier for to him that's beyond the whole spellwork. And people that don't practice it, it's very general, it's more of a pagan kind of outlook, just because of how it's written. But it's completely open to no matter what religious, right? You know,

 41:27

it's in today's language, I think of the masses, we would call it, building your self esteem.

 41:34

But well,

 41:38

but more than that,

 41:39

I think it's more than just like a self help. I think majority of it is philosophy, and I'm actually applying that philosophy to things you do every day.

 41:48

You know, I, I forget who it was who said it. But this philosopher, our industrial person once said that, whether you think you can or you can't, you're right.

 42:03

Yes, you know, absolutely. And, absolutely.

 42:07

If you're going to, you know, there's the old saying that in order to accomplish something, you have to have a vision of the finished product. But I think what a lot of people make their mistake is they try to go too far too fast all at once. You know, you want to have a big goal, but you want to take tiny steps, getting to that goal, and you just don't want to walk out blindly, you want to think and plan it out each step as a way, like your dad was, wrote a book, and the movie did not just start, you know, writing a book, just add it. I mean, he had like an outline in his head, he had certain steps that he was going to follow in order to get to the finished product. But

 Bobby 42:59

and the most important step is, first and foremost, believing that you can get it done believing that you can make it the

 43:08

best representation for what my dad's books about, I could probably get him to come on here sometime. And he would be closer to when it's done to finish and it'll be available on Amazon and other websites. Yeah, stuff.

 43:21

But But I think a lot of it is being HIV positive. I, you know, a lot of my thinking comes back to that, even though I, it's, I think it's best not to dwell on being HIV positive. It's more important to have a positive outlook on life. Because I know I have a positive outlook on life. I don't know how to teach it to others. There's so many people that I have known in the past that once they got one safe found out, they were HIV positive, they just gave up.

 44:00

And they die. I think the problem, the way I look at that is a lot of people don't know what a positive outlook is. And I know my dad quotes Aristotle on this, but it's the short version of this quote is, you know, if you have an aim, there's no good or bad right or wrong. If some action you do takes you one step closer to that aim. That's the right choice. Yes. And if it takes you away or doesn't make you anywhere better, it's not the right choice, but the finding, trying to get yourself an understanding what a positive outlook really is. You need other people for that. Yeah. I think once people get that it's hard for them to kind of reach out.

 44:39

I'm glad you defined it that way because I wanted to add that I I'm not saying that a positive outlook on its own is gonna keep me alive. Right. You know, it's it's the drugs that I take the outlook I have

B

Bobby 44:56

the people around the people around yourself.

44:58

Exactly, exactly. Oh, All of those contribute. So by being alive, and prospering. And

45:05

I also, I also really feel this very seriously about this guy, Jamie, you are really involved in a lot of things in the community as a volunteer, not just here at the station, but all round. And that has, volunteering has an awful lot to do with a person's own psychological outlook and toward life and toward themselves.

45:34

Giving back to the communities very Yeah, but it's, it's more

45:37

than just selling more, it's something more than just giving back to the community actually happens, I think, a very positive energy comes back to you. Were for you know, like, I know, a lot of times, I would go to work, when I would leave for work, I'd have like a ton of problems bothered me. And I would be so glad to get to work because I knew that if I could go to work, and get my mind off of the problems, somehow, and it's like magic, it's like magic, the solution would all of a sudden just pop there. And it would work. It really works. And the same thing when you're volunteering. I mean, when you're volunteering and doing things, so many good things come back to you not just giving back to doing

46:28

something you love. Very rarely do I ever see anyone volunteering for something they hate, you're volunteering, you're doing something that you enjoy, and something you want to give back. And that feeds back to you.

B

Bobby 46:38

Yeah, yes. There was. You were saying about you don't know how to teach somebody that

46:51

positive outlook, I think,

B

Bobby 46:53

to some extent, you know, you have people who can, who their way of teaching, or at least expressing their outlook, is to write to say, this is, this is my idea. And you know, and people are affected by that. I think there are other people where it is simply a matter of being

47:19

the sample leading

B

Bobby 47:21

by example, for you, I mean, in your case, I mean, you're you've, you know, you you get to laughing about something or lighting up, you light up a room, because you have that laugh that just you know, and all of a sudden 10 people in the room are also, you know, smiling along with you, you know,

47:42

that for some is very important. Yeah. For it for your status. But it's

B

Bobby 47:47

that sense of, you know, sometimes people say to me, you're, you know, you you've affected me this way, simply by being out there. Yes. You know, I mean, it's the same thing, when I look at you, and I see how you make people happy or crack people up in talking about a story, even if it's at the expense of your own history. You know, you talk about your history very openly. And it's, and I think there's just some, you know, place, there's some times when it's simply by being, and you don't always know who you're going to affect that way. But somehow it comes back to you that you have done so, you know, you something in a positive outlook has affected somebody else for the better. Yeah, you know,

48:37

the biggest advantage to that is sometimes when you were giving your example when people when they first find out that they're positive is they feel like they're afraid to go to someone else or fight to say, hey, I want to read what this guy went through and, you know, relate myself to that. And I'm on my own, I could do this myself, and they're very kind of self oriented. But when you surround yourself with people that are just, that's not what their worry is you pick up on sort of how they deal about it, whether you realize it or not, and it allows them to just

kind of cope with it in their own way and not feel like they're having to leech off someone else that if they're not, they're having to be helped that they don't want to feel like they're helped with no.

 49:18

You know, there are unfortunately there are some people who love their misery. I mean, they, they love, they love their cross you I mean, you want to tell him, come on, down on the cross. We need that with Jimmy and I. Jimmy and I both knew this one guy who had physical mental medical problems, and this guy just wild in it, to the point where he separated himself from just about everybody and everything. And you know what? He lost it all. And he would just, he just loved his misery. You know exactly what I'm talking about. I'm not going to give him He was but you know, and we let this person come in to volunteer here at the station. And it was a disaster. It was a crew disaster.

 50:10

I had an ex girlfriend, it wasn't so much that she wallowed in her misery that she could not thrive and didn't get the enjoyment out of being happy so much as he did as being in her little hole and being mad at the world. So, you know, most teenagers are like, that's why we would never work because I'm a very happy guy laid back casual, I don't let things bother me. She wasn't like, which is a good day had to she had to have that drama in her life, she had to have that schism that made her unhappy or upset. So no matter how happy I made her, I was doing exactly the opposite of what she needed.

 50:49

Or what she wanted.

 50:51

What she needed. She wanted to believe that she wants to be happy. But she's just one of those people that she will only ever be happy when she's with someone who doesn't treat her good. And she has that kind of despair and drama in her life. And well,

 51:06

I'll say something like, I'd love to see you laid back on my sofa

 51:15

you will never change No, I

51:16

won't. I will live and we wouldn't want you any other way. Okay, so the name of the book is

51:23

dark arts of immortality, transformation through wars, sex and magic, okay.

51:27

And you'll let us know when we can get a copy because I would really like to read that book. If only to see if I could teach other people a positive outlook.

51:42

What I'll do is now that I brought it up, I didn't think I was actually going to do this. But a couple more weeks. It'll be hot out of the presses. I'll get my dad, he could probably explain a little better what it's about. I

51:54

would love to have it with me. Great. Okay. There's one thing I do want

51:59

him to better understand what I'm doing Friday nights with a bunch of gay guys. Yeah.

52:05

Here's one question I have for both Jimmy and Jason. Joshua. Gotcha. There's one question I do have the other straight guy. Not. Anyways, my question is, why is it in this so called normal society? It is good. It is normal. It is healthy for men to go to war. But heaven forbid they should be in a lip lock embrace. Oh my goodness. You know,

52:40

that guy on war we've it's only what a little over 200 years old. We've been in 10 major wars. We're averaging a major war every 10 years. This isn't including Iraq either.

52:51

What's we're not gonna stop there.

52:53

We made we averaged a major war the 20 years in this

52:57

country well as a famous as every generation,

53:01

every generation.

53:03

Why is it though, as a military man, one

B

Bobby 53:06

said, they, you know, they gave me a medal for killing a man and a discharge for loving another that was Sergeant

53:19

Leonard Matt. Max.

53:20

I mean, come on. We get people worse for killing people. But it's illegal to give someone an orgasm if they pay you for it.

53:27

Yeah, yeah, exactly. I

53:29

just want to know what is wrong with this society? I mean, I honestly feel that we got everything so screwed up backward. That it is unreal. Yeah. What is it

B Bobby 53:39
that we know? Kill

 53:41
kids over in Iraq right now who are not old enough to drink or vote,

B Bobby 53:47
but they can shoot a guy to death. There you go.

 53:49
Now I'm gonna teach them during the civil war in this country. The federal government set aside money because I'm reading this

B Bobby 53:58
memories coming back to

 54:02
the federal government set aside money for Union troops to have prostitutes. In fact, the term hooker came from the Civil War, in which general hooker had his prostitutes, and everyone knew. Don't you mess with them? Because those are hookers hook or hercus. Girls, those are hookers. They belong to hook. Maybe

B Bobby 54:24
it was from the hookworm you were likely to get by sleeping with nevermind. Bang.

 54:32
Chris save us.

B Bobby 54:36
And Chris is like

54:40

looking at something on the internet, looking at dirty free to ask dirty pictures and nobody is sending us any he's looking them up on the net. Okay.

54:53

I got a question. Yeah. We got a CD. Kelton.

54:58

Yeah, yeah, he Does What's the last song on that one?

55:04

My baby Don't worry no panties.

55:07

Well that's it song but there's something else about a lesbian or a dyke or XC underwear. No, no, no.

55:15

You and your damn Kenzie six. Okay. I don't know it's tickets Ed and MTV fair when there was a thing in our box from Jean. Yeah. He is doing some events here in August. He's gonna be on Sunday. Sunday, Sunday Sunday, August 21st. At fenders club I 45 south. Exit 13 and Lamarck. He'll be at the south end of the outlet mall.

55:44

And then, oh, yeah, he does.

55:48

And then the following Sunday.

55:51

It's the next of the west side of the city dike.

55:56

Following Sunday, he'll be at the howling coyote behind neath his restaurant on night FM 1960 West and what he's doing is a 50s rock and roll show and Elvis Tribute Wow.

Bobby 56:12

We need another Elvis term. For more

56:14

information on gene Callen go to [www dot Jeanne kelton.com](http://www.dotjeannekelton.com) That's GENEKEL t o n. So if you wanted me to play that one song on there well we'll take a regroup and then we'll we'll talk about this routine we'll talk about this one story has come out with a new HIV treatment strategy that's showing promise oh really and supposedly they you know the the right wing radio programming starts by showing right right right right I'm sorry I'm Polish you know they took over us when we kind of RAM yeah

56:47

yeah Czechoslovakia and we did the same

56:52

Germany Soviet sorry guys

Bobby 56:57

living proof that they can get over it

57:03

we're gonna come back and talk about this new HIV treatment cuz I suppose has been warming up the airwaves over there on the am dial once I've dial in number 14 here, and we'll be right back. This is after hours queer radio with attitude.

57:26

Texas nd diag by me and Jeanne Kelton coming soon to a outlet mall near you. Surprised?

57:35

57:35

I grew up near the city. I grew up next by the Texas City dike so that that hits home

57:43

you were the little Dutch boy who wanted to put your finger in the dike this is after hours quit radio with attitude.

57:52

Many a pole on the dike fishing pole Damn

57:56

I thought I thought for a moment there I thought I had an invitation good one ROI you

Bobby 58:02

know You almost made ROI Cha choke on is Dr. Pepper Can we try that again? Take two

58:14

to make them right right we love you to death and we're hoping for it to be soon

58:21

I do want to say this so we're gonna be bees come on guys.

Bobby 58:26

Let me haven't been able to find us.

58:28

I will I'll I'm gonna finish reading this later. Why are you holding it like that?

58:38

It's for better grip. Oh

58:39

god there's dirty Okay, good. Now just a lot of words see if there's a student

B Bobby 58:48

so much pictures it's words

58:51

they can't do pictures on well well at

58:53

least this one's tight. We can read it

B Bobby 58:57

I want to say he's starting to knock his head against a microphone YEAH.

59:03

Jimmy and the roundtable and once I figure out what in the world I can say on the air. We'll get back to you.

59:11

We'll get back to conversation over here behind the glass apparently

B Bobby 59:17

executive editor apparently

59:19

this one NBV is has a few issues with our programming both on the show and the station. Oh criticism BB I'm not good men behind bars behind so we're I'll peruses letter and some other points we'll we'll talk about that amazing kick it up to the higher ups I must tell him though that the one line there I'm changing as my personal quote I used to have my as my personal quote on thing was life is like a martini made with cheap chin. You know get ready because we no matter what happens is gonna knock you on your ass.

B

Bobby 59:56

I think this quote is too long though. Yeah, and

59:59

I can't say it on the air. But to the reader of this to the writer of this book, this manifesto, the Jesus please someone stepped into the back yard line. I like it.

B

Bobby 1:00:13

Yeah, that was cute. Yeah. Well,

1:00:14

we'll we'll peruse the rest of that later. And the new saying

B

Bobby 1:00:18

though, has too many words. It's too much to remember.

1:00:23

Milestone from the movie. Ah. Okay, the answer, I think, yeah, there still is the bar, the ripcord. What are the things he was asking you? You know why we don't do what

B

Bobby 1:00:32

the ripcord does still exist. But you want to

1:00:35

things he's talking about is you know why we don't talk about more of the community and the bar district? Well, very simply because we are commercial free radio, so we're not going to sit here and plug the bars unless they're doing something for the community.

1:00:51

Tonight, we mentioned Mary's and riches and so

1:00:54

we did you know, the rip cord does do several events and berries. And with DJs. So yeah, they are out there and like so we're gonna, we're gonna work on our response. I read that and it's not funny, and you just got to figure something out of that. But let's go into this little topic we've got here because supposedly this is burning up the am airwaves.

Bobby 1:01:17

Somebody out there somebody salida fire a new

1:01:20

HIV treatment strategy shows promise. This is out of London, London. A new treatment strategy has shown promise in helping transform HIV AIDS into a curable infection. preliminary research published this week in The Lancet medical journal outlines how scientists use an anticonvulsant drug to awaken dormant HIV hiding in the body, where it is temporarily invisible but still dangerous. HIV in fact, HIV infection is incurable because current drugs only work when the virus is multiplying, which occurs only when it's an active cell. However, HIV sometimes infects dormant cells, and when it does, it becomes dormant itself. While the virus poses no threat in its resting state, the sleeping spells, cells sporadically wake up, reactivating the virus and causing them to multiply. Patients must continue to take medications for the rest of their lives so they can fight the virus when it comes to the reawakened cells. Only if every last infected dormant cell is wiped out where the virus is purged from the cells. Can patients stop taking medication and be virus free experts say figuring out how long how to clear the reservoir of latent infection, or whether that's even possible is one of the hottest areas of AIDS research. Over the past few few years, a handful of drugs have been shown to decrease the size of the dormant HIV pool. But they were subsequently abandoned because their effect was either too weak or the side effects too toxic. The latest drug valproic acid shows more promise. says Warning Dr. Warner green director of the Gladstone Institute for allergy and immunology at the University of California, San Francisco. Cut to the chase down here. This is on the SS off the AP news wires what we're reading what I'm reading it off of here. Dr. John P. I wrote a professor at McGill University in Montreal, Canada, who also studies doormen HIV issue says the results were impressive at first try is enormous for just three years treatment has such an effect. Other experts are optimistic. It's extremely unlikely this approach would work. Dr. Roberts is lino, a professor of medicine at Johns Hopkins, who is one of the scientists have discovered the dormant infection problem in the mid 90s. It assumes something about the mechanism we don't know is true, the mechanism may involve other issues that are not affecting this drug. And he ended up with saying that the he doubts the valproic acid approach will solve the problem, because it's lies because it's likely HIV lies dormant and other types of cells that scientists have not yet discovered yet. And tackling those reservoirs may require a completely different approach. It's a bit premature to be talking about a cure for HIV. Yes.

1:04:05

And there are side effects to the valproic acid. Also,

1:04:09

there's side effects anything about your body, and it's tough on the

1:04:12

liver, that that can be a problem for people with HIV because they're already taking medications that are tough on the liver. So that's stressing the liver even further. And there are other side effects that are found in another piece of information that came through to me now that I forget what all they are telling the truth, but that's one of the you know, side effects, side effects, side effects. You know, if you survive long enough with HIV, you start taking medications. For the side effects that you get from radiation you're taking for HIV. It comes down to that, you know, it

Bobby 1:04:56

just gets me it's like oh, She more side effects. Okay, more side effects as opposed to the end result of HIV went, let's, it's, you know, it's sort of like, what do you at some point, it's six of one half dozen. The other question we did I mean, I feel like at some point, you just feel like, show me, I am not by nature, you know, a pessimist. I'm an optimist by nature. That having been said, Show me something works. And then maybe I'll believe that, and then show me a drug company, or group that's going to make it and not make it worry about their bottom line, make

1:05:49

it and make it affordable, because make it unfortunately, you will see a lot more with the fact that the drug companies are not the drug companies are required by law. If they're a publicly traded company, they are required by law to make profits and make their shareholders money being they have no responsibility, no liability to the people using their drugs. What's

1:06:14

the biggest problem with a drug like that is yes, there's a lot of side effects, which are, you expect side effects from anything that has any possibility work, but there's so many variables involved. And the problem that bothers me the most, it seems like every couple of years that they put something that makes it seem like it's a little better, to meet people,

Bobby 1:06:32

it gives people that little I live hope, you know, people

1:06:35

get to satisfied with that. And they stop working for finding something that works. And it's definite, you

 1:06:40

know, but it goes back to what we were saying, well, while the music was playing, and what I was saying off air, which was that I know there's so much money tied up in research, there's so much money tied up in the medications that we have. I'm sorry, but I don't believe these medical professionals, because I'll be honest, disease,

 Bobby 1:07:07

you lose money, because you don't have to treat it anymore.

 1:07:12

You know, back in 1971, I had water on the knee above my knees from a bush swimming pool accident that I that I got in that happened to me. I had a team of doctors, because the LA Medical Center telling me that I had juvenile arthritis, juvenile rheumatoid arthritis that developed into paralysis from the waist down and I would never walk again. I was 21 as this is ridiculous, this is not what I got blew my face, telling him what had happened. I was just, I jumped on a swim for shallow and and I bang my knees. You know, it was a stupid dumb accident. But I did it myself. It was a paralysis,

 1:07:55

I thought my 21 year niece would have been used to high impact on Connie Chris Rock, Chris Rock said it best in one of his specials there. He said, You know, the money's on the comeback. You know, you go to a drug dealer on the street corner. And you know, they'll give you that first taste for free. Because they know once you have that first taste, you will come back and you'll come back and you'll pay whatever you want. People are you know, the drug companies,

 Bobby 1:08:23

the highest paid drug dealers in the world. And you know, the fact of the can do it legally too.

 1:08:31

I remember back in the early days of this stuff, when AIDS patients for taking AZT full strength and my God, I still believe that that AZT killed more people than HIV did. I mean, but there were some to

B

Bobby 1:08:47

this day, there's still people who believe that

1:08:51

it's true that AZT knocked people for a loop, far worse than chemotherapy would knock someone

1:08:58

out AZT. Azt is a

1:09:00

chemotherapy, someone tells you that there's some drug we're not finished yet. We haven't found a perfect cube or we're gonna throw this out here, like this new drug to satisfy you for a little while. That's the risky

1:09:09

run. And the downside is what happens is the

1:09:13

people who wanted to try and fix it and sales to drugs fault know, ahead of time,

1:09:19

but see, here's here's the problem that comes with it is the fact that, unlike Vioxx, where you know, the side effect was, you know, you have heart problems, you're taking it for, you know, muscle pain or arthritis pain, and you develop heart problems with this. You know, the problem we have when we start telling people, there's a cure out there, there's this, there's this magic pill that will cure you. What happens is you see the next the next generation going, Oh, good. I don't need to wear that condom anymore. I can go and screw around all I want and not have to worry about the repercussions. And then when something happens that, you know, heaven forbid that they do. Pick it up get that One wrong trick and become infected. And they go well, we really don't have a cure this might help and you know, this works for these people but it may not work for this person condom

1:10:11

isn't a surprise against HIV anyway, I would love to hold them the whole and and latex condom is one micron big. The size of an HIV virus is one half of a micron. That kind of does not stop.

But

 1:10:25

here's the thing, okay. If your say ripple, well say you're a police officer or a soldier. And we're going to send you into a hostile territory. We're there gonna be a lot of shooting would you not wear a bulletproof vest? Oh, absolutely. I'm not even if even if you know that, you know, there's there's plenty of stuff out there that

 1:10:45

there's nothing wrong with being safe. I understand that. I'm just saying that people don't realize that's not enough. You still gotta be smart and know the people you're going to be with. Yeah.

 1:10:55

I mean, the downside is the only way they're able to promote that any sort of condom information is you know, the number one std out there with trying to counteract that which is pregnancy.

 1:11:10

Remember, hey, pregnancies, the worst STD of a month? Yeah, you're always gonna die. You know?

 1:11:15

Yeah. Pregnancy, you know, that lasts 18 years. And there's no shot. No talking about a cure for that. Everybody gets it? Everyone dies. Yeah, no, not us here. We don't have to worry about pregnancy.

 1:11:28

I'm saying life being pregnant yesterday that everyone gets it, no one makes it. I

 Bobby 1:11:33

was just sitting here thinking of a friend of mine who I would love to never get another phone call. Or another personal friend of mine coming up to me who hasn't made it to 21 yet announcing that they're HIV positive, because they trusted someone to tell the truth, or they thought that nothing could ever happen to them. And I'm just a little sensitive on the topic this

week, because somebody did come to me this week, and he hasn't seen his 25th birthday. And, you know, and so I get really mad. And it drives me a little insane when we talk about all these drugs, that everybody that so many people think are these magic bullets. You know, it's like, you think that these magic bullets ask Jimmy and me how we feel about some of these meds and and how they make us feel during the course of a week. Also, you know, I just decided else and the number of pills, the side effects. And I get tired of seeing all sorts of talk and suppose it research about stuff. And no results, while friends are mine are dying. And they're still dying. They may be dying at a slower rate, but they're still dying.

1:13:18

For one and for Sorry, I had one for people who are HIV positive. Don't tell a partner's not because they don't care. But because they don't know. So get out there and get tested if you're sexually active.

1:13:34

People who get tested don't know that they're positive because they don't go back to get the results.

Bobby 1:13:39

I'm talking about. No, they are.

1:13:43

Well, they haven't done it then later today. Because there's voting at the pride office at 1415 California. And right across the hall from the pride office. Montrose clinic is going to be doing free HIV testing and they're going to be doing the 20 minute one, the needles so you can go in and they take the swab and you go vote and come back and get the results right away. And it's free tomorrow.

1:14:14

If you don't like pain because I went and had it done during the pride fest. I went over to this tent and you're basically swab you they hand you this. It's not really a swab. It's more like a little piece of plastic. And you just chained rub it against. You start at one corner of your mouth. You rub it against the gum line across the top, and then you rub it across the bottom gum line and you hand it back to him. And then 20 minutes later, you get the result you get a little piece of paper and there's no positive negative. That's and so

1:14:46

it's free free 10 to six today,

B

Bobby 1:14:52

but you're ever in the area. You can't help but interject just a moment of comedy into that one. Okay? That being the case that this is an oral way of do think, for all those people who think you really think a blow job is still say, actually, I do just that

👤

1:15:16

may sound amazing, amazing, but 20 minutes to get results orally, you're probably not doing the right job.

B

Bobby 1:15:23

This boy Oh, no, I

👤

1:15:27

had my share of blow jobs never give up on that

👤

1:15:29

was, that was one of the questions that you know, I have of of talking about this thing is we always have this talk, you know, we know that oral sex is considered safer, you know, it's not as risky, it still has a risk to it, but it's not a high risk as we would with anal sex. But, you know, when we talk to the person getting the blow job now, well, if you have a sore on your,

👤

1:15:52

on your day,

👤

1:15:56

if you've got if you've got a sore or cut down there, you're not going to care what the thing

B

Bobby 1:16:03

if you got that.

👤

1:16:05

The fact is, okay, but the fact the fact is that if you have it, we keep talking about, you know, saliva doesn't care, you know, if someone has HIV positive, and they spit, or they kiss somebody or any of that stuff, you can't track. But you know, it does seem strange that you just take this piece of plastic and rub it across your gums. And I didn't see any blood that it was, you know, scraped enough to, to, to open up, you know, the gum line like I do, when you brush your teeth, you are prone to knock something open. But it's does kind of make you make some evil, or at least I did to me if wondering if that's the case of it, they can test it off of there, then it has to be present there. Okay, it's actually King cells. Yeah, yes. Did you get the cheek? It doesn't the cheek, all I did is I ran it across similar tissue. Yeah, across the gum line. There. But it just it was a strange reason

 1:17:07

why that is because a lot of the tissue in your mouth are more susceptible to absorbing things also in your hands, your hands and your lips and the most absorbent cells in your body. But there is dormant HIV cells that run through your body, they're more likely to be caught dormant or unwanted in those cells. It's

 1:17:26

just a curious thing of you know, of having a look at it and figuring out what they're talking about.

 1:17:30

I would think that if you have HIV, and you do, like, have HIV cells in your mouth, but the virus only lasts a few seconds outside of the body cannot survive on oxygen, right? And so you've got oxygen going in, in your mouth all the time.

 Bobby 1:17:57

But it's still primarily I would think of it as still a closed off environment because you know, we don't spend our entire day with our mouths Oh no, of course you happen to be in one of those professions where you know

 1:18:16

assume is dead because

 Bobby 1:18:18

which explains why which would still it would still

1:18:22

but no firstly went off to me because we're in California or San Francisco or Los Angeles and he was talking about you know, they don't have bathhouses out there. It's against it's against this health code to have a bath house in California, but you can have a sex club,

1:18:38

right? Okay, that makes sense. Yes, you can blow Buddies is one of the biggest and there's

1:18:42

there's one of these clubs in

1:18:44

San Francisco. He was talking

1:18:49

and he said there was a you know, they had these large reservoirs of hydrogen peroxide for you to rinse. Oh, it's like you know, wouldn't you prefer something like the taste of you know, a mouthwash or something and Listerine but it's a lot cheaper I guess for the hydrogen peroxide. I hate to do this

1:19:12

yeah, I'm actually doing they are well, that houses are great.

B

Bobby 1:19:15

Much love blessed Bay.

1:19:17

We'll bring him a coupon for a free one.

1:19:19

Okay. All right.

1:19:20

Okay. All right. Well, we're out of here. been

1:19:24

real. It's been fun. It's been real fun where

1:19:38

you have been listening to after hours queer radio with attitude, a continuing tradition here on KPFT. Don't

1:19:47

forget to check out our sister program queer voices every Monday night 8pm to 10pm. We'd love to hear from you. Our listeners. We want your story ideas discussion topics event announcements, love Mail hate mail dirty and there are two ways to get it to us. Snail

1:20:05

mail is after hours care of KPFT 90.1 FM 419 Love it Boulevard Houston, Texas 77006.

1:20:19

Our email address is after hours at KPFT dot o RG. If you missed a show or want to share a part of a show with a friend, check out our online archive at KPFT archive dot o RG. We

1:20:33

will be back next week and hopefully you will be able to join us on behalf of the crew of after hours. Good night and have a great week. This

1:20:42

is listener sponsored commercial free Pacific radio for the Gulf Coast KPFT 90.1 FM Houston and 89.5 fm Galveston, you can always find us on the worldwide web at KPFT dot o RG
