K

Kirk Keevert 11:03

that must have a hint of color. The hell does it have to do with gay marriage?

♀

11:08

Hey, gay men. Gay men that are married have more money to spend their letter close. Oh,

♀

11:16

leave us alone. Anyway,

J

Jason 11:21

you are listening to KPFT 90.1 KPFT Houston and 89.1k us College Station gooseneck way. I didn't know how long it's been since it's been said so well

o

11:34

into gay marriage. What kind of lovely things did you dig up for us?

J

Jason 11:38

Actually, I was reading I believe it was the voice that I was reading today. And there was an issue or there was an article in there about Alaska. Alaska. One of the judges just passed a ruling that in less Alaska can prove why gay marriage should not be illegal. That it basically is going to be legalized. I mean, he said that Alaska, it's up to Alaska to prove that gay marriage should not be legalized. That's the latest development I've read. As far as the gay marriage issue goes,

o

12:15

I think I would rather go to Hawaii than Alaska. Well, I

J

Jason 12:18

personally prefer the sun and Hawaii too.

o

12:20

But Well, either way since they approved DOMA, it really doesn't matter where you get married. Because if you come back to Texas, it's still not going to do anything for you legally.

J

Jason 12:30

I still personally think that once that gets challenged to the Supreme Court, that DOMA will be out so fast. It's not even funny. Their heads will spin the Republicans heads will spend

o

12:43

I mean, we'll tell you what, Scott, everybody else to what exactly DOMA is

12:47

DOMA is the Defense of Marriage Act, which states that the individual states of the US do not have to recognize marital contracts between gay couples, which actually directly goes against the Constitution. That all state in which it is stated that all states have to recognize every legally binding contract from state to state, which is most likely the defense that people would come up with if it went to the Supreme Court.

J Jason 13:25

And there's really no argument if Supreme Court has to uphold the Constitution, there's no argument they can really come back with, besides the fact that the Republicans are, you know, controlling Congress, but that doesn't affect Supreme Court.

13:38

No, but the fact that most of our Supreme Court justices sitting on the bench right now we're Republican appointed, does have something to do with it.

J Jason 13:47

Yeah, but you know, the funny thing is that when you give somebody lifetime appointment, especially to the Supreme Court, it is really amazing how unbiased they do become. I mean, there's still going to be some conservative justices versus not so conservative justices. But I don't think there's really any partisanship. Once you give somebody a lifetime, there's really no reason for them to be loyal to that one president because they're appointed for life unless they really mess up big time.

14:18

So basically, kick ass to you, or kiss ass until you get your appointment and then say, Okay, nevermind, pretty much. I'm gonna do whatever I want. Pretty much.

J Jason 14:28

Y'all are just so quiet in there. Y'all don't have anything to say. This isn't the first

14:32

I don't Well, I wasn't sure. Oh, hey, I'm louder now. I wasn't sure quite what to expect. When we came this evening. I was I was more going to talk about my mother's gay marriage, which which was very entertaining,

14:44

which affects a specific gay youth. Yeah, she

14:48

Yes, my lovely mother and her most entertaining ex wife decided that since they couldn't go out and get married, they were gonna go in the backyard jump over a broomstick three times and it was done which You know, that's that's very, very entertaining. And I mean, at least for

Kirk Keevert 15:02

me, and I enjoyed it on routes.

15:04

I was fabulous

15:05

in your corner. Oh, no. Oh, no.

15:09

But I mean that for me. I mean, one of the big questions, honestly, is, I mean, these days, you know, all the politically what adept corporations are already offering domestic partner benefits. So really, the only thing to be gained by getting legally married is tax

Jason 15:24

breaks. There's even I mean, for those of you those few of you out there who in radioland who might not know, Starbucks even gives, you know, even to their part time workers, gives benefits to their part time workers and their significant others.

15:42

As well, you must remember that those benefits only go out to those who are qualified to receive those benefits. A lot of companies don't give benefits to part time workers.

15:53

Right. And this is true.

15:56

But But no, one of the points that I was trying to reach for that, is that I mean, these days, the whole issue with gay with gay marriage, I mean, at least for me, I mean, symbolically, you can still get married, there are places that will perform the ceremony. And as more and more companies do start offering domestic partner benefits, then one thing left is, like I said, tax breaks. And that's when you had to start figuring out, okay, who's focusing on what is it the fact that you can't get married? Is it the fact that you can't get your income taxes?

J Jason 16:26

Well, I think there's also a lot of other issues like if your partner dies, and even if their will does say that, you're entitled to so many benefits, or so many, so much of their possessions. In several cases, families have successfully challenged those wills. And because we don't have the same legal rights in marriage, several families have won challenges against those wills, even though these, you know, even though two people could spend a lifetime together, the families can still win their challenges to the will, because we don't have the same benefits.

17:05

Well, that's that's not just a gay thing, though. Because there have been as many cases lost, well, maybe not as many, but there have been many cases lost for the same thing. And that's also I mean, that happens to strike couples that happens to people who weren't legally married, you now say, you know, all of a sudden, Joe Schmo starts, you know, has an affair, but they never get married, you know, and he may be with this woman for 10 or 15 years, and she may not get anything. And that's not just a gay issue.

J Jason 17:32

Well, I think that there is more of an issue with the gay marriage issue with the fact that a gay couple has very, very small standing, as far as well

17:45

even even say, you know, take her if you had been with someone for 30 years or so, and your lover was named as the or was set up to be the executor of your will, that could still be legally challenged and overturned with fairly little litigation.

J Jason 18:06

And then there's also there's also the issue of, you know, if you're if your partner is hospitalized, or you're in intensive care, where family only is allowed to visit, you're not

considered a family. You know, the state of Texas looks at a gay, a domestic gay marriage as more of a business than it does anything else. And therefore, you have to have legal paperwork to prove to get the same benefits. I mean, you have to have a lot of legal paperwork to get the same benefits that one piece of legal documentation gives to straight couples,

18:43

which just goes to show we still have to leave room for the Lord Oh Lord inside joke I'm sorry.

18:51

I'm like well last me on that one. Next topic please.

J Jason 18:55

On that note, let's regroup and we're gonna listen to the song What song did you pick out Scott?

18:59

I picked out from the new only the Franco CD, little plastic Castle the title track little plastic castle.

19:07

It'll get you wet in your seats.

19:10

Let's How do you know Tigger?

19:11

Let's not I just wanted to use Jimmy's phrase. Anyway,

J Jason 19:15

we're going we're going to start the song now. I'm blowing y'all off in there. Y'all are now off. And now comes here comes our song

100

19:29

Ooh, the loveliness of previews.

J Jason 19:32

Okay, we just previewed the second song for you. And I'm gonna get really unapproved from Kurt and I think Jimmy is probably going to get me in here and give me an unapproved look in a moment.

19:43

Oh, no. Oh, no. I understand. You can't have this many smokers in one room. Not take a break.

19:50

And really Jason despite what you think you are only human. disapproving.

19:58

I can see we need more lessons on how to program the machine.

20:05

Well, would you rather we play you know, some selection from Marcel Marcel was Deadspace.

J Jason 20:13

From ICBS Okay, anyway, back to our conversation at hand

20:24

everybody whisper.

20:26

It's in fashion these days. Anyway, while Jason is selfishly searching through his CD

J Jason 20:34

rack, if anybody wants to call him with comments on tonight's issues about gay marriage,
please call us at 713526 KPFT We'd love to hear from you

20:49

So we can stop having dead space.

J Jason 20:53

I'm sorry, I'm busy. Y'all can talk. Y'all really can't I promise?

20:59

Well, I kind of forgot what we were talking where our conversation left off.

21:03

While we were talking actually about the legal matters surrounding wanting to get gay marriage approved. from state to state.

21:10

I hate that crap. Why I hate legal anything, I can't deal with it. It's like nevermind. Well,

K Kirk Keevert 21:18

you know, it's like, I don't know, you can say everything bad that you want to about lawyers. But there's some times when you know, by God, you need a lawyer. And there's some times that by God, you need laws. And this is this is one of those cases. And whether that whether that law is that there is no such thing as gay marriage, or if that law is there is such thing as gay marriage. unilaterally throughout throughout the country, it needs to be it needs to be one of those two things. And it's getting to the point where there does have to be a law about it.

J Jason 21:59

I'm I'm mainly concerned about the fact that it takes us 1000s of dollars practically in legal fees. And sometimes more than that, when it comes to challenging the documentation that you've got more to get the same rights, that a straight couple can go down to the courthouse and pay a very small fee and get with one documentation, one piece of documentation. I think that's proof about how far gay rights has to go. And I think also that, I think the main reason I want to talk about this topic is to let it be known that, you know, there are people out there who want a long term life commitment relationship. I knew I grew up pretty much raised that gay men cannot have a committed relationship. Gay men have nothing but you know, promiscuous sex from partner to partner. And, you know, if you're going to be gay, well, you're

going to have sexual, lots of people, and you're going to die of AIDS. And that's by no means true. I think that to dispel that rumor, I think it's important to point out, we've got Jimmy sitting down. So he's obviously got views on

K

Kirk Keevert 23:14

it. Well, I, I will tell you what Jimmy is gonna say. Why do you feel like that is that it's that important that you have a piece of paper to, to document this commitment?

J

Jason 23:30

It I don't think it's important that you have a piece of paper to, to document that commitment. Okay. I think it's important that if you do have that commitment that you are allowed the same, right? And the same, I mean, to say that somebody that you love that you've loved for, you know, that you're you're willing to commit your life to. And then if that person ends up in, in the emergency room or intensive care, and you be forbidden to see that person, because you're not family to

♂

24:01

okay, but there are legal documents that you can have in place, right, care of all of this. And I think my main concern is why do we want to emulate a system that fails 50% of the time?

J

Jason 24:21

I personally think it's because it's the only system we've got,

♂

24:24

what it's not the only system that we've got, it happens to be the system that people expect us to follow. It's the most widely

♂

24:30

used well, I

J

Jason 24:32

mean, granted, there are documentation, there's documentation you can get to get you the same rights. I know. But my lover and I have that. But there is the fact that also you have to pay a lot more money in legal fees and you have to go through a lot more headache. That's why you hook up with a lawyer. Not all of us are privileged enough to be able to find a lawyer that we love.

24:54

No and many of us are hard pressed to find a lawyer that we like,

J Jason 24:58

and to go through as much hassle and how headache that one piece of paper can bring to a strike coupled to have to go through so much more expenses and hassle, and then still not be 100% guaranteed that those documents not be challenged. And that, you know, that can turn into a big legal battle.

25:19

Even if you're a heterosexual company, couple.

J Jason 25:24

A will can be challenged, right? Yes. But generally, a husband is allowed to see a wife or vice versa, in the hospital. And that's not always the guaranteed case, even with the proper legal documentation in a gay coupled situation, you're not 100% guaranteed that you'll be able to see your loved one in the hospital.

25:47

Well, you're not 100% guarantee that you'll be allowed to do that on your first try to get in to see them.

J Jason 25:54

Right, you've got to prove that you've got to go through the hassle of proving it. Okay.

25:59

I still stand by one of the wonderful things about being gay, and I use that term. inclusively is that we have no gay lesbian. Okay, I got that we have been able to create our own relationships as we see fit. And as they work for us. So why do we want to emulate a narrow type of relationship? I think that that was designed for people who have children. And

K Kirk Keevert 26:43

we don't Well, I think I think a lot of people see it as and I'm just playing devil's advocate here.

Oh, go ahead. I think a lot of people see it as a step in the right direction towards maybe the right direction isn't the right word, but towards and I know I could find a better word normalcy towards

27:07

mainstream. Yeah.

Kirk Keevert 27:09

Thank you. Okay. And, for example, this this example just crops up to mind. The lesbians up in, you know, Virginia, or wherever the hell it is that they're from that keep losing their baby. Ah, in the courts. Yeah. Now, if those if that was a legally married couple, the court would hardly have any basis to say, Nope, can't have the baby. I know. It's yours. I know you're married? No.

Jason 27:39

I don't know that normalcy is so much the right word as well. Quality.

Kirk Keevert 27:43

Okay, fine, quality, whatever. But you got to just so that I think I think that's, I think, yeah, okay, equality. And I think I think that, that a lot of people see gay marriage as a step towards equality. I personally think it's too big a step right now?

28:07

No, I don't think so.

28:08

Well, I mean, another issue? Well,

Kirk Keevert 28:12

I suppose that's, that's, that's your prerogative. And we thank you for stopping by.

28:18

Well, I mean, kinda kind of one of the things that Jimmy Jimmy said that I don't think you intended is that, you know, marriage thus far has been something that was there was an institute for people who had kids into that. And you know that's fastlv becoming another issue

with gay people is that there are gay couples that are having kids. Yeah. I mean, you know, male and female, female. Exactly. And, and, you know, and that's an institution. I mean, to be honest, throughout my life, you know, is so far back as I can remember, since about the age of two, my mother has had a lover, off and on. And, and throughout my entire childhood, it was never an issue, you know, that that lover was always able to come to school functions to kind of, you know, and other stuff. And, but I still think that there are certain things, you know, like, if you're in the hospital, you know, I was in the hospital briefly. And I had, you know, both my mom and her lover came to visit me. And, you know, I think I forgot where I was going with that. But they actually was allowed. Yes, I mean, but but that's, that's another thing where we're, like Jason said, if it's questioned, you know, it causes a lot of extra headache. Right. But, but, you know, I guess, you know, on the other hand of that, it's, it's how often is it going to be questioned?

J

Jason 29:37

Well, also, in a lot of cases, extensive documentation is needed for the parent who is not in any is not a blood parent, or not the actual adoptive parent because in many cases, gay couples that adopt children is adopted under one of the people's names. So in a lot of cases, extensive documentation is needed to give the unrelated parent parental rights and parental guardianship, right? You know, extensive court documentation. And then if, if the parent if the related parent dies, it can cause a big headache as far as to, you know, who gets the child to the parent does does the person who died parents get the child?

o

30:22

Isn't that the same in heterosexual couples, though, it can be force and remarriage and that

J

Jason 30:29

it can be at but I don't know that it generally is as big as big of a headache. Me personally coming from a divorced Ooh, surprise, surprise family. My father would have gotten custody of me, even though my parents were divorced. But my father was also the kind of father that even though they were divorced, after he got got his life straightened out, he was a very big figure in my life. He was always there for me, and he to this day is always there for me. You know, we all win, we fight just like regular, you know, most children fight with their parents. To this day, we're still fighting. But I know that he would have gotten custody of me. And I don't think that even if a gay couple is still together, the child doesn't necessarily have that same security.

o

31:24

i Well, you know, I'm really not playing devil's advocate, but that security was always there for me. I mean, a lot of it does depend on open communication, a lot of it depends on, you know, it was there was a question a long time ago of my mother and one of her first serious relationships who the woman became my godmother. You know, that if my mother should ever pass away, you know, we were talked about, we talked about it with my grandparents, we talked about with other things that if my mother should pass away, I would go live with my

godmother. You know, and, and a lot of that does depend, you know, when it depends on the families, you know, there are going to be families that are going to bitch and raise hell can I say, bitch? Yeah, yes.

32:03

Okay. How do you say,

32:06

you know, that are going to do that and try and raise tested. And then of course, there are other families that realize that, you know, having had a relationship for 10 years, that you know, that my god mother would be the closest parental figure for me to go live with?

Jason 32:20

And for you, I mean, you've been in a very good situation, obviously. But unfortunately, for, for quite a few people out there, you know, not everybody's quite in as guaranteed a situation or as insecure situation. You know, and especially with our parents, parents being in the generation they're from, you know, homosexuality is not anywhere near as accepted as it is in our parents generation, which is near as, except it is in our generation.

32:53

Well, also, I mean, to look at it from another angle, especially with a gay couple, do you really think that it would be just as likely as with a straight couple that the child's input would have any bearing on which parent they decided to go to or were forced to go to? Suppose you had a child who was adopted. And there was a difficulty the marriage split, and there was a whole bunch of custody stuff, who's to say that the child wouldn't be stuck in a state home? If the gay couple split?

Jason 33:27

Well, unfortunately, even in straight relationships, a child is very apt in certain age levels, I should say, a child is barely very, very rarely listened to as far as what parent they want to go to. And because I mean, look at the amount of children that have been taken away taken out of adopted situations, by the actual, you know, paternal parents, you know, a child who has been raised for five or six years, by this one family can all of a sudden be ripped out of that house, because the mother who gave birth to it five or six years ago, but didn't want the responsibility at that time, all of a sudden decides that they want this child. You know, that's, that's not right in that situation, and it wouldn't be right in a homosexual relationship situation.

34:16

...

How would legalization of same sex marriage affect teen gay teens, gay and lesbian teens?

J Jason 34:28

For me, it would be that there was the hope there, that there was the hope that after I found the person that I want to be with for the rest of my life, I don't have to go through the same legal headaches that the people that I know, have gone through to have the same right.

♀ 34:46

So what timeframe are we talking about here? Well, I

J Jason 34:49

don't plan on getting, you know, finding the person. Yeah, I'm not going to say that the person you know I'm with right now is the person I'm going to be with I'm not going to rush into a relationship anytime soon. I've always said I don't ever plan on being married. And so

♀ 35:02

yeah, let me ask you, is there someone in your past that at the time you would have married?

♀ 35:11

Well, Jason and I discussed that we weren't going to talk about this. But you know, Jimmy brought it up. So I think we should humor him. Actually, at one

J Jason 35:18

point. He proposed discipleland proposed to somebody don't ask me why I couldn't tell you it was one of the heat of the moment things ah, and I really got as an issue that okay, she

K Kirk Keevert 35:33

will see, there you go, that brings that does bring up that does bring up a huge issue. And and call write, tell me that I'm an evil person for saying this in the public. But you know what, gay men are a bunch of flakes. And by God. I mean, it's the old joke. What did gay men do on a second date? What second day?

♀ 35:54

Yeah. And, and? And what do

K

Kirk Keevert 36:00

you all? Generally? And yes, there are exceptions. They are exceptions. They are not the rule. Game in date for a short amount of time. If you're talking about marriage, it's a short amount of time. It's it's even years, even with

J

Jason 36:21

stray. Maybe that's becoming the rule nowadays. Well, but I mean, honestly, what my whole it was, when I was, when I proposed to this person, it was going to be an extremely long engagement. It was before I went, it was right before I went away to school, and it was more or less for us to have a stronger foundation to try to continue a long distance relationship, which is always a lot of strain on a relationship.

Ω

36:47

So misguided, though it was there was thought behind it, it was very

J

Jason 36:51

misguided, and was rash a rash decision to make. But there was yes, there was oh, at the time, that was very logical

Ω

36:59

to you. Right?

Ω

37:01

Well, I mean, to be honest, I think that, you know, let's say, Okay, tomorrow, they decided that in all 50 states, gay marriage is going to be legalized, you know, all of a sudden have, it's gonna, like, oh, we can get married, let's get married. You know, and all of a sudden, you know, you have this rash of all these people that are like, okay, let's just go do this, because now we can. Right, you know, and, and, and, and, and, granted, it may not be this widespread hysteria of I need to go find a husband now. But I think that, you know, when you when you talk about heterosexual couples that that, even though there is like a 50% divorce rate, there is more thought and more experience with the idea of marriage,

J

Jason 37:40

not with young couples, I don't think with young couples. My half sister got married at 18. Was she pregnant? No, at the time, she was not pregnant. She didn't get pregnant after the after

they were married. But she did get married at 18. And by 20, she was divorced. And you see a lot of young couples going out, getting married in a heartbeat and getting divorced later on. I think that's always going to be an issue with young, young youth with you.

38:15

Not yet. I think some of what I'm hearing is why go ahead and let the gay community contribute to the divorce. Right,

38:21

right. I mean,

Kirk Keevert 38:22

and quite frankly, contribute significantly to the divorce right?

38:27

How many people do you know who actually use the term husband? You know, gay men, specifically, who actually use the term
