SUMMARY KEYWORDS

people, bisexual, bisexuality, new york times, sexual orientation, gay, lesbian, study, assumption, attracted, research, woman, article, attraction, exist, man, box, measured, sitting, erection

SPEAKERS

Chris, Gigi

 Gigi 00:00

And a lot of the teams nowadays are identifying more spy.

 00:04

Do you do realize we do in the political arena,

 Gigi 00:07

here's the danger. They're going through Exodus. And Exodus is making them feel like they're stray. Because they're really by. And since I already kind of like women that's through this program, they're really focusing on pushing the heterosexual side of being bisexual, and reporting sick, massive successes, because they're taking these by teenagers. And saying, Oh, we're successful, we got them dating women again.

 00:49

You know, I could just see all the teams sitting at home holding the radio trying not to let their parents here. They're listening to us. And I just want to say, keep listening.

 01:00

In the closet with the headphones. Yeah.

 Gigi 01:01

And the reason I say it's semi related is because it's something like this New York Times article

AND THE REASON I SAY IT'S SEMI RELATED IS BECAUSE IT'S SOMETHING LIKE THIS NEW YORK TIMES ARTICLE that is another little boost to a program like Exodus. Another little piece to say, well see, it's here in print in the New York Times, it must be true.

01:27

I mean, John Hagee uses uses Paul, can you listen to the news, you listen to John Hagee from San Antonio? Okay, you listen to what he says about homosexuality. And then you go check out Paul cameras studies, which he would he would go through gay rags to get his information Hill and say, there's just this many people doing this. And it's all wrong.

01:53

And you can't really go by gay regs. I mean, that's a problem.

01:56

So see how he got his information as to

Gigi 02:00

that took enough probability and statistics and research methods to know that any study that's done, it takes years and years and massive follow ups to actually prove something. Not to mention it definitely a large non participant study with 100 people, or 106 people or however many GG,

02:25

isn't it better that the volunteers are volunteer without money involved? Yeah, in a research study, like this one,

Gigi 02:31

actually, you want a double blind study? That's the most powerful type, right? That way the researchers don't know the people actually being researched documents online. They set up a screening procedure so that nobody knows anything until after all the test data has been

02:54

taken. Yep, that makes sense. And how much would it cost to southern man, it

Giai 02:58

gets expensive, but basically, the double blind is set up. So that keeps any type of bias from entering into the research. I mean, it gets very complicated. And man, I want to go into too many details here to get too technical, but, but basically, this definitely was not a double blind study. It wasn't even a single blind study. Like I told

03:25

you, I really wouldn't either. You probably just played with the figures and put it out like I told you last week, I mean, people that ride diesel trucks get an erection. I mean, the vibration. Oh, yeah.

03:38

That goes along the lines of motorcycle riders.

03:40

I remembered to bring

03:42

that all that up.

03:44

You know, talking to the ladies on the white washers. The

Gigi 03:50

Sexual orientation is a lot more complex and a Rails open patterns. It's about the heart it's about the spirit. It's about the physical it's about the mental it's about the emotional, it's not just there out getting an erection so number one that was the first fault I found with that research was that they made this whopping conclusion based on a bad assumption that porn or physical arousal equals orientation. Wrong, doesn't there's a lot more to sexual orientation than just getting a hard on.

04:36

And there's people who are bisexual and have penile dysfunction and they're still bisexual. Oh, yeah.

04:42

They did a study where they did a multiple choice question Al Anon. They do like the question now, you know, like questionnaires, you know, like there's questions about

04:54

well, not in this study in this study they showed

04:58

in a study that measured GGS Talking about a study that Gigi is talking about, they'll probably do the one that's got like 600 questions

05:03

on it. Now, there wasn't questions. I

05:06

know I'm not important. No, that's not what I'm talking about. Then in the study that I participated in, that's how I know about the device. They gave me a, a little question answer thing is like A, B, or C, which is, yes, no, maybe. And it's a 600 question test. And it's basically denote sexual orientation. And this is a test that's been used over a long period of time, and it does except bisexual, I'll be in the test. Then they hooked me up to the device and they showed me people wearing clothing. And I had no reaction whatsoever. Now if they had shown an a good looking woman or a decent looking guy nude, I probably would have had a reaction.

Gigi 05:51

Once again, it's not about getting hit hard on I know. I mean, the erections important at the right time in the right moment, but

06:06

that's more important in the erection bar for me. Well, there's

Chris 06:10

an old saying, you know, a woman needs a reason a man needs a ritual.

Gigi 06:15

Gigi 06:10

I think it's a slap in the face for guys to it's like saying, your ducks gonna tell you who your love life's gonna be. Well, they

06:24

usually say that men are visual and the women are emotional. Is that right? Is that another mean? Or visual? I can't remember what the women are emotional.

06:34

That too is. It's it's me because I can see looking guy walking down the street. I go, Oh, with

06:42

the bisexual, it's both. Yeah, I see good male or female, it kind of incorporates us why we're bisexual in a way. turns

06:51

me on some more now. I

Gigi 06:52

think it also downplays let me I've talked about this in past episodes of after hours. Attraction is something very mystical and magical. There's some quality when there's 100, people walking down the street. And you kind of look at them and one of them stands out the crowd, makes your knees wildly, your heart go pitter patter. And your whole world changes. There's something very dynamic going on. And it's not about erections. It's about something much deeper, much more complex. And I think to take a simple study like this is an atrocity to all human beings. Because it reduces whatever that magic is. down to something that's nitty gritty. Inside, there's something very special. That happens when we walk down the street, or when we go to a party, or when someone in the crowd sitting on the boat. And so then all of a sudden, that magic happens. And that can't be measured. Was something around your union.

08:22

situation, your five senses, visual hearing. I mean, what if you lose one vote? I mean, I'm sure there are gay or straight people that are br live that can't hear or quite a few of them actually.

Gigi 08:39

I bring up the attraction thing because you can be a virgin and still have a sexual orientation.

It's not about who you screw. It's about who you're attracted to. Right, right. Right. Exactly. And there's a magic to attraction that is so deep and mysterious. And to try to simplify it and make it into these over simplified pieces of garbage is total, you know, I'm sorry. Just doesn't cut it for me.

09:16

Everybody's not gonna be attracted, like, oh, I might be attracted to people who like Xena and dark haired women or something. And some people like blue and some people like African Americans. Well, I

Gigi 09:26

think it's a slap in the face to all people because there's something much more going on. With all of us when we feel attracted to another person. No matter what I mean, let's step away from sexual orientation altogether for a minute. Just basic attraction. There's some spark. There's something you know, we basically all have two eyes, nose mouth, unless we had some kind of disasters injury. We have two arms, two legs.

09:55

So that's why I get a little weak when I see a midget. We

Gigi 09:59

But there's something that's something that happens. That makes one person out of the multitude out there, jump out for us. And I'm sorry, that can't be measured by any device around me and gain.

Chris 10:22

Knowledge there hasn't been plenty of devices around in case you've done enough research on someone, Ying Ying arousal, then the Nutty Professor up at Northwestern University, probably

Gigi 10:45

what's around what happened around my ying yang doesn't measure anything delivers baby.

10:54

And he's sitting there trying not to listen.

Chris 10:57

I might, my ear was itching, I still have the one that

11:01

was just the look you give us.

Gigi 11:04

I guess what I'm trying to say is that there's something much more to human relationships than just getting a heart. Well, there's something more to attracting as to each other than just physical.

Chris 11:24

Looking at already pictures, for some people, it's, you know, it's kind of a compliment. I've, I've always said, you know, part of where my self esteem and I've gained so much here lately was, you know, it sounds strange to say, but thank God for a webcam, you know, you're, you're chatting with somebody online. And you know, if you're just sitting words back and forth, you know, they can say this, and they can say whatever they whatever they want. Like the old phone lines, you call up and there's some 50 year old woman ironing and breastfeeding and kids saying, Hi, on kitten.

11:56

He was

11:58

the wrong picture, you know.

Chris 12:01

But, you know, it was discovered when I'm sitting there chit chatting with some of these guys. And, you know, I mean, you know, I'm a big guy, I admit it, you know, I'm Vice President of big men's club, because, you know, I'm second biggest in the club. And, you know, I'm sitting here chatting with these guys, and I bring in pictures of them and show the guys here, and they're just drooling over and I go, honey, you Hey, interested in you, because you're too small. Look at Big Boy and go big boys too small. And, you know, interested in chatting with these guys. And all of a sudden, you know, the cam goes down and you see in and around state and you're, you know, I suddenly turn an Urkel going, did I do that. And it's like, it's for some people, you know that, you know, that blood going to there and going saying that was caused by seeing you. It's such an ego stroke. And it really is in

 G

Gigi 12:54

and I guess that you hit on a key for me, when someone puts out an order record and says that, that arousal you saw doesn't exist for you know, that's what that article did for the bike community. And,

 C

Chris 13:12

I mean, unfortunate, because, you know, it's considered the paper of record. And it wasn't the bad part about that is, you know, the kids, hopefully won't be seeing that or hearing it. But, you know, the parents were popping into Starbucks to use it to get their \$20 Coffee. You know, or, you know, they see it at the work in the break room at work. You know, and then you know, when the kid starts maybe coming out taking his first steps going, you know, I'm just not sure of you know, is so if I'm Bondi or him because he you know, some people take that as the safe bet going, you know, I still like girls, I still like girls, but you know, I may be gay. If somebody will just throw throw bisexuality on his a shawl nowadays. Yeah, it's hip, you know, the 90s. It was hip to be lesbian. Now it's hip to be by.

 P

14:02

I don't think it is. No,

 P

14:05

came in our communities as

 P

14:08

the other ones this it. There's a lot of kids that do it because it gives them a chance to try and experiment. But a lot of times nowadays, most of the people like my age and younger, they end up finding out they are bisexual in the process. So what ends up happening is is they become what they're lying. So it didn't turn out to be truth. Yeah,

 P

14:29

I didn't come out. I didn't know about until I met Gigi like a 96 or so like that. I was thinking that I was lesbian, but then I couldn't understand why she'll trust me and I was like, so then my friend Stacy. She introduced me to bind and Gigi and I've gone all Cassie was here. And

 G

Gigi 14:48

I think that's the other thing is that in the press, we see not only in the straight press But in the

GLBT press, we see a lot about gay, lesbian and stripe. But there's hardly any by presence. There's hardly any. I mean, rarely do we see anything but GLBT and there's a little bitty B. Yeah, I mean, the only exposure a lot of people get to bisexuality is the GLB T. And

 Chris 15:24

basically the beat it and started coming in. Until Until we started dragging until the T's finally stepped up and said, you know, dammit, we need to be in here. And in a way, it's almost like the gay and lesbian community said, We need a letter in here to keep the Teasle away

 15:40

from what's what's interesting is most of the T's are bisexual. I mean, that's the most interesting thing about it is is that a lot of people tend to gear bisexuality in most situations with transsexuality, but it's actually a different category. That is, I mean, I may be a transgender, but I'm also a bisexual and it has no relation whatsoever. My what my sexual

 Gigi 16:05

sexual orientation and gender identity are very separate things now, we

 16:09

ran into the conflict sometimes what mostly is most time I ran into it with lesbians, but I don't know if it's true or not. I don't want to put anybody in the category for what would they not? They don't like bisexuals, they offended my arm. So it's not just from the straight world, sometimes we get it from the gay and lesbian world. So

 Chris 16:28

yeah. I mean, there's the old the old joke MIL standard was you're not bisexual, you're just greedy. And

 16:34

for all those who are aroused by people wearing glasses, I will be happy to know that everybody on the show is wearing a pair.

 Chris 16:44

I still got a letter that we got from one of our prisoner fans, the first time listeners who said you know the sound of my voice got a morale.

16:53

Lucky Dog. So I'd

Gigi 16:56

like to try out some other food for thought. Then this is kind of an interesting statistic. A little over 100 years ago, there's no such word as homosexual. There's no such word as bisexual. There's no such word as transsexual. The behavior certainly existed, they've existed throughout others trends and let me finish. For many millennia, mankind has gotten around has been able to function very well, without all these categories. And without all these boxes, and without all these pigeonholes, they just do it and have fun. Then in the modern society, have suddenly start putting all these little boxes and advice got to fit in this box or that box. Another box over here. And we've compartmentalize departmentalized sexuality, to where it becomes very confusing. What if we went back for a few moments, just imagine a world where we could just simply act on our feelings, who we're attracted to be able to respond to what our bodies told us. Instead of trying to fit ourselves into this definition or that definition. It's happened it's worked pretty well for many, many years. Many million years,

18:56

you're talking about poly relationships, again, aren't you know,

Gigi 18:58

talking about just having relationships without trying to compartmentalize it without trying to? No board 100 bots trying to define it. Like a poem again, without definition. Some things are beyond definition. When we tried to define something that see this happening every day, when you start trying to put the labels and the definitions on, all of a sudden, you see people kind of fitting into these for a long, long time. And then all of a sudden they jump out of the box. So it was Ellen. We saw it was it was a it was a lot of different folks out there. These labels these definitions don't quite work. I think part of why they don't work is because sexual orientation is really a fluid thing. It's not a fixed thing. Something that moves and shifts and and sometimes it's just a matter of luck of the draw what if you were walking down the street and that one person of the opposite sex wasn't in the crowd that day that would have attracted you. But there's someone of the same sex or vice versa or both at the same time, so you didn't meet are both at the same time. And so it's really kind of a lack of attraction doesn't know those boundaries. Whatever traction is, it's much deeper than that. transcends transcends all these labels and boxes. And isn't that really what it's all about? So just sort of go ahead

21:05

well, how much more time do we have? Till the top they

21:08

are they okay

Gigi 21:13

guys ahead and say something and then after that, why don't we do a quick music break?

21:17

I got one

21:18

queued up. Okay. Well,

21:19

I just My first experience with bisexuality was in high school, I was in the lunch room and two people walked in and suddenly I was attracted to both of them. And I couldn't figure out why. One was one of the guys from the chess team and the other one was a female basketball player for school. And suddenly, I couldn't keep my eyes off either of them and they were sitting on either opposite sides of the room and I was in between them so it was kind of hard to keep an eye on both don't feel

Gigi 21:49

bad. I used to sit I had knee problems. And well actually first problems sit on the sidelines and PE and I tell you, there's like the whole school. Well, not quite the whole school but there's a lot of boy jiggles and grilled chickens that were going around the track. I was attracted to a lot of people that

22:15

I remember my I remember my gym teacher to have this perfectly round bullet. The shoes were too short too light or too small. And they were like tight. And I remember his house she always walking away and I'm always looking like oh man.

22:33

I never thought I'd actually meet someone that like their gym teacher.

G

Gigi 22:37

Why don't we go to music and we'll come back and talk about this like a research project.

C

Chris 22:45

Well, yeah, here's another little DD that's a little remake of a song. And you know what kind of boys out we like? boys like me or? I don't know boys like and it's from the frustrated housewives. All right, we started off with retrigger servers frustrated housewives with what I know what boys like. Which could be in other words, GG steams. That was Femme and a leather jacket. Feminine a black leather jacket, my pansy division. Now

♀

23:26

she's outside in the lobby.

C

Chris 23:30

But usually, it was colder weather ggbn in leather, so and we turn it back to Gigi. Oh,

G

Gigi 23:39

well back again. And we've been discussing the horrible New York Times study. Grace, gay, straight or lying? Bisexuality revisited total fraud journalism. I don't know why having a paper like the New York Times would publish a scientific document that edited by someone that's been thrown out of the university.

♀

24:06

Isn't that the paper that has a gay columnist? Yeah. I mean, come on. I mean, are they thinking? Nothing, apparently.

G

Gigi 24:16

But basically, I think part of it to me is, you know, there's a lot of human lives out there that are struggling with these issues. And you put out a piece of garbage like that, that has no scientific basis whatsoever. And it can be so misleading not just today, but down the road, people are going to be quoting this thing and using it as proof so called proof. And, you know, in, you know, the New York Times was really bad because their response was, Well, there's guys out there that I really don't believe that bisexuality exists. That's why we ran the article as their defense. Who

♂

25:00

25:08

are these words? Well, I want to meet him.

25:10

After this in the paper. In the New York Times itself, was there a commentary? After the after the from, from readers?

25:21

I want to I want to know what the eight colonists had to say, I can tell

G Gigi 25:25

you this. And I don't really get the New York Times I don't read it, usually. But I do know that there have been hundreds and hundreds of letters from bisexuals all over the world responding to this to the New York Times.

25:42

I was just wondering if there's like a dear Mr. Editor, this is my feelings. I'm wondering if they

25:49

retraction your

G Gigi 25:51

actual the bigamy and that he is actually asking for the person the Okay, the article to be fired. It

25:59

was seemed like he would have gotten a response in Northwestern University. I mean, that's Chicago, I mean, elite See, could get more than 101 people

G Gigi 26:08

to respond. That's not the issue that that's what he based as

26:16

too few too little. Well,

Gigi 26:17

it's not just that, but just making, you know, in any research article, you can make certain assumptions. But you have to be very careful in what you assume. I have an assumption that is back it up? Well, in a sense, when you make an assumption, you say, okay, we can all agree that this is true. And you want to stick to things that are pretty standard black and white and standard, you know, that these really are trees, to make the assumption that sexual orientation can be measured by hard ons, as a flying leap to make the assumption that you can show people porn, and be able to extract their sexual orientation from how they react to porn as another giant assumption, no, that's not really a truth there. So you have to be real careful, you have to make some kind of assumption and approve, you know, you have to agree, okay. We're going to agree that one, two and three is true. And based on the truth of this, then we can make certain collect data on so I'm guessing end research and then come to certain conclusions. But if your assumptions are faulty, then necessarily whatever you try to prove, based on those assumptions, it's going to come out faulty.

27:55

So you don't agree with me the methodology during the researchers that say no exceptions at all? What do you mean? I mean, there are some Reacher's researchers out there that make no assumptions whatsoever to do that.

Gigi 28:13

Research has some sort of assumption, and then doesn't matter what the research is, there's always an assumption and research. You have to assume, basically, number one, that one basic assumption that all research is that the numbers that you're using, the statistics that you're gathering are, are an accurate measurement, or an accurate way to measure. That's true. That's an assumption. We all assume that. So there's certain assumptions made no research. There's no research, that's assumption free, you have to believe that one in one equals two.

28:58

That is true.

Gigi 29:00

But this New York Times article made some pretty fraudulent assumptions to begin with. I think the other thing is that, you know, like I said earlier in the show, whatever attraction is, whatever sexual orientation is, it's not something that can be measured by how your genitals respond,

29:26

or any other mechanical device. It's

Gigi 29:30

something that goes much deeper than something that's mysterious. It's magical. I've talked about touch on this show, and

29:41

you've shown it to

Gigi 29:45

and some of the things that transfer when we touch one another. There's something very powerful that happens. And there's no research that Ken has yet demonstrated what that is, but whatever it is, it's mysterious. gives us something when we touch a radically in love that becomes amplified. Would you like to speak to Daddy that joined us

30:14

Thank you sir. Appreciate it and

Gigi 30:15

congratulations on becoming daddy and mantras

30:18

Thank you very much

30:21

this lovely vest

30:26

i for years for 25 years that then I've been out have this problem with with this whole, you know, feelings and emotions for people. Our personal base, you know, and you know, I've been a dvke for as long as I can remember but I can tell you right now that just last week I saw

as long as I can remember but I can tell you right now that just last week I saw Edward walk by having a bar and I was like oh my damn Jesus see that?

30:56

Yeah Do we have that relievers?

31:00

Can I get done with sores but I there's

Gigi 31:05

question use a Latin-ish sounding word

31:12

what I'm what I'm having a problem with is said if there's a feeling share between two people and the biggest one for me is that I have a lot of, you know, as lesbian I have a lot of gay men friends. I've traveled with them. I have slept in the same bed with them. I woke up snuggled up next to him. And I love them I truly love them. And then I have lesbian friends telling me well you're not you're not like timeout what? Wait a minute. What are you talking about? We are so into defining other people's personal business. You know, and I know about you but get out my personal business

31:57

right feel me hear what I'm saying is that I said no. If you want to share me your business, I'm gonna say well, hey, did you have a good time? Did it feel right for you? Did it work for you? And then if you turn around and tell somebody you know, this is what I am okay, I'm not the one to share behind you going well, you know, you're not really homosexual. You're not blows me away. You know, because I don't know about you. But you know, if I haven't a date with a woman a while man if let them and here's some Yamo opinion, dare the police to come to my house and try to revoke by getting more than they are. If a gay man is having, you know, a moment and all of a sudden he needs a friend of mine five years ago call me one day and he goes I have never been I say this wait a month here. I've never been intimate with a woman

32:51

never had intercourse with

32:52

no. actually it was more of the oral and he said that he had spent many years trying to figure

... actually it was more of the guy and he said that he had spent many years trying to figure out if the fact that he hadn't done it. Maybe he should try that. And he's like, you know, but if I do you know men will think I'm gay. And I'm like honey, I don't care how much oral sex you might receive what a woman you're still good for she probably went out and did that and came back and I'm still gay. There were gay men tried to take away his gay card. What Why are we as human beings emotion based life forms not allowed to go out and experience that and still come back towards herself or

33:30

having a girlfriend We dated for about three years and we use it as club right down the street right next door and a map Donald's going near me and her we be dressed like we look like two big old bush coming there and manhandles male stripper nice on Friday night. And how their male strippers we be upstairs having fun and he's like guys, and we'd be having Whoopie.

Gigi 34:03

pie for one of the things I was saying I'm break outside when I was smoking a cigarette. You know, what if someone did a research article and said, we have proved that homosexuality doesn't exist, or we have proved that heterosexuality doesn't exist. There's no question. There shouldn't be any question. Bisexuality exists.

34:27

It exists. We don't need results in studies and tested exists. What is it goes down to human tolerance. Everybody wants their own little playground. Okay, this is our playground. This is your playground. This is a bunch of nursery.

34:44

I want to I want to touch on something you mentioned was the fact that there's always somebody behind you saying you're not this because you don't do that. I have this problem because I am a T and I don't act like a T because I am I was meant to be a woman. Period. Okay. But what it is, is I don't act like a T because the the T's from a how do I put this nicely yester years? They tend to be you have to be exactly like a woman or you're not a T. But then where did gigi and I fall in? I mean, Gigi is right

35:19

next to me, honey, wherever you want to.

Gigi 35:22

Actually, I don't exist because I'm a hermaphrodite. And I'm, my gender does not exist in this society. I can get my driver's license and go if

35:33

you look like a duck and quacks like a duck, we got to make it a duck. And then it turns out to build duty. I can't go

Gigi 35:39

and get surgery to make me back into what I was born to be US born with both we need to get

35:44

a female on the show.

35:45

I am a female.

35:46

I know but I mean, besides you we need to get on here. Okay.

35:52

Hello. Is there any female doctor awake? Collins? I don't know.

Chris 35:58

We're starting sound like the Howard Stern Show now.

36:02

We know it's not my Bible doing

Gigi 36:07

okay, now, now with this New York Times article. Okay. Bisexual, and I was gone for

36:14

50.4%

five weeks. Term articles are you referring to please?

G

Gigi 36:18

The New York Times article is called gay straight or lying bisexuality revisited and they proved bisexuality does not exist.

♀

36:29

The editors wife was out with her girlfriend so he was your wife and then we're out having dinner you know, you understand no straight people write these articles. So they have their own agenda. So they say it doesn't exist because my house liar.

♂

36:49

As I said, they went into the political arena.

♀

36:52

Okay, but I wouldn't just erase your T issue. And I can speak from personal experience in the lesbian world, in the lesbian tea world. The the newest wave, and I'm going to say wave, for lack of a better definition is not afraid to miss a wave is young lesbian? Are we wrap it

C

Chris 37:15

up trying to get Jesus attention? Oh, we're getting close to the top of the hour. Okay. We're gonna be wrapping up here. Go ahead

♀

37:22

and finish and then we'll wrap it up. Okay.

♀

37:25

But, but to share with you is there are young lesbians, butch lesbians now who are at the age of 15 17 and 19, going into transition, and opting to not go anything past, dressing and packing like a male. So they're not having a surgery, they're not taking tea. And they are identifying themselves as

♀

37:49

male. And see, that's the category I fall into. And that's why most teas don't agree. Even my own mother who is a tea doesn't really agree with it. See, the

37:57

thing is, is that now what you really need to do is again, you find these people because when my friends who have done this came to me and I went okay,

38:06

I brought this up earlier in the

38:08

show backyard, she's rapping

Gigi 38:11

I think there's a danger when we try to make these little definitions and boxes for everybody to today to get into this weekend. No ever box. Not only can we not some of us not fit in the box. But those that can for a little while may not be able to ever time. Alright, and then what are we doing? And then what are we doing to them? And it's psychologically damage. And

38:36

now, if you're in a box, get out and come out of the closet today? No, no doxford above

38:43

the headphones in the closet listening to the show.

38:45

Get out of the closet and out of your box, or here for you.

38:48

But I do want to come out and say that she's coming out

Gigi 38:59

actually, whatever you want. If anybody has any questions about their sexual orientation, or their gender identity, listening to the show gets some accurate information. Don't read The New York Times. Stay away.

39:19

They lie there straight people stay

Gigi 39:20

away from Exodus.

39:23

Not even straight here. The husband really don't get some good people. There's people out here in the community who will support and

Gigi 39:31

also listen to your own heart. What is your heart telling you? What are you

39:37

confused, but it's okay. You're allowed to be yes.

39:39

Just real quick. I want to something if it's alright with you. Real

39:43

quick. I'm wrapping up here.

39:47

For any of the young, transgendered or bisexuals out there, I am a counselor and my webpage if you have any questions and I can connect you with Gigi and anybody else in the BI net is our FW craft@netscape.com It's dot net. Sorry.

40:05

confused them all now. Call the radio station

G Gigi 40:12

one last word. I love yellow. Love is really where it is. whatever form it takes my grandmother one time told me she's very wise woman says it doesn't matter what form that takes. When love comes it's beautiful. Celebrate it and live it fully.

♀ 40:34

If we're gonna go we're gonna end this

C Chris 40:39

we're gonna do little transitional music and let you get ready for the roundtable discussion. Remember tonight's topic, the sandwich that ate Montrose coming up now it's Jane County and I thought we needed a little Texas Chainsaw manicures. This is listener sponsored commercial free Pacifica radio for the Gulf Coast KPFT 90.1 FM you save and point five Gallatin and always on the worldwide web at KPFT dot o RG. And with this kind of discussion, this kind of music can only be after hours.
