SUMMARY KEYWORDS

equal rights amendment, women, amendment, children, family, society, country, congress, men, state, power, making, people, social ills, instance, individual, left, kansas, proposed, 16th amendment

00:10

reporting on my rights and doctors supporting the negative survivor contribution our grassroots areas where you're represented by a man and God is represented by a psychological deformity. And plasters include active in the political and social shares of the community. So those of you who have strong personal convictions

00:50

which I hope will be very satisfying and unsettling and irritating, it's really quite pleasing to hear a person articulate when most chairs believe exactly what it is they're trying to be forced to listen to those who take an awkward position. Debate is for all of us who are attempting to believe that all positions on social and political issues have a right to be hurt. Each partisan hope that the cost of irritation will be retained by Re exposure of the opposition to the arguments of the side that represents his or her position. Each I also hope that the arguments that are offered may influence the undecided. So that I hope that was I ideas in mind that each of you will resolve to ensure that the conditions in both sides may be fully and fairly. The format for tonight is that each speaker will have initially 15 minutes to present his or her position. And we will alternate speakers for each son. This will be followed in turn by a five minute period in which in the same order, each speaker will have a chance to respond or to answer, while seven certified or the person who are qualified for braces was one of seven certified

02:32

women or

02:34

persons who are qualified. Recently, new profanity has been asked you see some people right now to the Kansas delegation to the International Women's Year Conference in Houston, was also the national chair with an eagle core from Kansas. And He is the chair of the Kansas derivative to Mississippi can be supporting the property.

03:17

Thank you very good. It's a pleasure to be with you this evening and to share some of my thoughts about why the Equal Rights Amendment is detrimental to America. So that we know what we're talking about. I think it's always good to read the amendment. A lot of people think that the Equal Rights Amendment is quite lengthy, and not the very short amendment that it is. Second one simply says the quality of life under the law shall not be denied by the United States or about any state on account. Testing the Congress so half the time looking for legislation, the provisions of this section pretty safe. This amendment, so take a pass please, years after date of ratification. These will have been one of the most debated and perhaps one of the most misunderstood amendments that's ever been proposed to the United States Constitution and opposing the amendment. We are not against the equal opportunity for all. We believe in the role of individual choice. And we do not do government mandating rules and regulations over our individual. We feel we're perfectly capable of making these individual decisions about our loved. One is it that level of because it does not allow any legal distinction, under any circumstance, between male and female, we believe that male and female should be legally treated differently. Equal Rights Amendment, if passed, would take away the legal power from the homemaker. She would be responsible for home support, plus tax support of the family. Because if it were any other way, it would be taking a greater responsibility on the law or the man determination. So it would be impossible to maintain laws that was safe that the father was primarily responsible for supporting the family. Whenever I read the Equal Rights Amendment is not a women. I mean, man, woman, boy, girl. So there's nothing about the Equal Rights Amendment that states that it is a women's rights amendment. It is an amendment to eliminate and under every situation in every position, legislatively and legally. At the time, the Equal Rights Amendment was debated in the National Congress was concerned with the vagueness of the Equal Rights Amendment. So he proposed amendment amendments are a new way back this is the first amendment that's ever been proposed. State Constitution that does not specify as far as Iran. citizens of this country retailer wants to know what an amendment means what any piece of legislation means, what it's going to do for those who are against it. So we feel that we're perfectly within our rights to ask that this amendment be sent back to Congress for numerous amendments that are code. Women pretty simple three ways to combat this in the military. Now, we feel that women should be exempt from combat instead of compulsory military when not only physically different but psychologically different from them. I think in the fields, as you can see, when I'm making in the field, like you can't go down if any of them were to come out, because women can be sexually abused much worse than men. Another rapidly amendment that says Urban's supposed to maintain the legal protections that women have now thanks supported by her husband for the family. Another amendment would be to maintain the existing law, security and privacy for males and females. Another, making existing, maintain existing laws making central effective. All of these amendments that were proposed were voted down by roll call vote. So we're going to assume that it was the intent of this Congress, that none of these things should be exempt from the Equal Rights Amendment. We got to assume that this Congress wanted women to be granted a certain concept that men would no longer be the primary supporters of things, that there would be no harm securing your rights to privacy for me, as I'm seeing this information is available from the Library of Congress in a presentation the entire the Equal Rights Amendment implications, and you can win the equal rights amendment but first amendment to require equal pay for equal work. But if we've gotten into the debate on this amendment, and the proponents will agree that there are already existing laws to guarantee equal pay for equal work, there's a 1964 Civil Rights Act and that means 72 Equal Opportunity any people who go through the run would not get an automatic rate, they still have to go through the same procedures that they can permanently

go under the EEOC to an Equal Rights Amendment is the most dangerous, because it states that the Congress don't have the power to enforce by appropriate legislation. This is a massive transfer of power from state and local governments to the federal government. All legislation that affects an individual citizen, that includes standing on the board has been inherited survivors, benefits, insurance rates, prison regulation, for protect the labor. Power to the federal government away from the state and local governments. We will see amending the way representatives determine we have no one in this country. And all kinds of diabetes makers would be bypassed and another federal bureaucracy instituted to carry out the preventive manner. That is the case in the federal courts, and ultimately, the Supreme Court will decide on all of these matters. And we have only to look at recent support supreme court hearings to decide whether we want to put that much power in the hands of people, because it just takes them to the Supreme Court by the past.

12:04

That the state legislators should say the Equal Rights Amendment back to the time when the numeration of Rights and Equal Rights Amendment is open ended and does not tell them what to do or whether or not to do. Any future Congress is not calling the table has proposed an amendment is the 16th amendment and how many in this room can tell me what the 16th Amendment is greater.

12:42

Peace is very well with the Eighth Amendment exam compared to them, and then it will be affecting each of us to go out into the

12:51

job market. That was passed four years ago, and it was good my parents lifetime. So it is really that far removed from the people that proposed the amendments that were posted the 16th amendment was to put a ceiling on the amount that could be taxed. The individual senators said that it was necessary in a memo outside and the opponent. Let's not have an open ended amendment, let's put a ceiling of 5% on the 16th amendment. Even somebody making \$10,000 a year would only be paying a minimum of one or 2% tax. Those of you who are in the earnings substantially or ask your parents, if they're paying less than 5% sales are in contact with it was open ended and users can have done nothing but they chose to do. So today we're spending 43%

14:09

of every dollar that we heard the potential of taking more and more of our content to leave Milan to the bureaucracy and to the people that we supposedly, I have converted because this amendment is open and use your time and we'll get right to it that will be detrimental to America and America and our constitutional form of government.

14:59

I think that the family unit in the US and from the family, even to the communities in the towns in the counties, the state and the federal government that was saying, far as we're concerned that there will be too much power to capitalize power losses. So they will, they would, there would be an opportunity to craft and trade off lawsuits and they would be kept to the state

15:45

as a service in a state and the federal government would do only those things that they can local governments could not do. And we are seeing a complete reversal of that for the betterment, what we are seeing today is a concentrated power market. And when they have all of this, then we could be primed for really have to go back in your lifetime in my lifetime, back to the 30. There was invested by people who didn't know nothing better, he was elected by the people along the process, he was going to do all these wonderful things for Passover tuber, where they left him on the three camps, and then he was going to do all the wonderful things for the people. And if any of you know any of that,

16:58

all you have to do is come back

17:00

I have a very dear friend Gregory worked downtown in Kansas City. And I said the other day, they did, were you able to bring anything out of Cuba, when you met

17:18

people that are making numbers

17:19

and, and they have a lot of people. They are anytime ridiculous for you to ask because we know that when a

17:32

dictator takes over our country, they land on your bank account, and everything you owe. He came out with nothing. And I think that the same thing can happen in this country. Now we've all

17:55

been pretty slow. And several things can never happen. 1015 years ago when I was talking Doctor hoping he would never hear cancer.

18:24

I think about what can happen in the future, you do have to have that back to medicine or whatever you have. To do to because if you don't, you're not going to be successful in whatever occupation the same thing. You have to learn, you have to have an understanding of what's taking place in other societies. And I would be willing to bet and I hope you will remember that because I have an idea that over half of you are for the Equal Rights Amendment. None of them are saying I'm here to tell you to change your mind. The only thing I want to say is that I hope you will open your mind and read and listen to everything that's been written about and not allowed to rise to the concrete because that's the biggest mistake. Anybody could do. That they equal rights amendment that can that happen during this really working just as in 10 years from now to see that it is because I think you will find it will be detrimental. So you're not, that's not going to affect my last a few months, it's going to affect your life. So it's something and it's nothing. It's nothing that very few of us whether this is the kind of world that kind of miles that you want to say

20:29

thank you very much. On the negative, denying that the women's movement is in fact impacted by Dr. Harriet Lerner, a staff psychologist, the manager foundation holds a master's degree in educational psychology from Columbia University, and a PhD degree in clinical psychology from the City University of New York. For articles on the psychology of women have appeared in scientific journals. She is a member of the Mayor's Commission on the Status of Women in Topeka, and is currently co author of a book on the special problems that women face and Coping with Anger and aggressiveness.

21:25

1973 Kansas, doctors both analyzed the data Davis the impact of the women's movement in 1977, the topic feels to me that it's not foolish to label these drugs, social, political and economic equality as harmful to society. Speak to one truth only. That change is an anxiety rousing scary for all of us.

22:05

And yet, I was struck by the fact that women are signed

22:11

on to the rights of the individual last time as some of us here tonight. It's probably because move country for quality. Saturday for the American Society of corrupt women, the guy was treated. I felt the near future. And this debate

22:40

was seen as passing

22:41

that took place not that long ago. Not taking it tomorrow. But today we are told that that was the big earlier. And I was told to speak about that. I took it was my task to summarize the positive constructive arguments.

23:09

And I found that to be

23:18

too complex to Congress and to farmers to be taking so long to live the impressive programs and services that have been developed. It be taking all these new

23:47

establishments attack for women separating divorcing recently with them. It would include the proliferation of new health clinics and referrals. For counselors nurses in childhood, it would include all over the country for mothers are working on accessibility. We desperately need for childcare. Good childcare has not been met by the existing social agencies. For all of the United States, women are establishing their own law firm credibly, their own health clinics, childcare centers, around an anti rate squat theory. Download Materials are collected programs such as the one here set all have our lives. We see it the best and immediate work for the first time, air time and television. Now for me is a shoo in means it is presented in the new revised textbooks that our children's schools rejected first time children's children and female characters are portrayed accurately as attentive individual reading aspiring writers choices can be seen in magazines, magazines, magazines, country is so old with rental car tickets, undercover changes why were small American

25:54

ERATION generated by the woman but it is not the tangible measure towards the quality was truly cast you know significant probably the semicolon says

26:17

that the right to vote for equal civil

26:19

rights may be good, the true and application because neither control nor record, it begins in the image changes that we see how to deal with changes for today's woman, whether she was working with me or as the home as new dignity, purpose has provided the atmosphere to the expression of real feelings and has inspired them to join together collectively to disclose to be to do

27:10

not need to

27:11

do is

27:12

take a big sign by mail extra. But as soon as you sign by every day and have the courage to speak honestly that their own wishes to focus is yours able to listen carefully to other women.

27:30

And we're now getting to know the

27:33

so called true nature of femininity that happens generated by this process of self definition self determination has required a vision the current view of everyone is pressing the patriarchal nature it did not seem particularly significant to us that the legal religious and non political medical institutions of this country were recently done. Even if the issue could have concern

28:17

us most directly

28:21

devotion or birth control or whether we can have our husbands with us in the delivery we took only those privileges granted to us by male power extraction it may many controlling established femininity that we accepted to be passed on without question to actually we to

established femininity that we accepted to be passed on without question to actually we to create a culture in general watch television. TV came in all different ages and sizes and shapes. From the sum of all of them, cases, they're all different and they were all about doing many design adventurous things and they were shown on TV right? To pursue politics or adventure or women that are definitely ultimately leading a creative, productive work with children

29:51

there's something that I didn't I didn't understand about introducing a TV control technician with the start

30:22

it has occurred to me that we can do that we can make a TV show that could depict the different shades

30:36

throughout told the story where we are beginning to tell our own story to tell their story, and men are raising questions about it

31:01

Trump are beginning to question that in the country to call the tentative production around the world. We're meeting investors are predicting things take credit

31:26

for perhaps the credit worthiness of the children and a feminist, despite rumors to the contrary, are deeply committed to being a good mother. But we are hoping and indeed some of us aren't

31:46

that many

31:50

the move to a shared parenting and shared responsibility for childcare, it's more of the mental health profession know that there are many costs when a child races isolated myself after day after day, year after year to do a little less but many small children too often situation

32:34

the structure

32:51
but also as consented to the media

33:04
if we can get to \$1,000.

33:15
According to Pew, that decrease right close and in the gay rights movement

33:28
Bose has left integrating trends in the family.

33:41
And it's probably never books and articles and looking at the decline of the family in the United States, including just been published in 1977 called the captured family by sheen and group and review festival. That our next speaker is that.

34:09
Gentleman it's a pleasure to be here. I don't think because the base is a laughing matter. I remember this page and Eric Well, we were in the back room in the city hall as I recall. I like to put my remarks in the context of what I think is happening to this country because I can best be understood in that context. But I'm not out to try and damage anybody personally or any particular movement but I want to speak to a trend that I see and it worries me whenever America has been good to me it's given me a good life. It's given you a good life. I honestly believe I truly believe this unless we change the trend we're on it our great nation is imperative on the fact that our thinking I think it's already and the reason that it takes very strong people, that means strong men and women to make the strongest. The signs are everywhere that our nation is slipping in spite of its vigor and its strength. We see social ills of all kinds of mushrooms increasing. For instance, suicide is now the second cause of death is cause of death in young people. It's incredible that young people right on the threshold of life would be taking their own lives, there's no mystery. There's filled with despair, they give up, they see challenges in life that they cannot master, because they lack the resources to achieve the level of mastery that it is necessary to make it and so they commit suicide. Suicide is the ultimate expression of defeat are a little added on here and again here in our culture, for instance, is a is an extremely anonymous phenomenon in our society that probably 25 People

are using marijuana regularly and other drugs and certainly you all know about alcohol are widely used. This is a toxic substance as well. And it says a retrogression. A retrogressive trend in life rather than a progress in the there are many other social ills for instance, the assault that young kids make on schoolteachers, my goodness, I never would have dreamed of striking a school teacher when I was a youngster in elementary school and yet Kids these days are assaulted 1000s of instances yearly and doing damage to school. I read somewhere that there are 100 murders committed in public schools. Now, this says something these are the symptoms of an internal process with which in my opinion go along with all these various social animals. I will mention child pornography, child prostitution in in Los Angeles alone, over 30,000 Youngsters being abused and treated in this fashion. Wherever Americans as long ago that use lizards gathered these lost kids and other clothes and taking care of them. Every one of these children children are being abused, not to mention child spouses know about these are the social ills are many more that makes me worry about the state of our country. But there are other phenomena that are even more alarming in the sense although they're probably not quite as dramatic. I'm referring to the lack of the durability of the heterosexual bond. If you think for a moment, sexuality is necessary for the perpetuation of the human race. It's necessary for a man along with a bill to live in harmony with each other and create a family in order to bring on the next generation of a heterosexual bond is not as substantial as it once was. I just heard Margaret Mead in Washington DC last week say that there never has been in Europe and there never will be a substitute for the family. And I think she's absolutely right. But the fan is going down the drain. It's disintegrating and an alarming rate. Not only is it disintegrate, but those families that do remain intact shows serious signs of strain. spousal abuse is one of the manifestations of that when they start slugging each other should. This was dramatic Exactly. Can't make it together anymore. The divorce rate is reaching 40% overall in young people it's even higher than that. Secondary marriages fall apart at the rate of 59%. This new venture ventures called mate which is making process, natural hurts, can't make it psychologically. Why can't There's no mystery about the kinds of changes that have taken place in the past 50 years or so replace such strains on men and women, that they cannot produce the kind of high quality parenting are quality, mothering and fathering that it takes for a child to differentiate in a clearly defined male or female, and grow up to be a strong man or woman. Was it done that man laws have taken men out by the way, so men are willing to die for milk for

40:49

making better way safer anyway. long commute distances, as a consequence of that women have had to shoulder responsibilities with rightfully belong with a man. And as soon as a consequence, she the woman has been unable to deliver the higher quality kind of humaneness to reach every child deserves. And the same goes for fathers with these generation, children who have been getting less and less currency that every child deserves, the Johnson and Johnson consequence of that fewer and fewer people can make the heterosexual bond durable, is the fan that builds civilization builders in our society. Every expert in the field in historians will grant me who by the way as feminist movement at times, times did. Occasionally, but any event, the family the family is the cornerstone of civilization. And it is in serious trouble. And not only that women are making a mass exodus from the family. And that's understandable in part because nobody is a woman's functioning within society rarely recognizes the mother is much family making function. You rarely see any recognition given to the to the higher and fine art parents, either by fathers or mothers. About the only place the woman who makes a family gets any any positive feedback is, if she's lucky. It's no surprise to me that more and more women are leaving, leaving their families responsibility knowing job market. Now, of course, it's true that inflation is forcing many into the job market. When there are characters they would

say. We now have 39% of the working women. By the way, when it comes to the office 50% of the workforce now 39% of those women have preschool children. That anybody can take care of a child as well as a new mother. 34 54% adolescence 54% of the workforce, the adolescent statistic that really shocked me is the fact that it is hard to believe that in women 18 to 24 years, they produce 13 point 5 million babies. It is projected that 50% of whites will be ill 78% of blacks are going to be eligible. This is a projection into the future. I can't verify with the accuracy of this prediction. As a lot of it is it will not get adequate apparently. So you add up those that statistic, a statistic of the women who are forced by economic pressures to order for by women who have elected to work because they no longer have the family making function or can't because of their own psychological difficulties. When you read the number of men who have nothing to do with their children, grab a can of beer and watch the television I'm able to know I believe that our children, our parents, and if our children are our future adults or their families in parallel nine noble nation, I think it's time that we really began to look at this issue very squarely and do something about. It's no accident, for instance, that homosexuality is on me, and I think it is a sexuality is an expression of the fate of as the parent and the child, that is amply documented, we have time tonight, and we can get into the depths of that. Or get into that in more detail. It doesn't surprise me at all that the day that we'd like to add their way of life, this time is normal, this is perfectly natural, everybody would rather that their environment accommodate them as they are rather than change and meet the expectations of the Lord matures. So, in my view, is is a form of ology. I provide that the same sense with a homosexual patient designer or anyone else. But let us not define it as a norm. Because if we do, we might as well define other forms of individual personality has changed the values in society and you've just put another nail in the coffin. So that is the cornerstone of society, namely the family is going up. And if we change our value system, so that we reinforce the psychopathology that emerges from disturbed or broken families, you're saying a vicious cycle of emotion that the only one thing is send our society in a downward spiral and I frankly think it's
