SUMMARY KEYWORDS

people, homosexual, children, society, psychiatrists, sexuality, life, talk, gay, family, point, homosexuality, history, man, country, national, women, taught, father, read

00:01

is a family

00:02

it is going on. And if we change our value system so that we reinforce the psychopathology that emerges from disturbed or broken families, you're setting a vicious cycle of emotion that's the only one thing that is send our society because downward spiral I frankly think it's you have direction like this, I don't think the last person very pointed questions. I think it's a it's a marvelous opportunity for us to get together and exchange ideas. And I hope people really glad to come there because this is the WAY the TRUTH emerged. So I will make notes on what the other say.

01:03

Families here from the key however, they had three successful marriages.

01:18

However, because she has co authored the

01:27

fourth and final speaker, practices folder, who is called the Executive Director of the National Gay Task Force, and formerly a professor of biology at Rockefeller University in New York City. He was a member of a delegation of gay activists that met with members of the Carter administration last month. And he currently serves on the board of directors of the gay rights National Lung,

01:53

will argue that the gay rights movement

01:55

is not destructive to society. Dr.

02:08

I'd like to start off by telling you a brief anecdote about Margaret Mead, because she's one of my favorite people over the nation a few years ago and lost a British team of people who were rather anti American, interviewing her. And they commented at one point that we Americans are extraordinarily materialistic in this economy comment on that when she said with their typical selfish to mindedness are lucky to get you to do Oh, you've got it all wrong all together wrong. We in America throwing away our washing machines, our cars, everything we own distributor intervals and don't attack anyone input whenever the material claims it's something that's down through your generations of family.

02:57

I want to say that in terms of the larger the issue

03:08

against again, being the destruction of society, undermining culture, undermine the family, we've heard it all juicer 30 days occurred again and again. And again, now, one of the more interesting bits such as stop and think about it as a silent violence of the fact that we have gay people, and those share this audience and throughout the country going on Jay, I've been deprived once again, of history, and thoughts and thinks and learns to some of the gay people in history are you see that point of view must be adopted rather quickly. And I might replace myself with that. Alexander the Great and the high points of Greek history, a homosexual, Socrates, Plato, Aristotle, all other sections, and pipelines and weak society not in a client, culture and society, at the very heart of it, and the essence of it is the part of ourselves to Salka that report celebrated lesbian, or homosexual. Caesar the high point of Roman society of homosexual, Napoleon learned that an adventure is eventually the adventure of the bicycle and the gear machinery, painter of the Last Supper of the Mall of Asia. Michelangelo. Still, there are many other things that the Sistine Chapel is in St. Peter's in Rome, gone down through history, to the contemporary time, who are the great people in many respects of our society and culture, the high, high watermark, intellectual history of musical history and the life in Stein, John Maynard Keynes, the father of modern economic theory. That camera shows great leaders in United Nations we could go on and on with such people watch out for here in the Midwest and famous Midwestern novelist and lesbian. With the election law, no color jurisdiction and Tchaikovsky, we're a little stuck. How many of you have heard all of those names before, even here in this audience and knew that there were a day, there's a silence, silence, and align, discover with throughout history. And throughout what we hear so much of today. That silence silence is one of the things which I applaud, and speak again. And I think that we as gay people can have man, the public and people throughout the world, here to learn and stop the

hypocrisy, the falsification, and the lives of children and adults, which generate no longer just the violence. The violence, which we know so much, but the open and overt violence, this culture has been taught, hatred, has been taught hatred, from the time and breathe in the schoolyard attack cities, further through to the left will be held back Saturday night beings in any kind of this country that you can talk to people, construction workers, we can make remarks about women and do sexist numbers on them, and do the same thing that go beat up facts. And that kind of hatred is inculcated down through the history of people in this country. And it's an appalling thing for how many of you also though, there was a capitalist tend to be homosexual, all the 13 colonies who would be killed, and several people were raised in the colonies, including Massachusetts and Virginia, near being on a sexual that virus has continued throughout American history. And the teaching of patriotism is one of the most profound forms of sicknesses in our society as a whole. The drug itself too, and psychiatrists have ignored it. It's not fashionable to talk about homosexuals, or to talk about sexuality in general, very complicated, that most importantly should be addressed. Those against women, those against people of different sexual orientation, in short, and each case, those who dare to defy the rules, based on gender, which they're supposed to live through, depending whether they happen at some curious instant near their birthday has been put into blueprint or Pinterest. Those are the roles which are the ones which are so disruptive in which were alluded to by my colleague and talking about senators contributions and women's movements contribution to our size. Now, I ask you, to children, this is right for a young age, growing up, denied the knowledge that our ethical role models ready people both rather, currently to lie to young people that put any if God asks us to do justice to deny the existence of gay people, she asked us to some factions pretend that they did, and the Afghan people to join the conspiracy. Now that was arrogance.

08:14

The kind of virus which is visited on gay people, and it's not published in our national prep, and I demand and oversee that our national press does make a contribution to society by letting people know full information and all information not selected. This has been so often done. Some of you have probably seen repeated photographs and stories about Anita Bryant over the last six months. You must be out of touch with television, movies, and the printed media. Neither Brian are available. We recently received death threats, although I've probably received 250 death threats in the last six years and never wanted that entered the national press. Nor have I been in some fashion Mark arrived for that fact. We've had seven Metropolitan Community churches around the United States burned to the ground by our three churches windows broken out evangelist and sacrilege for those who are religious in various corners of the country. Canada, Florida, St. Petersburg, Florida, Minneapolis, Minnesota, Phoenix, Arizona, Los Angeles, San Francisco, and here in the US as well. These are acts of overt violence is not one of those reporting the national press. The only reason that one group of people have found their system likes debt, a young gay fellow working as a gardener San Francisco City Hall gardens, and who shouted that run for EDA is they stopped him to get the only reason that that was ever introduced in public press was because a few weeks later announced the mother sued the need to provide for a million dollars. You didn't read in the national press in Time Magazine, Newsweek, USA We have a world report or any new National News Daily, that that has been killed as a direct Patriot Act in response to the declines campaign of love homosexuals. You read it, monitors instituted million dollar suits against Anita. And therefore, it was a national data. That's the violence, far

10:24

Bonnie's.

10:26

That is the man locked in the trunk of a car here, Kansas, or so on and on, you can even replicate this nationwide. And the President ignored and denied at any point that Anita Bryant promoted me, it became a national issue with pictures of her time magazine. And it said my story about Anita and the violent gay clock goes viral. It didn't mention, even though we talked with all of the staff reporters who were doing the issue of that particular magazine of time for that particular issue. It didn't mention any of these things, which was the Michelle, I told you, that is a blackout on the news. And that is against the side as against free estimation. It is a violent act against all of us. We were deprived with that information to judge it to understand homosexual service excellence in various parts of our life. I decided that I am the father of three children. My children, who I love deeply and care about to be raised, where they have access to information where they can be who they are, and not close to the IP and to Ireland's discovery of who I was as a gay man. Bringing severe consequences on my children, myself, my wife, my friends, is my other family. Because of I was originally not counting Minister a shirt, and I couldn't possibly be one of those disgusting people. No, but it continuously told him I didn't want to wear a dress, and didn't want to wear high heels and lipstick, and how could I possibly be homosexual, which reached college and for that was told by medical authority, the psychiatrist, distinguished psychiatrists, that, that I couldn't possibly be one of those people could get even more sophisticated ears for the same reason. He was a diviner designed with. So with the authority of the Church, they need to know more about the nature and the kinds of people who are homosexual than did I was ignorant decidable. And that continues to this day, without really no research, except by anecdotal trying to stay away from psychiatrists about homosexuality, and that, again, is a form of violence. When we look at the American Psychiatric Association, psychiatric establishment history, and look a little bit you'll find that one of the founders of the American Psychiatric Association is made with equal vigor and strength against masturbation, he said it was a deep seated illness. Now we know that virtually every human being on the face of the earth engages in masturbation, including a lot of married people. Who are the type that if you did that, you would have a hairy palms, who would go insane 16 Other things that's only 57 years ago, that sort of nonsense. So to now have psychotic psychiatry calculate in very restricted forms in longer pretending that day, they're sick as we've heard again, cheers night. Well, is that true? Since again, according to the Kinsey data, about a third of the American male population, for example, it's kind of built on sexual experiences to the point of orgasm uses up a lot of sicknesses, but no, I think comfortable with the fact that we should hold on to the kinds of sampling the kinds of techniques, we psychiatrists, you know, I came into the gay movement as a professor of biology and a research scientist known as a Paul when I read some of the kinds of medical information psychiatry Newpoint on these work. The notion is basically that people who come defining themselves as skills is that clitoris are therefore ill at all people of similar sort, are ill. The target uncontrolled experiment, the uncontrolled experiment and if you look at a poker diverse other people that was quickly clarified, when research was done, except people who were controlled with without psychiatric history and exercises, probably 99%. Of all heretics. One wonders what a Martian coming here with no prior experience of human beings and conducting psychiatric experiments with this institution of mirrors. Again, Dr. Pol is probably with the current list and I think that the institution of marriage is a very, very complicated character if you only do or she only get it those clients who came because they had problems in the institution of marriage on the Mauritian type of partnership with those who are successful marriages. Now, because of the

ability of a hybrid homosexuality, you can feel it for virtually everyone who uses their families. More black eyes or Santa partnership with Jamie, who I know personally is a research biologist, I can tell another homosexual son where they sit when I measure the homosexual and until are 29 years old, and then you're gonna lose protection experiences at that point. Well, that gave me a few points on sexuality too, because I was sent to stereotactic by ministers and psychiatrists. And by our general society, it's not that easy to set up a limited, I think we as the gay movement have a great deal to contribute to the change in that that awareness that image and making people look and see and relate to the kinds of sexist role playing adventure that have gone along in our society is pointed to by founders at the root of this hatred, knockin, if we could create a Feminist Revolution, recognizing the rights of men to cry, and women to explore, and all the other crimes across gender traits between the client yourself, so 30% of the population each way, we will have a revolution, there will be far beyond that any of those socio economic theories contemplate the left or the right, I would only add one final point. That is respect to the nuclear family. I quite agree with Dr. Bose, I think they're fabulous. The disaster is contrary to our natural history as a species, until you get to a revolution, if you can, possibly 200 years ago, people would live in large groups, with aunts and uncles and cousins, older brothers, younger sisters. And so this was proximity with a wide range of role models available to one at all. So that when there was a faulty primary family member, there was opportunities for low violate the wide range of diverse older people to fill that role, we lacked that now, I would only say that rather than advantage against feminist, and vain, and homosexuals, those who will take this tack and support the Nixonian nuclear family, originally, when in fact, it's a buyer with

17:27

great deal of the great women of the past and we have had great offers to aviators, women in almost every occupation. In fact, women were MDR patients, with the exception of about 30. And when I was many, many authors, so I don't think the time went into insane as they are today. And farther afield at the moment, it's empty, there's nothing in the world and the only women and I'm going out every day who are second class citizens. And so in a second class position, that is one of the great things about America. And it's one of the things that seven out because our founders recognize that it means to recruit and and I have made in the generic sense not to be the size of the big

18:51

three if I don't mind for three then we would not ever did not have restrictive laws by governments that we could develop. And that's the only reason that many of you young people are going to want to be at this university today is because American system and because it is American industry then it's liberated wherever the American industry has made it possible. They've made all the conveniences in our home so that we do not have to do that on a movie walking if my mother did remember growing up and all my students the ironing and all day Wednesday thinking we have the materials that we've been watching where we had to fix this and so we do work with the management. And most of them and we will have never experienced this so they can have fans. But really we're talking about in fact, I had to we had to endure growing up again. Imagine or it could be very lucky to have an opportunity to go to college, we've worked our way through in the industry that has given us the opportunity. One of the reasons is that we end up making racist dinner. We had many a handicapped person.

And they didn't have government, giving them anything. They didn't have anybody giving them anything. They made it on their own. And I can think of one year in the making here, University of Kansas into the major tech nation that was born with that, we make artificial limbs for this girl. And today, she was a medical history technician. She now she's teaching people how to be successful person in their life. She kind of thing she didn't come from a wealthy family, she could have had, okay, so reading a paper that she chose to pay for the work and pay for everything that she can be born physically handicapped and make it there is no reason more able bodied people can't make it. I think one of the main problems is that began people today and it's not your fault. It's

♂ 21:34

put too much negativity before you but he's not in town, he had

♂ 21:41

really bad coverage, and

♂ 21:42

then he's not going to reach citizenship for every year at Park car coordinators citizenship for these young people are not taught to be decent, some of the children and young people in the area high schools, they are not being taught to search to reach burnout, they will do that. Too much negativity with the camera to the floor. And I feel that it's time to change to put constructive information to put into it before anybody can go the wrong way. We have two ways either doubt or and

♂ 22:27

you can

♂ 22:29

you can anyone can do to success. If you set your goals and set a proper result. Now I'm not here to tell you how you can go. And you have experts in America of embracing open access and

♂ 22:51

that wherever they are, then

♂ 22:57

they'll be happy. And that's because it's not just because you don't have to choose a certain lifestyle or a certain way.

⌚ 23:08

Thank you.

⌚ 23:37

Think that. I will say that I don't know. I feel that when I was talking about the length was when I was talking about something totally different than without talking about it. It's very difficult to even argue and also I read that so much of what was said and I agree in particular to the world. And because one of the things that the corruption of the Congress didn't know more than for so long is the dishonesty and corruption at the highest levels in this country. I think I agree with you. Part of the reason that we are taking the kind of stuff to get

⌚ 24:31

made the point many times that man and women are different and I think

⌚ 24:38

that and I think that women have coming up with brutal competition.

⌚ 24:44

And I hope that we don't do that kind of thing. I also died at the time that we isolated the nuclear family I need to talk with

⌚ 24:59

me consists of many

⌚ 25:00

aunts and uncles and grandparents, relatives and loved ones to have their report we work with the class itself with thinking about how she would devote itself to the child to raise the perfect father logically healthy can be either a defense of the athletic family because all of the research I read the literature I will cover will be difficult for the child growing up in this situation, and particularly adept with us strategists are having an axe to grind with how they're raised. And that is totally nature. We're all gratified and frustrated chunky read from the child, the mother or the elementary school

26:01

teacher or babysitters the government

26:09

often is the one talk to people all the time that he should then on the one hand identify with you but I'm gonna repudiate all of the characteristics because they're all difficult situations

26:56

creativity is limited to homosexuals because as you know, there are many observer it was creating

27:10

thing that excites me the tenor of sexuals that are a few homosexuals, man. But those are microphones. I think. I think what I would like to do now with my five minutes is to speak more deeply about sexuality as why What sets me to see it touted as a normal way of life It just is. I mean, COURAGING doctors to be medical students talk but we don't know what's on the sexuality. I started to think what the impact on the life of a worker might be the current state child with a doctor and say listen, we found that having homosexual tendencies tell us what to do. There are psychiatrists around workers who say I'm worried about because

28:18

it's easier to stay where you are and decide to accommodate you rather than get over some service and economics and go ahead and rate chosen ladies and gentlemen, it is imposed on the individual by severe psychic conflict, not like that is created and generated by disturbances within the family structure. The personalities of the parents the nature of their relationship with each other. Quality of family life determines whether or not an individual can develop a psychological identity which is congruent or in harmony with their biological imperative. We are not biologically bisexual, bisexuality is a psychological phenomenon. And when it appears in individuals is always traceable to the nuclear family to the events that occurred there may be child sexuality. You really expected for for a biological imperative and we call it a sexuality or a biological imperative. You would find it in all cultures. The unit hits sexual behavior the Aborigines do not to push the growth zones. If it weren't normally we would expect it to be more prevalent. It is not. It occurs at times and the crisis societies are In this epidemic form according to the psychoanalyst, an anthropologist when societies are saved in practice, or in a state of collapse, and the reasons for that are here because the crucible from which you can live spring thing usually is in trouble with time prior to the collapse, a crisis that happened in Rome, for instance, a nuclear event, mother, father, John saw and that was a serious strain at the time. As far as the whole. The clock in Rome started up with the birth strong families in the

very beginning. In America, strong partnership and his main destination. Man is the man or woman is the one perspective. men did not appreciate women in those days. So if you think men look down on the web

31:14

the children are not getting the kind of male and female input from their mothers and fathers message figures and divide off the strong boys and girls who become strong. Sexuality is not created chosen because it is imposed on individuals by psychological conflicts which preclude their nagging happy random

31:44

question period.

31:58

Thanks very much,

31:59

that's a golden

32:07

nugget or whatever to claim him or like to keep blood he was certainly an upsetting upsetting man. But that's categorization does not automatically make him a homosexual, whatever doctor goes missing. I think that we must also look at a number of things he said and inquire as to the scientific foundation. And I would assert rather boldly and perhaps rather unreasonably that my training as a scientist I demand evidence and data and believe to look at those and controlled experiments. Dr. Golson in general psychiatry anecdotal, and Dr. From a self defined population of disturbed people with common presents to the psychiatrist or to the clinic or through the criminal process. And that's by definition, the examiner dressed earlier and I returned to it. He asserted that there is a decrease in homicide on sexuality. But I will certainly not be pleased if there were but I fear there's not, we do indeed, get under sections for a constant 10% supply of homosexual. Throughout history generation after generation is an error on topologies if you have to install the hardware is research in as much as every major study by reputable scientists at the major universities of this country, as shown that other societies universally populist homosexuality and center to sexuality. We have originally thought that all people don't share our particular value system.

33:45

is a classic study in the area explored mainstream University study of nearly 100 societies

around the world and found that we are amongst the three most accessible and within that all phobic societies in the world. And the overwhelming majority of cultures are, in fact,

34:01

strongly directed both on sexual

34:05

and heterosexual directions, and do not have restrictions or at least do not have restrictions on sexuality, such as in articles or in what mentioned the use of I might mention to you that declared historic reasons, not the genetic reasons. There's some other terms raised as comrades Lawrence, do you any there amongst the most hostile and violent people on the face of the earth, as defined by anthropologists and others for good steward meetings were subjected to by white men, I would find their absence of homosexuality that is and their incredible violence as being worthy traits in a religious society. So to the masculine role model Mystique, thank god men are becoming a little less. My kids a lot better begin beginning to develop and realize the capacity they have for healing. For crying for loving for caring, it's time to society ended in which males in America at this point, really basically can't eat a lot or touch anything except a dog or a cat, or a child under the age of six and preferably that only the female that is a great and destructive part of our society and I think accounts for why we have such an aggressive and hostile society and why all 100 of the United States Senators at this day has a job much of our history. The entire senate is comprised of men. There's not a single isolated issue with the isolated woman in the United States Senate present time so thank you. No, I don't like from the house to the model. I think my three children are growing up to be extraordinarily well adjusted happy kids and it's been raised by and large measured by okay Florida, and I was at the very homophobic and gay hospital psychiatrists testified against me at various points in the hearings about mistakes in life protecting your rights with my children, and has repeated this Dr. Garner majority author of a recent book, I'm sure Dr. Bose is acquainted admitted under oath that my children are extraordinarily well adjusted show the best evidence of fathering a good father and and no need whatsoever for psychiatric assistance or for any manner of counseling, but it has been an ongoing thing for several years. So I think that again fathers can be an extremely good father. There are now several studies at University of California and State University of New York Dr. Richard Green and others would show the children that lesbian mothers reared by either solo or by a couple of lesbian couples show all the way down to sexual counterparts and show now the difference the deviation from the general well adjusted to those children in the same range and frequency of sexual orientations as in the general population of other parents children thank you

37:05

if you would like to ask a question I would request that you go to one of the microphones they do. So let me just have a question for one side or the other and then attempt to All right, so I would like to ask the first question

37:18

Can these microphones they are correct yes. Would you like to ask this question statements

37:30

like I deserve in my small child correct which one of us should stop

37:51

both love your job.

38:14

Love it the superhuman coaches. Dr. Steve speak together draws them together. And of course the problem in homosexuality is heterosexual relationship. Why this take and then suddenly, it's fine, but to kind of view them as yourself I think that's perfectly marvelous if your child was equally fond of you.

38:55

Each person can choose whether or not they race. But my question is are we have bandwidth to anyone to teach any type of religion

39:13

in school? Should

39:14

we then turn around and have the right to teach something that can be in the same font should there be counseling for people to help them to become homosexual for help them? Should there be

39:36

over classified one of the other topics

39:46

well, as the Bible says, sexism, for or human without sin cast the first stone. I think that if you start down the list of those violations of the Bible Oh, and I certainly am not going to restrict myself to that notion because I play throughout and more fortresses in America, on the

freedom from religious institutions in our government, as being far more important than whether or not she has to be a Christian, New York or about 40% of the population is Jewish and does not like to hear this is a Christian nation, and quite the journey.

40:26

I think in terms

40:28

of coming to the Bible, I think that you had better off the character, I'm not sure. We think your Bible, because of the scriptures industry is probably open to have been translated is now amply documented for example.

41:27

Don't expect to buy, buy, or use, then reports upon yourself. Secondly, in terms of heterosexuality, and homosexuality taught in school, I'm not.

41:48

I again, find a tolerable a standard, what may be presented by a homosexual or bisexual is within the school.

41:58

You don't have to be willing to settle for two minutes before they let you

42:01

know how heterosexual they are better than the second half. They begin to exhibit a wife for breakfast or does their husband say and they're where they're raising their children, vegetables from their sexuality.

42:31

Believe as the psychologists have great difficulty understanding the incredible power in society, without Welcome to sexuality for children. With children, these countries are going hungry, don't have enough to eat, and show the country that parents are working in childcare place to go. And children in the country are being

42:58

battered 1000s of women at home, right.

43:05

Now today's lesson concerning children, we're going to attend to these problems because we don't have the luxury to worry about what their parents are doing.

43:21

reason that we're having so many of these problems. The dishonesty in the women, children and the decline in our society, we decline and our value system, very young people are not being taught by your mom, if we were when we were growing up. I don't understand some of these things that I'm hearing that I guess I live in a different world in the world, the world of academia where we do have to face our real problems. And we don't seem to be, even though we've worked with handicapped people, people that do have problems. I don't I don't think the strange things that that you keep talking about, we hear about the physical problems that people have, because we need to make the greatest amount. And we do ask them to start a new way to design a better life because of a physical impairment. So I think people are getting this and what you're hearing. And unfortunately, it turns out the world of academia is encouraging this negativity, because you're not being taught. Targeting or what could happen and how you can make a better world because every generation that has ever

44:39

built a business, the back of my mind is gonna read my parents generation study it was seeing how could it get any worse? And I come along and it's World War Two and bad times. How could it be so many words? You come along on your phone and there may be It's the most terrible world that's ever been to

45:04

you in

45:07

a better way
